# LOOK NO HANDS...

**and it's a non destructive technique!**

Only Oxford Analytical Instruments can offer you the most simple, accurate and rapid capability for measuring oil content in seed crops, pressed meals and extracted meals — and as you can see your sample is completely unaffected.

Speed — well, typically measurement time is less than 5 minutes including calibration, far faster than time-consuming conventional methods, and accuracy is such that you even plot the oil distribution across a sunflower head, seed by seed.

Whatever your analysis application, win time on sample preparation and see results — immediately. Get the facts from Oxford Analytical Instruments — we are the world's specialists.

Complete the reply coupon, or contact us direct at:

## BERICO Soybean/Sunflower Process Driers

Twenty-four Berico Process Driers have been selected by nine major process companies since introduction. Total capacity: 91,000 BPH . . . with four installations over 10,000 BPH and one over 14,000 BPH.

Why not make Berico's most advanced-design drier your first choice? Berico offers more!

- **Maximizes fuel efficiency** . . . Full Recirculating Air System . . . with a recycle air cleaning device that cleans all recycle air. Much safer, too.
- **More production capacity** . . . Patented TURN-FLO column mixing action provides uniform drying for more process efficiency and capacity.
- **Tapered column design**—exclusive. Narrow at top and wider at bottom . . . resulting in 1) increased drying capacity, 2) better fuel efficiency and 3) uniform drying.
- **Clean inside and outside** . . . All recirculated air is cleaned air. Minimum exhaust air and effluent to atmosphere.
- **Insulated enclosure and air ducts.** Real fuel saver!
- **Automatic moisture control.**
- **Process proven** for fuel efficiency, reliability, safety and serviceability.

Patent Numbers:  
TURN-FLO 3,751,824  
RECIRCULATING SYSTEM 4,048,727  
4,250,632 — 4,263,722
