It is unfortunate that an error of this order of magnitude could slip through in the peer review process. Yet, this manuscript received an extensive review by experts in the field (Senior Associate Editor, Associate Editor and 4 reviewers) and even they did not detect the error. We need to be ever more diligent in our efforts to give each and every manuscript a detailed and fair review.

Our thanks to Dr. Dijkstra for pointing out this error and, in general, being a quality watchdog for JAOCS. His efforts to maintain the quality of JAOCS are greatly appreciated.
