

INDEX OF AUTHORS' NAMES, 1930.

A.

- Achmatowicz, Osman, Reginald C. Fawcett, William H. Perkin, jun., and Robert Robinson**, strychnine and brucine. Part XI. Note on dihydrobrucine and some derivatives, 1769.
- Adam, Thomas C. C., and Alfred Russell**, the absorption spectra of diphenyl and some derivatives, 202.
- Adamson, Arthur B.** See **Frederick D. Chattaway**.
- Aggarwal, Joti S., Ishwar D. Khera, and Jnanendra N. Rây**, phthalazines. Part II., 2354.
- Aggarwal, Joti S., and Jnanendra N. Ray**, *N*-acylpyrazolones as acylating agents, 492.
- Ainley, Arthur D., and Frederick Challenger**, studies of the boron-carbon linkage. Part I. The oxidation and nitration of phenylboric acid, 2171.
- Aldis, Richard W., and James C. Philip**, the production of fog in the neutralisation of alkali with hydrogen halides. Part II. The significance of the presence of ammonia, 1103.
- Allmand, Arthur J., and Edward Beesley**, the photochemical union of hydrogen and chlorine. Part I. The effect of light intensity, 2693.
- the photochemical union of hydrogen and chlorine. Part II. The effect of wave-length; measurements with filtered light, 2709.
- Allmand, Arthur J., and Reginald G. Franklin**, the photochemical reaction between oxygen and hydrogen chloride, 2073.
- Allmand, Arthur J., and Derrick W. G. Style**, the photolysis of aqueous hydrogen peroxide solutions. Part I. Experimental methods, 596.
- the photolysis of aqueous hydrogen peroxide solutions. Part II. Experimental results, 606.
- Amstell, Simon.** See **David C. Jones**.
- Anderson, John S.**, the vapour pressure of nickel carbonyl, 1653.

- Angell, Frederick G., Harry D. K. Drew, and William Wardlaw**, a new interpretation of the isomerism amongst co-ordination compounds of platinum, 349.
- Ashley, Julius N., and Charles R. Harington**, synthesis of *l*-2-thiohistidine, 2586.
- Ashley, Julius N., William H. Perkin, jun., and Robert Robinson**, strychnine and brucine. Part IX. Preparation of some isomerides of dinitrostrychol and trinitrostrychol, 382.

B.

- Bailey, Charles R.**, complex formation amongst the nitrates. Part II. The ternary system phenol-silver nitrate-water, 1534.
- Bailey, Kenneth C.**, the inhibition of chemical reactions. Part III. The inhibition by sulphur of the atmospheric oxidation of benzaldehyde, 104.
- Bain, James.** See **H. Gordon Rule**.
- Baker, Herbert C.** See **Henry Terrey**.
- Baker, John W., and Christopher K. Ingold**, the nature of the alternating effect in carbon chains. Part XXXII. The directive influence of ψ -basic systems in aromatic substitution; nitration of benzylidene-*m*-nitroaniline, 431.
- Baker, John W., and William G. Moffitt**, the nature of the alternating effect in carbon chains. Part XXXIII. The nitration of some aromatic sulphonium and selenonium salts, 1722.
- Baker, Wilson**, colloidal phenoxides. Part II. Some phenanthraxanthones, 261.
- 2-arylcoumaranones, 1015.
- Baker, Wilson, and Randal G. A. New**, the supposed mandeloidisonitrile, 1274.
- Balaban, Isidore E.**, preparation of 4- and 6-hydroxy-3-nitrophenylarsinic acids, 183.

- Balaban, Isidore E.**, an investigation into the formation of 4(5)-amino-glyoxalines. Part I., 268.
3-acetamido-4-hydroxyphenylstibinic acid, 1685.
derivatives of 4-methyl-, 4:6-, 4:7-, and 4:8-dimethyl-2-hydroxyquinolines, 2346.
- Balfe, Michael P., Joseph Kenyon, and Henry Phillips**, the constitution of double sulphonium mercuric iodides; the optically active mercuri-tri- and -tetra-iodides and cadmi-tetra- and -penta-iodides derived from *l*-phenacyl-methylethylsulphonium iodide, 2554.
- Ball, Alfred O.**, the measurement of the dielectric constants of organic liquids, 570.
- Bamford, I. T.** See *W. R. G. Bell*.
- Bannister, L. C., and Ulick R. Evans**, the passivity of metals. Part V. The potential-time curves of some iron alloys, 1361.
- Barber, Harry J.**, aromatic arsenic compounds containing sulphur groups attached to the nucleus. Part I. Sulphonic acids and their derivatives, 2047.
aromatic arsenic compounds containing sulphur groups attached to the nucleus. Part II. Thiocyanate and disulphido-groups, 2725.
- Bardhan, Jogendra C.**, the mechanism of cyanoacetamide and cyanoacetic ester condensations, 1509.
- Barnett, Edward de B., and Norman F. Goodway**, the synthesis of *meso*-alkyl and *meso*-aryl anthracene derivatives. Part VII., 1348.
- Bassett, Harold L.**, studies in the reactivity of aromatic hydroxyl groups. Part I., 1313.
- Bassett, Henry, and Herbert H. Croucher**, a phase-rule study of the cobalt chloride colour change, 1784.
- Bayliss, Noel S.** See *Nevil V. Sidgwick*.
- Beesley, Edward.** See *Arthur J. Allmand*.
- Bell, Ernest V., and George M. Bennett**, stereoisomerism of disulphoxides and related substances. Part V. The dioxides of 3:5-dimethylthiolbenzoic acid, 1.
- Bell, Frank**, investigations in the diphenyl series. Part IX. Further experiments with sulphonamides, 1071.
the migration of acyl groups in *o*-aminophenols, 1981.
- Bell, James**, the treatment of cedrene with mercuric acetate, 1908.
- Bell, James, and George G. Henderson**, the chemistry of the caryophyllene series. Part III. Clovene alcohol and α -caryophyllene alcohol, 1971.
- Bell, W. R. G., C. B. Rowlands, I. J. Bamford, W. G. Thomas, and W. J. Jones**, the equilibrium between acetone and salts, 1927.
- Belton, Joseph W.**, the conversion of *n*-chloroacetanilide into *p*-chloroacetanilide by hydrogen and chlorine ions, 116.
- Bennett, George M., and A. Neville Mosses**, the influence of the sulphur atom on the reactivity of adjacent atoms or groups. Part IV. Direct polar effects, 2364.
- Bennett, George M., A. Neville Mosses, and F. Sydney Statham**, stereoisomerism of disulphoxides and related substances. Part VI. Coordination compounds of some disulphides and diamines, 1668.
- Bennett, George M., and Gervase H. Willis**, tetrabromodimethylquinoxaline, 1709.
- Bennett, George M.** See also *Ernest V. Bell*.
- Bhagat, Kashmiri L., and Jnanendra N. Rây**, 1:3:4-triazoles, 2357.
- Bills, Edwin J.** See *James C. Duff*.
- Bircumshaw, Louis L.**, the drying of gas streams, 2213.
- Blayden, Herbert E., and Cecil W. Davies**, the calculation of activity coefficients from solubility measurements: thallose chloride, 949.
- Blood, John W., and Brian D. Shaw**, the reactivity of halogen atoms in compounds of the pyridine series. Part I. The halides of 2-stilbazole, 504.
- Bott, Harold G., Walter N. Haworth, and Edmund L. Hirst**, the development of a novel form of isomerism in the sugar series. Part II. The third variety of tetra-acetyl methylmannoside, 1395.
- Bott, Harold G., Walter N. Haworth, and Edmund L. Hirst** [with *Robert S. Tipson*], the structure of carbohydrates and their optical rotatory power. Part IV. Derivatives of α - and β -methylmannopyranoside, 2653.
- Bott, Harold G., Edmund L. Hirst, and James A. B. Smith**, derivatives of lyxofuranose, 658.
- Bottomley, Arthur C., Arthur Lapworth, and Arthur Walton**, action of monochlorodimethyl ether on magnesium benzyl chloride, 2215.

- Bowden, Sydney T.** See *James C. Thomas*.
- Bowen, Edmund J., and Edmund L. Tietz,** the photochemical interaction of acetaldehyde and oxygen, 234.
- Boyce, Ernest G., William P. Rankine, and Alexander Robertson,** some derivatives of *m*-xylene, 1216.
- Bradford, Bernard W., and George I. Finch,** on the dielectric strengths of some explosive mixtures containing carbonic oxide, 1540.
- Bradley, William, Robert Robinson, and Gerold Schwarzenbach,** a synthesis of pyrylium salts of anthocyanidin type. Part XIX. A synthesis of delphinidin chloride not involving a demethylation process, and syntheses of lirsutidin chloride and of delphinidin chloride 3'-methyl ether, possibly identical with petunidin chloride, 793.
- Brady, Oscar L., and Morris M. Muers,** the methylation of the oximes of benzil. Part II. The monomethyl ethers of the benzildioximes, 216. the co-ordination compounds of oximes, 1599.
- Brady, Oscar L., and Frank H. Peakin,** the isomerism of the oximes. Part XXXVII. Allyl-*p*-nitrobenzaldoximes, *O*- and *N*-allylhydroxylamines, and sulphime *S*-ethers, 226.
- Brady, Oscar L., and Cedric V. Reynolds,** triazole compounds. Part III. The alkylation of nitro-1:2:3-benzotriazoles, 2667.
- Brady, Oscar L., and Cecil Waller,** the formation of phenoxazines, 1218.
- Brewin, Albert, and Eustace E. Turner,** γ -phenyl- α -methylpropyldimethylarsine, β -benzylbutyldimethylarsine, and some related compounds, 502.
- Britton, Hubert T. S., and William L. German,** physicochemical studies of complex acids. Part I. Tungstic acid, 1249. physicochemical studies of complex acids. Part III. Molybdic acid, 2154.
- Britton, Hubert T. S., and Robert A. Robinson,** physicochemical studies of complex acids. Part II. Vanadic acid, 1261. physicochemical studies of complex acids. Part IV. The vanadates of silver, 2328.
- Britton, Sidney C., and Ulick R. Evans,** the passivity of metals. Part VI. A comparison between the penetrating powers of anions, 1773.
- Burch, William J. N.,** hydroxyaminoacids, 310.
- Burkhardt, George N.,** the action of fuming sulphuric acid on hexane, cyclohexane, and some of their derivatives, 2387.
- Burstall, Francis H., and Samuel Sugden,** the parachor and chemical constitution. Part XIV. Tellurium compounds, 229.
- Burstall, Francis H.** See also *Gilbert T. Morgan*.
- Burton, Harold,** mobile anion tautomerism. Part IV. The stability of some α - and γ -alkylallyl alcohols and their esters; 2:4-dimethylcinnamyl alcohol, 248. the reducing action of a Grignard reagent, 2400.
- Bury, Charles R.** See *David G. Davies,* and *John Grindley*.

C.

- Cahn, Robert S.,** further degradative experiments in the morphine group, 702. *Cannabis indica* resin. Part I. The constitution of nitrocannabinolactone (oxycannabin), 986.
- Campbell, Alan N.,** an apparatus for the determination of solubility, 179.
- Campbell, Alan N.** See also *Alexander Findlay*.
- Campbell, (Miss) Ishbel G. M.** See *John Read*.
- Carter, Sydney R., Walter N. Haworth, and Robert A. Robinson,** conductivity measurements of the comparative rates of hydrolysis of lactones derived from simple sugars, 2125.
- Cavanagh, Bernard,** a general (exact) equation to the potentiometric titration curve, 1425.
- Cavell, Harold J., and Samuel Sugden,** the parachor and chemical constitution. Part XV. The constitution of sulphonium and ammonium mercuriodides (iodomercuriates), 2572.
- Cawley, Charles M., John T. Evans, and Ernest H. Farmer,** properties of conjugated compounds. Part IX. The formation of bimolecular reduction products of butadiene acids, 522.
- Challenger, Frederick, (Miss) Constance Higginbottom, and Alfred Huntington,** the nitration of aromatic thiocyanates, 26.
- Challenger, Frederick.** See also *Arthur D. Ainley*.
- Chandrasena, J. P. C.,** methylfurfuraldehyde oxide as a by-product in the preparation of hydroxymethylfurfuraldehyde, 2035.

- Chapman, Arthur W.**, the influence of a soluble fluoride on the corrosion of iron, 1546.
dynamic isomerism involving mobile hydrocarbon radicals. Part II. The intramolecular character of the amidine rearrangement, 2458.
- Chapman, Arthur W.**, and **Charles H. Ferrott**, dynamic isomerism involving mobile hydrocarbon radicals. Part III. Some effects of substitution on the velocity of interchange and position of equilibrium of isomeric triaryl-benzoylamidines, 2462.
- Chattaway, Frederick D.**, and **Arthur B. Adamson**, the action of bromine upon the *p*-tolylhydrazones of benzaldehyde and of the nitrobenzaldehydes, 157.
intramolecular rearrangement in the isomeric tetrachloro-derivatives of *p*-tolylhydrazones, 843.
- Chattaway, Frederick D.**, and **Larkin H. Farinholt**, the formation of glyoxal-oxazones by the interaction of dichloroacetaldehyde and aryl hydrazines, 94.
- Chattaway, Frederick D.**, and **Harry Irving**, the interaction of butyl chloral hydrate and 2,4-dihalogen-substituted phenylhydrazines, 87.
- Chattaway, Frederick D.**, and **Edwin G. Kellett**, the space configuration of the trithioacetaldehydes, 1352.
- Chattaway, Frederick D.**, and **George D. Parkes**, tetrachloroiodides of the alkaloïds, 1003.
- Cheesman, Geoffrey H.**, the parachor of chlorine dioxide, 35.
- Clark, Robert E. D.**, the action of halogens on ethyldi-iodostibine; antimony bromodi-iodide, 2737.
- Clarke, Sidney G.**, **Joseph Kenyon**, and **Henry Phillips**, the preparation of compounds analogous in structure to sulphinic acids but containing *p*-toluenesulphonimido-groups in place of oxygen atoms; phenyl- and methyl-*p*-toluenesulphonimidisulphine-*p*-toluenesulphonylimines, 1225.
- Clay, Hubert**. See **Herbert H. Hodgson**.
- Clemo, George R.**, and **Stanley B. Graham**, the *cis-trans* ethenoid transformation, 213.
- Clemo, George R.**, and **Robert D. Haworth**, the constitution of santonin. Part III. Proof of the positions of the methyl groups, 2579.
- Clemo, George R.**, **Robert D. Haworth**, and **Eric Walton**, the constitution of santonin. Part II. The synthesis of racemic *desmotroposantonin*, 1110.
- Clemo, George R.**, and **Herbert J. Johnson**, the synthesis of *isoindenoquinolines*. Part I., 2133.
- Clausius, Paul A. K.**, catalytic decomposition of some gaseous ethers, 2607.
- Cocker, Wesley, Arthur Lapworth**, and **Arthur Walton**, primary and associated results of replacement of hydrogen directly attached to 4-co-ordinated carbon, 440.
- Cohen, Aaron**, and **Samuel Smiles**, derivatives of 3-keto-2:3-dihydrothionaphthen 1:1-dioxide, 406.
- Colley, Albert T. W.** See **John A. N. Friend**.
- Cook, James W.**, polycyclic aromatic hydrocarbons. Part I. 1- and 2-Phenylanthracenes and derivatives of 1:2-benzanthracene, 1087.
- Cook, James W.** See also **Gilbert T. Morgan**.
- Cooper, Arthur J.**, and **William Wardlaw**, the octammines, with special reference to tin, 1141.
- Copley, E. D.**, and (**Sir**) **Harold Hartley**, the mobility of the perchlorate ion in methyl alcohol, 2488.
- Copley, E. D.**, **D. M. Murray-Rust**, and (**Sir**) **Harold Hartley**, the conductivity of some uni-univalent salts in ethyl alcohol, 2492.
- Coulson, Edward A.**, anthracene-1-carboxylic and -1:5-dicarboxylic acids and their derivatives, 1931.
- Coulthard, Charles E.**, **Joseph Marshall**, and **Frank L. Pyman**, the variation of phenol coefficients in homologous series of phenols, 280.
- Coward, Hubert F.**, and **John J. Gleadall**, extinction of methane flames by water vapour, 243.
- Cranston, John A.**, a simple electrically controlled thermostat, 1458.
- Cremer, Herbert W.**, and **Donald R. Duncan**, nitrogen tri-iodide, 2750.
- Cross, Edwin J.**, and **Arthur G. Perkin**, reduction products of the hydroxy-antraquinones. Part XI., 292.
- Croucher, Herbert H.** See **Henry Bassett**.
- Cullinane, Nicholas M.**, investigations in the diphenylene oxide series. Part II., 2267.

D.

Davies, Cecil W., the calculation of activity coefficients from solubility measurements. Part II. Thallous iodate, 2410.

- Davies, Cecil W.**, the calculation of activity coefficients from solubility measurements. Part III. The unsymmetrical valence type effect, 2421.
- Davies, Cecil W.** See also *Herbert E. Blayden*.
- Davies, David G.**, and *Charles R. Bury*, the partial specific volume of potassium *n*-octoate in aqueous solution, 2263.
- Davies, Gomer G.**, *Isidor M. Heilbron*, and *William M. Owens*, the unsaponifiable matter from the oils of elasmobranch fish. Part VII. The synthesis of α -glyceryl ethers and its bearing on the structure of batyl, selachyl, and chinyl alcohols, 2542.
- Davies, Walter C.**, *Robert S. Dixon*, and *William J. Jones*, syntheses by means of magnesium amyl halides. Part I., 468.
syntheses by means of magnesium amyl halides. Part II. The reduction of benzophenone, 1916.
- Davies, Walter C.** See also *Wilfred J. C. Dyke*, *David P. Evans*, and *Ivor K. Jackson*.
- Dawson, Harry M.**, and *Jesse E. Smith*, acid and salt effects in catalysed reactions. Part XXIII. The catalytic activity of acid salts with reference to the catalytic effects produced by potassium hydrogen oxalate in the acetone-iodine reaction, 79.
- Dawson, Harry M.**, and *Eric Spivey*, acid and salt effects in catalysed reactions. Part XXIV. A study of the catalytic effects produced by acetic acid and acetate buffers under conditions of effectively constant ionic environment, 2180.
- Day, James N. E.**, some trinitroethylbenzenes, 252.
- Deulofen, Venancio**, degradations in the sugar group, 2602.
- Deverall, William J.**, and *Harry W. Webb*, the reaction between acid chlorides and nitrosylsulphuric acid, 720.
- Dickinson, William P.**, and *Philip G. Marshall*, the isomeric monohydroxyphenylalanines. Part II. Some halogen-substitution products and their reactions, 2289.
- Dippy, John F. J.**, and *Norman H. Hartshorne*, studies in polymorphism. Part I. A preliminary investigation of the polymorphism of *o*-nitroaniline, 725.
- Dippy, John F. J.** See also *Leonard E. Hinkel*.
- Dixon, Robert S.** See *Walter C. Davies*.
- Dodgson, John W.**, the reduction of substituted *p*-benzoquinones by sulphur dioxide alone and in the presence of alkali, 2498.
- Dohse, Hans**, and *Manfred Dunkel*, comments on the paper by Fenton and Garner entitled "The Heats of Association of Acetic and Heptoic Acids in the Vapour State," 2409.
- Dolby, Richard M.**, and *Philip W. Robertson*, electrical conductivity of solutions in phenol, 1711.
- Dootson, Frederick W.**, obituary notice of, 888.
- Drew, Harry D. K.** See *Frederick G. Angell*.
- Drumm, Peter J.** See *Joseph Reilly*.
- Duff, James C.**, and *Edwin J. Bills*, the solubilities of nitrophenols in aqueous ethyl-alcoholic solutions, 1331.
- Duncan, Donald R.** See *Herbert W. Cremer*.
- Dunkel, Manfred.** See *Hans Dohse*.
- Dunn, Richard T.** See *Leonard E. Hinkel*.
- Dyke, Wilfred J. C.**, *Walter C. Davies*, and *William J. Jones*, the interaction between alkyl Grignard reagents and antimony trichloride, 463.
- Dyke, Wilfred J. C.**, and *William J. Jones*, organic antimonial compounds. Part II., 1921.
the interaction between alkyl Grignard reagents and arsenic trichloride, 2426.

E.

- Eccott, Eustace N.**, and *Reginald P. Linstead*, the isomerism of the butylideneacetones, 905.
- Elson, Leslie A.**, *Charles S. Gibson*, and *John D. A. Johnson*, *o*- and *m*-derivatives of simple alkyl phenyl ketones, 1128.
- Evans, David P.**, *Walter C. Davies*, and *William J. Jones*, the lower trialkyl orthophosphates. Part I., 1310.
- Evans, John T.** See *Charles M. Cawley*.
- Evans, Ulrick R.**, the passivity of metals. Part IV. The influence of acids in passivity and corrosion, 478.
- Evans, Ulrick R.** See also *L. C. Bannister*, and *Sidney C. Britton*.
- Everett, John G.**, the reaction between aminophenylarsinic acids and carbon disulphide, 1691.
trypanocidal activity and chemical constitution. Part II. New sulphur derivatives of aromatic organic arsenicals (*cont.*); derivatives of 2-thiolbenzimidazole-5-arsinic acid, 2402.

F.

- Fairbourne, Arthur**, the partial esterification of polyhydric alcohols. Part X. The discovery of the first true β -glyceride, and the untrustworthiness of the supposed structures of certain diglycerides, 369.
- Fairbourne, Arthur**, and **Graham E. Foster**, syntheses of 1-methylantraquinones, 1275.
- Farinholt, Larkin H.** See *Frederick D. Chattaway*.
- Farmer, Ernest H., Cyril D. Lawrence**, and **William D. Scott**, properties of conjugated compounds. Part VIII. Addition of bromine to $\alpha\delta$, $\alpha\gamma$, and $\beta\gamma$ -dimethylbutadienes, 510.
- Farmer, Ernest H.**, and **Thakorbhai N. Mehta**, properties of conjugated compounds. Part X. Variability in the mode of ester addition to butadiene esters and ketones, 1610.
- Farmer, Ernest H.** See also *Charles M. Cawley*.
- Fawcett, Reginald C.** See *Osman Achmatowicz*.
- Fenton, Geoffrey W.**, and **Christopher K. Ingold**, influence of poles and polar linkings on the course pursued by elimination reactions. Part VII. A generalised form of the olefinic degradation of sulphones, 705.
- Fenton, Henry J. H.**, obituary notice of, 889.
- Fenton, Tempe M.**, and **William E. Garner**, the heats of association of acetic and heptonic acids in the vapour state, 694.
- Finch, George I.** See *Bernard W. Bradford*.
- Findlay, Alexander**, and **Alan N. Campbell**, the stability of magnesium *r*-mandelate, 2721.
- Fisher, (Miss) Nellie I.**, and **(Miss) Frances M. Hamer**, a general method for the preparation of thiocyanine dyes; some simple thiocarbocyanines, 2502.
- Forsey, Lancelot A.** See *Thomas W. J. Taylor*.
- Forsyth, Robert**, and **Frank L. Pyman**, nitration of phenyl substituents of heterocyclic nuclei, 397.
- Foster, Graham E.** See *Arthur Fairbourne*.
- Fox, (Miss) Dorothy L.**, and **Eustace E. Turner**, the scission of diaryl ethers and related compounds by means of piperidine. Part IV. Elimination of halogen atoms and scission reactions during substitution processes, 1115.
- Fox, (Miss) Dorothy L.**, and **Eustace E. Turner**, the scission of diaryl ethers and related compounds by means of piperidine. Part V. The nitration of methyl-, dimethyl-, and polyhalogeno-derivatives of diphenyl ether, 1853.
- Franklin, Reginald G.** See *Arthur J. Allmand*.
- Freundlich, Herbert**, surface forces and chemical equilibrium, 164.
- Friend, John A. N.**, the solubility of neodymium sulphate in water and in sulphuric acid solutions at various temperatures; a new hydrate, 1633. solubility of magnesium neodymium nitrate in water, nitric acid, and magnesium nitrate solutions, 1903.
- Friend, John A. N., Albert T. W. Colley**, and **Richard S. Hayes**, the vapour density of zirconium tetrachloride, 494.
- Friend, John A. N.**, and **Reece H. Vallance**, the occurrence of iron pentacarbonyl in coal gas stored under pressure for 30 years, 718.
- Fulton, Robert A.**, and **William B. Lee**, the anomalous fifth carbon atom in *n*-fatty nitriles, 1057.

G.

- Garner, William E.**, and **D. A. Hall**, the catalytic action of hydrogen on the carbon monoxide flame, 2037.
- Garner, William E.**, and **M. G. Tanner**, the dehydration of copper sulphate pentahydrate, 47.
- Garner, William E.** See also *Tempe M. Fenton*.
- Georgeson, (Miss) Elizabeth H. M.**, and **Francis J. Hartwell**, the "uniform movement" of flame in mixtures of ethylene, propylene, or butylene with air, 733.
- German, William L.** See *Hubert T. S. Britton*.
- Gibson, Charles S., Edward S. Hiscocks**, **John D. A. Johnson**, and **John L. Jones**, 10-chloro-5:10-dihydrophenarsazine and its derivatives. Part XIII. Absorption spectra, 1622.
- Gibson, Charles S.**, and **John D. A. Johnson**, 10-chloro-5:10-dihydrophenarsazine and its derivatives. Part XII. Further experiments in the investigation of the 1- and 3-methyl derivatives, 1124. syntheses with $\beta\beta'$ -dichlorodiethyl ether. Part I. Derivatives of tetrahydropryan, 2525.

- Gibson, Charles S., and John D. A. Johnson**, a new complex hydrocarbon of the probable formula $C_{16}H_{14}$, 2785.
- Gibson, Charles S., John D. A. Johnson, and Dudley C. Vining**, compounds of arsenious chloride and pyridine, 1710.
- Gibson, Charles S., Arthur R. Penfold, and John L. Simonsen**, the essential oil of *Backhousia angustifolia*. Part II. The isolation of naturally occurring β -diketones: angustione and dehydroangustione, 1184.
- Gibson, Charles S., and John L. Simonsen**, experiments on the constitution of the aloins. Part II., 553.
the organic compounds of gold. Part I. Diethylgold bromide and some derivatives, 2531.
- Gibson, Charles S.** See also *Leslie A. Elson*.
- Gibson, David T.**, 1:3-dithiolan, 12.
- Glasstone, S.**, the structure of the isomeric methyl ferrocyanides, 321.
studies of electrolytic polarisation. Part IX. Complex cyanides: (c) zinc, cadmium, and mercury, 1237.
- Gleadall, John J.** See *Hubert F. Coward*.
- Gokhlé, Basker, and Frederick A. Mason**, studies in the naphthalene series. Part I. The methylation of α -naphthylamine, 1757.
- Goodall, George D., and Robert D. Haworth**, the structure of isoanethole, 2482.
- Goodeve, Charles F.**, the vapour pressure of chlorine monoxide, 2733.
- Goodway, Norman F.** See *Edward de B. Barnett*.
- Goto, Kakuji, and Zenjiro Kitasato**, the constitution of sinactine (*l*-tetrahydroepiberberine), 1234.
- Gough, George A. C., and Harold King**, trypanocidal action and chemical constitution. Part IX. Aromatic acids containing an amide group, 669.
- Graham, Stanley B.** See *George R. Cleme*.
- Grindley, John, and Charles R. Bury**, the electrical conductivity of butyric acid-water mixtures, 1665.
- Grocock, (Miss) Constance M., Christopher K. Ingold, and Arthur Jackson**, the mechanism of, and constitutional factors controlling, the hydrolysis of carboxylic esters. Part II. Hydrolytic stability maxima of some glyceric esters, 1039.
- Günther, P., and W. Penschke**, comparison of some physical constants of thiocyanate, azide, and nitrite solutions, 100.
- Gulland, John M., and Gerald U. Hopton**, pellitorine, the pungent principle of *Anacyclus pyrethrum*, 6.

H.

- Hake, Henry W.**, obituary notice of, 894.
- Hall, D. A.** See *William E. Garner*.
- Hamer, (Miss) Frances M.**, attempts to prepare cyanine dyes from quaternary salts of 2-methylaceneptyridine and of 5-methylacridine, 995.
- Hamer, (Miss) Frances M.** See also *(Miss) Nellie I. Fisher*.
- Hammick, Dalziel L., and Walter S. Illingworth**, a new orientation rule and the anomaly of the nitroso-group, 2358.
- Hammick, Dalziel L., Randal C. A. New, Nevil V. Sidgwick, and Leslie E. Sutton**, structure of the isocyanides and other compounds of bivalent carbon, 1876.
- Hammick, Dalziel L., and Michael Zvegintzov**, internal equilibrium in sulphur. Part II. Amorphous sulphur (S_{μ}) as a gel, and the Tyndall effect in liquid sulphur, 273.
- Hanson, Norman W., and David M. Williams**, the addition of halogens to unsaturated acids and esters. Part III. The velocity of bromine-addition, 1059.
- Harington, Charles R.** See *Julius N. Ashley*.
- Harrison, Geoffrey B.**, the application of a new type of triode valve to the determination of hydrogen-ion concentration with glass electrodes, 1528.
- Harrower, John.** See *H. Gordon Rule*.
- Hartley, (Sir) Harold, Theodore William Richards Memorial Lecture**, 1937.
- Hartley, (Sir) Harold.** See also *E. D. Copley*.
- Hartshorne, Norman H.** See *John F. J. Dippy*.
- Hartwell, Francis J.** See *(Miss) Elizabeth H. M. Georgeson*.
- Harvey, John, Isidor M. Heilbron, and Donald G. Wilkinson**, synthesis of alkyl naphthalenes. Part I. 5-, 6-, and 7-Ethyl-1-methylnaphthalenes, 423.
- Hastings, John J. H.** See *Ibrahim H. el-S. Mattar*.

- Haworth, Robert D.** See *George R. Clemo*, and *George D. Goodall*.
- Haworth, Walter N., and Edmund L. Hirst**, the structure of carbohydrates and their optical rotatory power. Part I. General introduction, 2615.
