President's Club and Honor Roll

The members listed here have qualified for the 1983-84 AOCS President's Club or Honor Roll. Members who recruit at least one new member qualify for the President's Club; those recruiting three or more members qualify for the more prestigious Honor Roll. President's Club and Honor Roll members will receive further recognition at AOCS annual meetings and may participate in other special programs. Forms for use in recruiting new members are available from AOCS Headquarters, 508 S. Sixth St., Champaign, IL 61820, USA.

ENERGY SAVINGS

How much can you afford to spend for energy?

With the high cost of energy, it pays to ask that question before you purchase oil milling equipment. Buhler-Miag has some comforting answers. We design our equipment for maximum energy efficiency and production performance.

Energy savings is one reason why companies all around the world turn to Buhler-Miag for processing machinery.

So if you have questions about the efficiency of your equipment, come to Buhler-Miag for the answers.

Contact us for information on our cleaning, cracking, dehulling, flaking, grinding and mechanical or pneumatic conveying equipment.

Comprehensive New Volume—AOCS Monograph 10

Dietary Fats and Health

Edited by E. G. Perkins & W. J. Visek

This new AOCS monograph is the proceedings of a conference held in Chicago in December 1981. Containing 60 chapters by leading scientists in biochemistry and nutrition, the book presents the latest scientific information in fat chemistry and technology related to nutrition. Specifically, it covers the general role of fats in nutrition, metabolism of isomeric fats, and the role of vitamins A, D, E and K in health and disease. Included are controversial topics such as the role of lipids in heart disease and cancer, and the effects of diet on high density lipoproteins and the techniques of lipoprotein fractionation. The book also contains information devoted to emerging research on dietary fats and nutrition in such areas as multiple sclerosis and the immune response. Numerous illustrations and references are found throughout.

Subjects include:

Chemistry and Technology of Fats
 New Methodology in Fat Analysis
 Nutritional Effects of Fats, and Metabolism

Essential fatty acids
 Pre- and post-natal development
 Isomeric fats

Vitamins A,D,K,
 Immune response
 Heart Disease

Epidemiology
 Diet

Lipoproteins
 structure
 effects of diet on
 fractionation
 lipoprotein lipase
 diet and cholesterol
 relation to cancer

Cancer and Lipids
 Epidemiological
 Dietary fat
 Breast cancer
 Colon cancer
 Antioxidants
