

ERRATA

In the article, "Effect of Triglycerides Containing 9,10-dihydroxystearic Acid on Polymorphism of Sal (*Shorea robusta*) Fat" which appeared in the June 1989 issue of *JAOCs* (66:805-808), incorrect figure captions appeared below Figures 2 and 3. The captions and figures are presented correctly below.

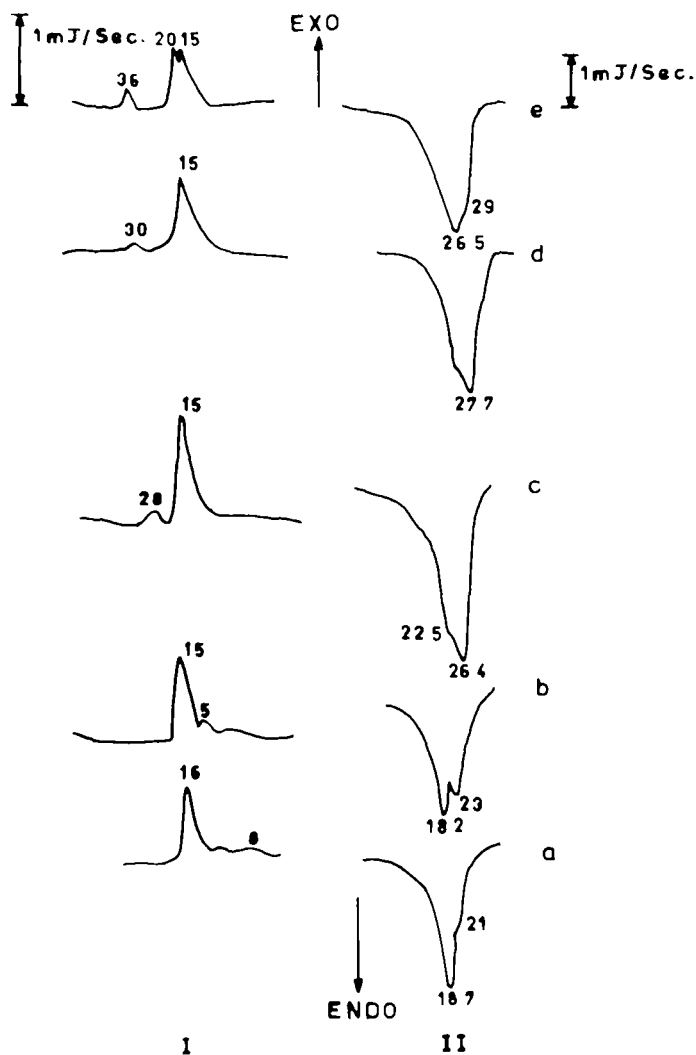

FIG. 2. I, DSC cooling curves at the rate of $2^{\circ}\text{C}/\text{min}$. II, DSC, heating curves ($10^{\circ}\text{C}/\text{min}$) after cooling at $2^{\circ}\text{C}/\text{min}$. a, b, c, d, and e, respectively, indicate the curves of TG and TG containing DHS-TG at 2, 5, 8 and 10%.

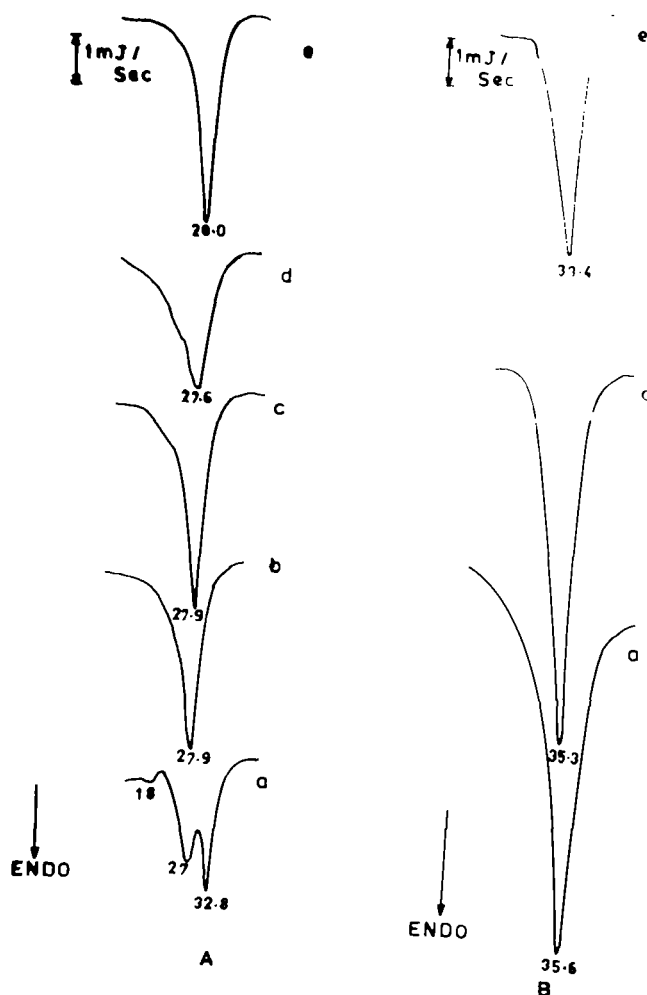

FIG. 3. A, DSC heating curves ($10^{\circ}\text{C}/\text{min}$) of samples tempered at 0°C for 18 hr. B, DSC heating curves ($10^{\circ}\text{C}/\text{min}$) of samples tempered at 0°C for one hr and at 26°C for 3 hr. a, b, c, d, e, respectively, indicate the curves of TG and TG containing DHS-TG at 2, 5, 8 and 10% levels.
