

# INDEX OF AUTHORS, 1948.

## A.

- Acheson, R. M.** See **King, F. E.**
- Addison, C. C., Bagot, J., and McCauley, H. S.,** the properties of freshly-formed surfaces. Part VIII. Expansion of soluble films of decioic acid at the air-water interface, 936.
- Addison, C. C., and Hutchinson, S. K.,** the properties of freshly-formed surfaces. Part VII. The application of the vertical-plate technique to the study of soluble films at air-liquid and liquid-liquid interfaces. Part IX. Expansion of soluble films of sodium dodecyl sulphate at air-water and toluene-water interfaces, 930, 943.
- Albert, A.,** acridine syntheses and reactions. Part IV. A new synthesis of aminoacridines from formic acid and diarylamines, 1225.
- Albert, A., Brown, D. J., and Duewell, H.,** some syntheses in the benzquinoline, benzacridine, and phenanthridine series, 1284.
- Albert, A., Goldacre, R., and Phillips, J.,** the strength of heterocyclic bases, 2240.
- Anderson, J. S.** See **Bevan, D. J. M.**
- Anker, R. M., and Cook, A. H.,** experiments in the piperidine series. Part IV., 806.
- Armstrong, G. P., Grove, (Miss) D. H., Hammick, D. L., and Thompson, H. W.,** some catalysed gas-phase reactions of aromatic hydrocarbons. Part III. The methylation of naphthalene by means of dimethyl ether, 1700.
- Arrol, W. J., and Glascock, R.,** the conversion of carbon dioxide into acetylene on the scale of 2—20 micromoles, 1534.
- Ashdown, A., and Kletz, T. A.,** the infra-red spectra of mixtures of aldehydes and alcohols, 1454.
- Ashley, J. N., Grove, J. F., and Henshall, T.,** attempts to find new chemotherapeutic amidines. Part IX. Derivatives of 1:1-diphenylethylene and naphthalene, 261.
- Ashworth, R. de B.,** symmetrically disubstituted formamidines; formation by Raney-nickel reduction of thioureas, 1716.
- Ashworth, R. de B., Crowther, A. F., Curd, F. H. S., and Rose, F. L.,** synthetic antimalarials. Part XXIV. Some 2-phenylureido- and 2-phenylthioureido-4-dialkylaminoalkylamino-6-methylpyrimidines, 581.
- Asperger, S.** See **Weber, K.**
- Asquith, R. S., Hammick, D. L., and Williams, P. L.,** the conversion of mepacrine and similar derivatives of 5-aminoacridines into thioacridones by the action of hydrogen sulphide, 1181.
- Aston, F. W.,** obituary notice of, 1468.
- Atherton, F. R., Howard, H. T., and Todd, A. R.,** studies on phosphorylation. Part IV. Further studies on the use of dibenzyl chlorophosphonate and the examination of certain alternative phosphorylation methods, 1106.
- Attenburrow, J., Elliott, D. F., and Penny, G. F.,** a new synthesis of DL-threonine, 310.

## B.

- Backhouse, T., McGoekin, A., Matchet, J., Robertson, Alexander, and Tittensor, E.,** rottlerin. Part VII. The synthesis of tetrahydrorottlerin and of tetrahydroallorottlerin and the reversibility of the rottlerone change, 113.
- Baddar, F. G.,** 2-methoxymesobenzanthrone, 1088.
- Baddar, F. G., and El-Assal, L. S.,** phenylpropionic acids. Part II. The dimerisation of *p*-nitro- and *p*-methoxyphenylpropionic acid, 1267.
- Baddar, F. G., El-Assal, L. S., and Gindy, M.,** 1-phenylnaphthalenes. Part I. The synthesis of 2':5-dimethoxy-1-phenyl-, 4':7-dimethoxy-1-phenyl-, and 1-*p*-tolyl-7-methylnaphthalene-2:3-dicarboxylic acids, 1270.
- Baddar, F. G., and Gindy, M.,** 3:4-benzfluorenones. Part II. Further observations on the effect of groups on their fission with alkali, 1231.

- Badger, G. M.,** a modified synthesis of chrysene, 999. polycyclic aromatic amines. Part I., 1756.
- Badger, G. M., Cook, J. W., and Walker, T.,** synthesis of piperidine derivatives. Part II. Aryldecahydroquinolines, 2011.
- Bagot, J.** See **Addison, C. C.**
- Bailey, A. S., and Robinson, (Sir) R.,** strychnine and brucine. Part XLIX. A new method for the preparation of pseudostrychnine, 703.
- Bailey, D.** See **Hodgson, H. H.**
- Baker, J. W.,**  $\alpha$ -methylene reactivity in olefinic systems. Part III. The Prins reaction with ethylene and  $\alpha$ -methylstyrene, 89.
- Baker, K.,** 4-aminocinnoline, 1713.
- Baker, W., and Brown, N. C.,** the Elbs persulphate oxidation of phenols, and its adaptation to the preparation of monoalkyl ethers of quinols, 2303.
- Baker, W., and Flemons, G. F.,** dimerides of anethole, 1984. the structure of ginkgetin. Part I. Synthesis of 5:8-dihydroxy-4'-methoxyflavone, 2138.
- Baker, W., and Leeds, W. G.,** attempts to prepare new aromatic systems. Part I. *cyclopentindene*, phenylcyclopentane-carboxylic acids, and derived ketones, 974.
- Balaban, I. E., and Levy, M. B.,** 1:1:1-trichloro-2:2-di-(*p*-aminophenyl)ethane, 1458.
- Baly, E. C. C.,** obituary notice of, 1721.
- Banks, A. A., Emel us, H. J., Hazeldine, R. N., and Kerrigan, V.,** the reaction of bromine trifluoride and iodine pentafluoride with carbon tetrachloride, tetrabromide, and tetraiodide and with tetraiodoethylene, 2188.
- Bannister, B., and Plant, S. G. P.,** the action of nitric acid on polycyclic indole derivatives. Part XIV. Acenaphthylene(7':8':2:3)indole, 1247.
- Barakat, M. Z.** See **Sch nberg, A.**
- Barany, H. C.** See **Pianka, M.**
- Barber, H. J., and Wragg, W. R.,** a convenient laboratory preparation of anhydrous hydrazine, 1458.
- Barker, G. R.,** the chemistry of ribose and its derivatives. Part I. Methyl-*d*-ribofuranoside and the characterisation of trimethyl-*d*-ribofuranose, 2035.
- Barker, (Mrs.) M., Hunter, L., and Reynolds, N. G.,** the associating effect of the hydrogen atom. Part XIII. The N-H-O bond; esters of carbonic acid, 874.
- Bartrop, J. A., and Nicholson, J. S.,** the oxidation products of phenols. Part I. The structure of purpurogallin, 116.
- Barrer, R. M.,** synthesis of a zeolitic mineral with chabazite-like sorptive properties, 127. syntheses and reactions of mordenite, 2158.
- Barrer, R. M., and Riley, D. W.,** sorptive and molecular-sieve properties of a new zeolitic mineral, 133.
- Barrowcliff, M.,** obituary notice of, 1475.
- Barton, D. H. R.,** interactions between non-bonded atoms, and the structure of *cis*-decalin, 340.
- Barton, D. H. R., and Cox, J. D.,** the application of the method of molecular rotation differences to steroids. Part IV. Optical anomalies. Part V. Olefinic unsaturation at the 7:8-position. Part VI. *neoSterol*, 783, 1354, 1357.
- Barton, D. H. R., and Schneider, G. A.,** the application of the method of electrostatic energy differences. Part I. Stereochemistry of the diterpenoid resin acids, 1197.
- Bashford, V. G., and Wiggins, L. F.,** anhydrides of polyhydric alcohols. Part X. The conversion of glucamine into 1:4-anhydrosorbitol; the constitution of benzylidene 1:4-anhydrosorbitol, 299.
- Batt, R. F., and Woodcock, D.,** the condensation of chloral with aryl cyanides, 2322.
- Baxter, R. A., McLean, A. C., and Spring, F. S.,** application of the Hofmann reaction to the synthesis of heterocyclic compounds. Part V. The synthesis of 9-*D*-mannopyranosidoxanthine and of 9-*D*-ribofuranosidoxanthine, 523.

- Baxter, R. A., Newbold, G. T., and Spring, F. S.**, pyrazine derivatives. Part VI. The oxidation of 2-ethoxy- and 2-chloro-pyrazine derivatives with hydrogen peroxide, 1859.
- Beech, W. F.**, preparation of certain nuclear-substituted 2-aminophenolsulphonic acids, 212.
- Beer, R. J. S., Clarke, K., Khorana, H. G., and Robertson, Alexander**, the chemistry of bacteria. Part I. The synthesis of hydroxyindoles, 1605.
- the chemistry of the melanins. Part I. The synthesis of 5:6-dihydroxyindole and related compounds, 2223.
- Bell, D. J.**, applications of periodate oxidation to some problems of carbohydrate chemistry, 992.
- Bell, F., and Waring, D. H.**, stilbenecarboxylic acids, 1024.
- Bell, R. P., and Tantram, A. D. S.**, acid-base catalysis in non-aqueous solvents. Part XI. The halogenation of acetone by various *N*-halogen compounds in chlorobenzene solution at 50°, 370.
- Bergmann, E.**, the bromination of 1:5-dihydroxynaphthalene and its methyl ethers, 1283.
- Best, A. P., Ingold, C. K., and Wilson, C. L.**, excited states of benzene. Part VII. Description and analysis of the first ultraviolet band system of the fluorescence spectrum of 1:3:5-trideuterobenzene, 456.
- Bevan, D. J. M., Shelton, J. P., and Anderson, J. S.**, properties of some simple oxides and spinels at high temperatures, 1729.
- Bevington, J. C., and Norrish, R. G. W.**, the cross-linking of vinyl polymers by Friedel-Crafts catalysts. Part I., 771.
- Bick, I. R. C., and Todd, A. R.**, alkaloids of *Daphnandra* species. Part I. Repandine, 2170.
- Bide, A. E., Henbest, H. B., Jones, E. R. H., Peevers, R. W., and Wilkinson, P. A.**, studies in the sterol group. Part XLVII. A new route to 7-dehydrocholesterol (provitamin D<sub>3</sub>) and its derivatives, 1783.
- Bide, A. E., Henbest, H. B., Jones, E. R. H., and Wilkinson, P. A.**, studies in the sterol group. Part XLVIII. 7-Substituted cholesterol derivatives and their stereochemistry (Part I). 7-Halogeno-derivatives, 1788.
- Billett, F.** See **Morrison, T. J.**
- Bircumshaw, L. L., and Harris, I.**, the thermal decomposition of lead oxalate, 1898.
- Birtwell, S., Curd, F. H. S., Hendry, J. A., and Rose, F. L.**, synthetic antimetabolites. Part XXX. Some *N*<sup>1</sup>-aryl-*N*<sup>4</sup>:*N*<sup>5</sup>-dialkyldiguanides and observations on the conversion of guanylthioureas into diguanides, 1645.
- Blayden, H. E., Gibson, J., and Riley, H. L.**, a study of bituminous coal by (a) exhaustive solvent extraction, and (b) X-ray diffraction, 1693.
- Bohtelsky, M., and Glasner, A.**, the oxidation of hydrobromic acid by chromic acid in the presence of manganous sulphate, 1376.
- Bourne, E. J., Donnison, G. H., Haworth, (Sir) N., and Peat, S.**, thymol and cyclohexanol as fractionating agents for starch, 1687.
- Bourne, E. J., Haworth, (Sir) N., Macey, A., and Peat, S.**, the amylolytic degradation of starch; a revision of the hypothesis of sensitisation, 924.
- Bourne, E. J., and Wiggins, L. F.**, ethylidene derivatives of sorbitol, 1933.
- Boyd, J., and Robertson, Alexander**, the chemistry of the "insoluble red" woods. Part II. A new synthesis of 4-hydroxycoumarins, 174.
- Bradfield, A. E., and Penney, (Miss) M.**, the catechins of green tea. Part II., 2249.
- Bradley, W.**, cationoid reactivity of aromatic compounds. Part VI. The direct amination of mesobenzanthrone, 1175.
- Bradley, W., and Jadhav, G. V.**, cationoid reactivity of aromatic compounds. Part VII. The composition of the dimesobenzanthronyl formed by the action of alkaline condensing agents on mesobenzanthrone. Part VIII. The action of fused potassium hydroxide on 6:6'-dimesobenzanthronyl and a note on the properties of 6- and 8-chloromesobenzanthrones, 1622, 1746.
- Braude, E. A.**, the kinetics of anionotropic rearrangement. Part VII. The simultaneous rearrangement and hydrolysis of propenylethynylcarbonyl acetate; general discussion of the mechanism of anionotropy and a comparison of the mobility of the hydroxyl and the acetoxyl group, 794.
- acidity functions. Part I. Dissociation of hydrogen chloride in, and proton affinities of, some oxygen-containing solvents, 1971.
- Braude, E. A., and Stern, E. S.**, acidity functions. Part II. The nature of hydrogen ion in some aqueous and non-aqueous solvents; the exceptional solvating properties of water, 1976.
- the kinetics of anionotropic rearrangement. Part VIII. Medium composition, acidity function, and reaction rate, 1982.
- Bridge, W., Coleman, F., and Robertson, Alexander**, constituents of "*Cortex Piscidi Erythrinae*." Part I. The structure of piscidic acid, 257.
- Briggs, L. H., and Cawley, R. W.**, diterpenes. Part I. The identity of kaurene with podocarpene, 1888.
- Briggs, L. H., Craw, (Miss) M. R., and Dacre, J. C.**, chemistry of the *Coprosma* genus. Part II. The colouring matters from *Coprosma areolata*, 568.
- Briggs, L. H., and Dacre, J. C.**, chemistry of the *Coprosma* genus. Part I. The colouring matters from *Coprosma australis*, 564.
- Briggs, L. H., Dacre, J. C., and Nicholls, G. A.**, chemistry of the *Coprosma* genus. Part III. A synthesis of areolatin and an isomer, 3:5:6:7-tetrahydroxy-2-methylanthraquinone, 990.
- Briggs, L. H., Hassall, C. H., and Taylor, W. I.**, a synthesis of leptospermone, 383.
- Briggs, L. H., and Mangan, J. L.**, *Sophora* alkaloids. Part V. The alkaloids of the seeds of a possibly new species from Anawhata, New Zealand, 1889.
- Briggs, L. H., Mangan, J. L., and Russell, W. E.**, alkaloids of New Zealand *Senecio* species. Part I. The alkaloid from *Senecio kirkii*, 1891.
- Brodrick, C. I., Peters, A. T., and Rowe, F. M.**, a reaction of certain diazosulphonates derived from  $\beta$ -naphthol-1-sulphonic acid. Part XXV. The phthalazine reaction with bases not containing a nitro-group; derivatives of 2'-chlorobenzene-2-naphthol-1-diazosulphonate, 1026.
- Brodrick, C. I.** See also **Peters, A. T.**
- Brown, B. R., and Hammick, D. L.**, a resolution of mepacrine [2-chloro-5-( $\delta$ -diethylamino- $\alpha$ -methylbutyl)amino-7-methoxyacridine], 99.
- syntheses of some asymmetric naphthalene and acenaphthene hydrocarbons, 1395.
- Brown, D. J.** See **Albert, A.**
- Brown, D. M., and Ross, W. C. J.**, the condensation of *p*-dimethylaminobenzaldehyde with 4-methylpyrimidine derivatives, 1715.
- Brown, F., Halsall, T. G., Hirst, E. L., and Jones, J. K. N.**, the structure of starch; the ratio of non-terminal to terminal groups, 27.
- Brown, F., Hirst, E. L., and Jones, J. K. N.**, the structure of almond-tree gum. Part I. The constitution of the aldobionic acid derived from the gum, 1677.
- Brown, Fred, and Mann, F. G.**, the mechanism of indole formation from phenacylarylamines. Part II. The stability and reactions of phenacyl-*N*-alkylarylamines. Part III. The conditions and mechanism of the isomerisation and indolisation of phenacylarylamines, 847, 858.
- Brown, M. B., and Kon, G. A. R.**, some heterocyclic analogues of stilbenes, 2147.
- Brown, N. C.** See **Baker, W.**
- Brown, R., and Woodward, F. N.**, new organic sulphur vesicants. Part III. Homologues of 2:2'-di-(2-chloro-ethylthio)diethyl ether, 42.
- Brownlie, I. A., Sutherland, G. B. B. M., and Todd, A. R.**, infra-red spectroscopic measurements of substituted pyrimidines. Part I. The presence of hydrogen bonding in 4-triacetyl-*d*-xylosidaminopyrimidines, 2265.
- Bruckner, V., Fodor, G., Kiss, J., and Kovács, J.**, synthesis of 6:7-diethoxy-3-methylisoquinolines, 885.
- Bruckner, V., Kovács, J., and Koczka, I.**, occurrence of betulinic acid in the bark of the plane tree, 948.
- Burton, H., and Davy, W. A.**, the synthesis of some aryl 2-thienyl sulphones and the nitration of thiophen-2-sulphonyl chloride, 525.
- the use of phenylmagnesium bromide for the preparation of phenyl aryl sulphides, sulphoxides, and sulphones, 528.
- Burton, H., and Hu, P. F.**, the synthesis of some *p*-arylsulphonylbenzaldehydes and related aldehydes and ketones, 602.
- p*-methylthiobenzenesulphonyl chloride and related compounds, 604.

- Busha, A.** See **Foster, R. T.**
- Buu-Hoi, N. P., and Royer, R.,** the application of Pfitzinger reactions to the synthesis of quinoline derivatives; a novel route to 4-hydroxyquinolines, 106.  
substitution reactions of triphenylethylene and its derivatives; a contribution to the problem of synthetic analogues of progesterone, 1078.
- Byers, A., and Hickinbottom, W. J.,** reactions of unsaturated compounds. Part V. The action of organic per-acids on  $\beta$ -diisobutylene (2:4:4-trimethylpent-2-ene). Part VI. The reaction of  $\alpha$ -diisobutylene with organic per-acids. Part VIII. The course of the oxidation of diisobutylene by chromic acid, 284, 1328, 1334.
- Byrne, G. T.,** obituary notice of, 253.
- C.
- Calderbank, K. E., and Le Fèvre, R. J. W.,** the dipole moments of benzocinnoline and benzocinnoline oxide in relation to those of *cis*-azo- and -azoxy-benzene, 1949.
- Caldwell, A. G., and Walls, L. P.,** potential trypanocides of the *N*-heterocyclic series. Part I. Phenanthridinium salts, 188.
- Campbell, A. D., Carter, C. L., and Slater, S. N.,** the preparation of some branched-chain monocarboxylic acids, 1741.
- Campbell, N., and McKail, J. E.,** the preparation of the halogenophenylacetic acids, 1251.
- Campbell, W. G., Hirst, E. L., and Jones, J. K. N.,** the  $\epsilon$ -galactan of larch wood (*Larix decidua*), 774.
- Capp, C. W., Cook, A. H., Downer, J. D., and Heilbron, (Sir) I.,** studies in the azole series. Part VIII. The interaction of  $\alpha$ -amino-nitriles and carbethoxyisothiocyanate, 1340.
- Carrington, H. C.,** the reaction between carbon disulphide and some  $\alpha$ -methylamino-nitriles, 1619.
- Carter, C. L.** See **Campbell, A. D.**
- Carter, P. R., and Hey, D. H.,** the action of chlorine on aqueous solutions of ammonium sulphates, 147.  
synthetic oestrogens of the triphenylethylene series, 150.
- Carter, P. R., Hey, D. H., and Morris, D. S.,** acyl derivatives of *p*-aminobenzenesulphonylguanidine, 143.
- Catch, J. R., Elliott, D. F., Hey, D. H., and Jones, E. R. H.,** halogenated ketones. Part I. The bromination of acetone and methyl ethyl ketone. Part III. The preparation of bromomethyl ketones by the diazomethane reaction. Part IV. The application of the Friedel-Crafts reaction to the preparation of halogenated aliphatic ketones, 272, 278.
- Catch, J. R., Hey, D. H., Jones, E. R. H., and Wilson, W.,** halogenated ketones. Part II. The bromination of methyl propyl and methyl isopropyl ketone, 276.
- Catchpole, A. G., and Hughes, E. D.,** rearrangement and substitution in anionotropic systems. Part I. Test for bimolecular isomerisation in  $\alpha$ -phenylallyl esters. Part II. Test for bimolecular rearrangement, and confirmation of the ionic mechanism of rearrangement, from product compositions in substitutions of  $\alpha$ - and  $\gamma$ -methylallyl halides, 1, 4.
- Catchpole, A. G., Hughes, E. D., and Ingold, C. K.,** rearrangement and substitution in anionotropic systems. Part III. Mechanism of, and equilibrium in, anionotropic change, 8.
- Cawley, R. W.** See **Briggs, L. H.**
- Cecil, R., and Ogston, A. G.,** the sedimentation of thymus nucleic acid in the ultracentrifuge, 1382.
- Challenger, F., and Clapham, P. H.,** derivatives of 2:4:6-trinitrotoluene: (a) the nitration of polynitrostilbenes, (b) 2-(2:4:6-trinitrophenyl)ethyl alkyl (aryl) sulphides, 1612.  
some derivatives of thionaphthen, 1615.
- Challenger, F., Miller, S. A., and Gibson, G. M.,** 2-thienyl- and 3-thienyl-thioacetic acids and their derivatives, 769.
- Challenger, F., and Simpson, (Miss) M. I.,** studies on biological methylation. Part XII. A precursor of the dimethyl sulphide evolved by *Polysiphonia fastigiata*; dimethyl-2-carboxyethylsulphonium hydroxide and its salts, 1591.
- Chapman, N. B., and Saunders, B. C.,** esters containing phosphorus. Part VI. Preparation of esters of fluorophosphonic acid by means of phosphorus oxydichlorofluoride, 1010.
- Chard, S. J.** See **Cullinane, N. M.**
- Charlish, (Mrs.) J. L., Davies, W. H., and Rose, J. D.,** reactions of  $\alpha$ -cyanoprene (1-cyanobuta-1:3-diene). Part I. Addition of nitroparaffins. Part II. Addition of reactive methylene compounds, 227, 232.
- Chatterjee, R., Cook, A. H., Heilbron, (Sir) I., and Levy, A. L.,** studies in the azole series. Part VII. A new route to  $\alpha$ -amino- $\beta$ -mercapto-acids, 1337.
- Chaudhury, D. N., Holland, R. A., and Robertson, Alexander,** syntheses of glycosides. Part XII. Fabiatriin, 1671.
- Chaudhury, D. N., King, H. I., and Robertson, Alexander,** syntheses of glycosides. Part XIII. Primulaverin, 2220.
- Childs, A. F., Goldsworthy, L. J., Harding, G. F., King, F. E., Nieham, A. W., Norris, W. L., Plant, S. G. P., Selton, B., and Tompsett, A. L. L.,** amines containing 2-halogenoethyl groups, 2174.
- Childs, A. F., and Plant, S. G. P.,** some tri- and tetra-nitro-4-methyldiphenylamines, 1993.
- Childs, A. F., Plant, S. G. P., Tompsett, A. L. L., and Weeks, G. A.,** compounds containing the 3-chloroallyl group, 2180.
- Clapham, P. H.** See **Challenger, F.**
- Clarke, J. R., Glaser, G., and Robertson, Alexander,** furano-compounds. Part VIII. The synthesis of *isovisnagin* and a partial synthesis of *visnagin*, 2260.
- Clarke, K.** See **Beer, R. J. S.**
- Clarkson, C. E., and Malkin, T.,** an X-ray and thermal examination of the glycerides. Part IX. The polymorphism of simple triglycerides, 985.
- Clemo, G. R., and Dalglish, A. F.,** the synthesis of 1:3-dihydroxyphenazine, 2318.
- Clemo, G. R., and King, T. J.,** strychnine. Part III. Some new reduction products, 1661.
- Clemo, G. R., and Swan, G. A.,** the synthesis of derivatives of 4- and 5-azaindole, 198.
- Cliffe, W. H., Curd, F. H. S., Rose, F. L., and Scott, (Miss) M.,** synthetic antimalarials. Part XXIII. 2-Arylguanidino-4-aminoalkylaminopyrimidines; further variations, 574.
- Coates, G. E., and Sutton, L. E.,** the heats of formation of the  $\text{—N=N—}$  and  $\text{>C=N—}$  bonds, 1187.
- Coleman, F.** See **Bridge, W.**
- Cook, A. H., Downer, J. D., and Heilbron, (Sir) I.,** studies in the azole series. Part VI. The interaction of  $\alpha$ -amino-nitriles and isothiocyanates. Part IX. The interaction of  $\alpha$ -amino-nitriles and alkyl isothiocyanates, 1262, 2028.
- Cook, A. H., Harris, G., and Heilbron, (Sir) I.,** studies in the azole series. Part V. A synthesis of  $\beta$ -phenylcysteine, 1060.
- Cook, A. H., Harris, G., Heilbron, (Sir) I., and Shaw, G.,** studies in the azole series. Part IV. The preparation of some thiazolones, 1060.
- Cook, A. H., Heilbron, (Sir) I., and Levy, A. L.,** studies in the azole series. Part III. The interaction of aminoacetone nitrile and carbon disulphide, 201.
- Cook, A. H., Heilbron, (Sir) I., and Stern, E. S.,** studies in the azole series. Part X. Some 5-amino-2-mercapto-4-alkylthiazoles and 2:4-dithio-5-alkylhydantoin, 2031.
- Cook, A. H.** See also **Anker, R. M., Capp, C. W., and Chatterjee, R.**
- Cook, J. W., and Philip, R.,** synthetic studies in the steroid series. Part I. Use of methyl  $\gamma$ -bromocrotonate in the synthesis of fused-ring hydroaromatic ketones, 162.
- Cook, J. W., Philip, R., and Somerville, A. R.,** azulenes. Part II. Exploration of new synthetic routes, 164.
- Cook, J. W., and Schoental, (Miss) R.,** oxidation of carcinogenic hydrocarbons by osmium tetroxide, 170.
- Cook, J. W.** See also **Badger, G. M.**
- Cooper, K. A., Dhar, M. L., Hughes, E. D., Ingold, C. K., MacNulty, B. J., and Woolf, L. I.,** mechanism of elimination reactions. Part VII. Solvent effects on rates and product-proportions in uni- and bi-molecular substitution and elimination reactions of alkyl halides and sulphonium salts in hydroxylic solvents, 2043.
- Cooper, K. A., Hughes, E. D., Ingold, C. K., and MacNulty, B. J.,** mechanism of elimination reactions. Part VI. Introduction to a group of papers; unimolecular olefin formation from *tert*-butyl- and *tert*-amyl-sulphonium salts, 2038.
- Cooper, K. A., Hughes, E. D., Ingold, C. K., Maw, G. A., and MacNulty, B. J.,** mechanism of elimination reactions. Part VIII. Temperature effects on rates and product-proportions in uni- and bi-molecular substitution and elimination reactions of alkyl halides and sulphonium salts in hydroxylic solvents, 2049.

- Cornforth, J. W.**, and **Cornforth, (Mrs.) R. H.**, studies in the series of 4-substituted quinolines, 93.
- Cornforth, J. W.**, and **Huang, H. T.**, the condensation of benzamidine with  $\alpha$ -diketones, 731.
- “dibenzamidodioxytetrol,” 1953.
- further studies of oxazoles and glyoxalines, 1960.
- experiments on a synthesis of penicillin, 1964.
- synthesis of a 4-cyano-oxazole, 1969.
- the action of hydrochloric acid on 5:5-dichloro-6-hydroxy-6-methyl-5:6-dihydrouracil, 1988.
