

# Chemical Biology Virtual Journal

[www.rsc.org/chembiolvj](http://www.rsc.org/chembiolvj)

**An easy-to-use point of access to all chemical biology literature in the RSC's publications. A selection of the primary research articles are free to access for one month following publication in an issue.**

Contents list

Issue 21

2005

## FEATURE ARTICLE

### **Fluorescence based strategies for genetic analysis**

Rohan T. Ranasinghe and Tom Brown,  
*Chem. Commun.*, 2005, (44), 5487

## COMMUNICATIONS

### **CdSe/ZnS-labeled carboxymethyl chitosan as a bioprobe for live cell imaging**

Min Xie, Hui-Hui Liu, Ping Chen, Zhi-Ling Zhang, Xiao-Hui Wang, Zhi-Xiong Xie, Yu-Min Du, Bo-Qun Pan and Dai-Wen Pang,  
*Chem. Commun.*, 2005, (44), 5518

### **Inhibition of dimethylarginine dimethylaminohydrolase (DDAH) and arginine deiminase (ADI) by pentafluorophenyl (PFP) sulfonates**

Patrick Vallance, Hannah D. Bush, B. James Mok, Ramon Hurtado-Guerrero, Herpreet Gill, Sharon Rossiter, Jonathan D. Wilden and Stephen Caddick,  
*Chem. Commun.*, 2005, (44), 5563

### **Archaeosomes based on novel synthetic tetraether-type lipids for the development of oral delivery systems**

T. Benvegna, G. Réthoré, M. Brard, W. Richter and D. Plusquellec,  
*Chem. Commun.*, 2005, (44), 5536

### **DNA-intercalation on pyrene modified surface coatings**

Stephan Laib, Alexander Krieg, Pascal Häfliger and Nikos Agorastos,  
*Chem. Commun.*, 2005, (44), 5566

### **Solid phase synthesis of a spiro[5.5]ketal library**

Stefan Sommer and Herbert Waldmann,  
*Chem. Commun.*, 2005, (45), 5684

### **Functionalized porous silicon surfaces as MALDI-MS substrates for protein identification studies**

Tadesse Z. Mengistu, Leroi DeSouza and Sylvie Morin,  
*Chem. Commun.*, 2005, (45), 5659

## PAPERS

**On chip single-cell separation and immobilization using optical tweezers and thermosensitive hydrogel**  
Fumihito Arai, Chinaik Ng, Hisataka Maruyama, Akihiko Ichikawa, Haitham El-Shimy and Toshio Fukuda,  
*Lab Chip*, 2005, **5**(12), 1399

**Cell docking inside microwells within reversibly sealed microfluidic channels for fabricating multiphenotype cell arrays**

Ali Khademhosseini, Judy Yeh, George Eng, Jeffrey Karp, Hirokazu Kaji, Jeffrey Borenstein, Omid C. Farokhzad and Robert Langer,  
*Lab Chip*, 2005, **5**(12), 1380

**Highly reproducible hybridization assay of zeptomole DNA based on adsorption of nanoparticle-bioconjugate**

Zhihong Mo, Hongli Wang, Yulong Liang, Fengwei Liu and Yongxin Xue,  
*Analyst*, 2005, **130**(12), 1589

**A novel crossed microfluidic device for the precise positioning of proteins and vesicles**

Marc R. Dusseiller, Brigitte Niederberger, Brigitte Städler, Didier Falconnet, Marcus Textor and Janos Vörös,  
*Lab Chip*, 2005, **5**(12), 1387

**Design, synthesis and evaluation of graftable thrombin inhibitors for the preparation of blood-compatible polymer materials**

Claudio Salvagnini, Catherine Michaux, Julie Remiche, Johan Wouters, Paulette Charlier and Jacqueline Marchand-Brynaert,  
*Org. Biomol. Chem.*, 2005, **3**(23), 4209

**NMR studies of interactions between periplasmic chaperones from uropathogenic *E. coli* and pilicides that interfere with chaperone function and pilus assembly**

Mattias Hedenström, Hans Emtenäs, Nils Pemberton, Veronica Åberg, Scott J. Hultgren, Jerome S. Pinkner, Viola Tegman, Fredrik Almqvist, Ingmar Sethson and Jan Kihlberg,  
*Org. Biomol. Chem.*, 2005, **3**(23), 4193

**Unusual binding ability of vancomycin towards  $\text{Cu}^{2+}$  ions**

Magdalena Świątek, Daniela Valensin, Caterina Migliorini, Ellena Gaggelli, Gianni Valensin and Małgorzata Jeżowska-Bojczuk,  
*Dalton Trans.*, 2005, (23), 3808

## APPLICATION

**Anti-tumor, -viral, and -bacterial activities of polyoxometalates for realizing an inorganic drug**

Toshihiro Yamase,  
*J. Mater. Chem.*, 2005, **15**(45), 4773

## TECHNICAL NOTE

**A lab-on-a-chip compatible bioaffinity assay method for human  $\alpha$ -fetoprotein**

Janne O. Koskinen, Niko J. Meltola, Erkki Soini and Alekski E. Soini,  
*Lab Chip*, 2005, **5**(12), 1408

# RSC Biomolecular Sciences

## New series from the RSC

### Editor-in-Chief:

Professor Stephen Neidle, *University of London, UK*

### Series Editors:

Dr Simon F Campbell

Dr Marius Clore, *National Institutes of Health, USA*

Professor David M J Lilley, *University of Dundee, UK*

The **RSC Biomolecular Sciences** series will:

- provide an authoritative insight to research at the interface between chemistry and biology
- consist of a range of research monographs, edited by high profile, international scientists working in the field
- be fully referenced to the primary literature
- consist of full colour, individual topic books

### Readership

Academic researchers, graduate students, government institutions, industry

### Market

Structural biology, drug discovery and biophysical chemistry

### Format

Hardcover

### First title in the series

#### **Biophysical and Structural Aspects of Bioenergetics**

Edited by M Wikström

**Biophysical and Structural Aspects of Bioenergetics** brings together contributions from internationally respected experts. It provides a representative snapshot of the very latest key developments in this multidisciplinary subject, with an emphasis on molecular structure, and how this changes during the bioenergetic function.

Offering a comprehensive overview of the current state of the art, and complete with extensive citations in each chapter, this book is the ideal reference for both biochemists and biophysicists studying this fascinating topic.

# ReSource

## Lighting your way through the publication process

A website designed to provide user-friendly, rapid access to an extensive range of online services for authors and referees.

ReSource enables **authors** to:

- submit manuscripts electronically
- track their manuscript through the peer review and publication process
- collect their free PDF reprints
- view the history of articles previously submitted

ReSource enables **referees** to:

- download and report on articles
- monitor outcome of articles previously reviewed
- check and update their research profile

**Register today!**

# The first textbook in the field

# NANOCHEMISTRY

## A Chemical Approach to Nanomaterials

By Geoffrey A Ozin and André C Arsenault

- Interdisciplinary and comprehensive
- Presents a basic chemical strategy for making nanomaterials
- Describes some of the principles of materials self-assembly over 'all' scales
- Demonstrates nanometre and micrometre scale building blocks
- Suggests new ways to tackle research problems
- Includes speculations on how to think about assembling the future of nanotechnology

*Nanochemistry: A Chemical Approach to Nanomaterials* is well illustrated with graphical representations of the structure and form of nanomaterials. It contains many pedagogical features and will appeal to graduate and advanced undergraduate students.

Hardcover | 0 85404 664 X | 2005 | 594 pages | £39.95 | RSC member price £25.75
