

JOURNAL OF THE CHEMICAL SOCIETY

Perkin Transactions I

Organic and Bio-organic Chemistry

CONTENTS

- 2533 Macroheterocycles. Part 42. A facile synthesis of dihydroxy cryptands and their dehydroxylation **Nikolay G. Lukyanenko** and **Anatoly S. Reder**
- 2537 Sclerophytins A and B. Isolation and structures of novel cytotoxic diterpenes from the marine coral *Sclerophyllum capitalis* **Perveen Sharma** and **Maktoob Alam**
- 2541 Purines, pyrimidines, and imidazoles. Part 64. Alkylation and acylation of some aminoimidazoles related to intermediates in purine nucleotide *de novo* and thiamine biosynthesis **Grahame Mackenzie**, **Hilary A. Wilson**, **Gordon Shaw**, and **David Ewing**
- 2547 Reaction of acetyl hypofluorite with pyrimidines. Part 3. Synthesis, stereochemistry, and properties of 5-fluoro-5,6-dihydropyrimidine nucleosides **Gerard W. M. Visser**, **Renella E. Herder**, **Paul Noordhuis**, **Oene Zwaagstra**, **Jacobus D. M. Herscheid**, and **Frans J. J. de Kanter**
- 2555 Stereo-structures of reaction products of thymidine epoxides with amines and L-amino acid ethyl esters **Takashi Harayama**, **Reiko Yanada**, **Mihoko Tanaka**, **Tooru Taga**, **Katsunosuke Machida**, **Fumio Yoneda**, and **Jean Cadet**
- 2563 Amberlyst 15, a superior, mild, and selective catalyst for carbonyl regeneration from nitrogenous derivatives **Roberto Ballini** and **Marino Petrini**
- 2567 Oligomeric flavanoids. Part 2. The first profisetinidins with dihydroflavonol constituent units **Johannes C. S. Malan**, **Desmond A. Young**, **Jacobus A. Steenkamp**, and **Daneel Ferreira**
- 2573 Lignans and related phenols. Part 18. The synthesis of quinones from podophyllotoxin and its analogues **David C. Ayres** and **Timothy J. Ritchie**
- 2579 Preparation and chemical behaviour of *exo*-methylene compounds: isoelectronic compounds of 5-methylenecyclohexa-1,3-diene **Akira Sugimoto**, **Junzo Yamano**, **Masahiro Yasueda**, and **Shigeo Yoneda**
- 2585 Synthetic studies on bicyclomycin and its analogues. Part 1. Synthesis of substituted 2-oxa-8,10-diazabicyclo[4.2.2]-decanes **Ian M. Dawson**, **Julian A. Gregory**, **Richard B. Herbert**, and **Peter G. Sammes**
- 2595 Synthesis of chrysenes and other *a*-fused phenanthrenes by a palladium(0) coupling—electrocyclic ring closure sequence **Thomas L. Gilchrist** and **Richard J. Summersell**
- 2603 Synthesis of aromatic steroids by palladium(0) coupling and electrocyclic ring closure **Thomas L. Gilchrist** and **Richard J. Summersell**
- 2607 Isolation and structures of indoloditerpenes, possible biosynthetic intermediates to the tremorgenic mycotoxin, paxilline, from *Emericella striata* **Koohei Nozawa**, **Shoichi Nakajima**, **Ken-ichi Kawai**, and **Shun-ichi Udagawa**
- 2611 Isolation and structures of novel fungal depsidones, emeguisins A, B, and C, from *Emericella unguis* **Nobuo Kawahara**, **Koohei Nozawa**, **Shoichi Nakajima**, **Ken-ichi Kawai**, and **Mikio Yamazaki**
- 2615 The reaction of *ortho*-substituted aromatic azides with boron trichloride or trifluoride **Piero Spagnolo** and **Paolo Zanirato**
- 2621 Identification of the absolute stereochemistry of D- and L-digitoxose using a chiral high-pressure liquid chromatography column **Sachiko Tsukamoto**, **Koji Hayashi**, and **Kô Kaneko**

- 2625 Studies on the constituents of Asclepiadaceae plants. Part 67. Further studies on glycosides with a novel sugar chain containing a pair of optically isomeric sugars, D- and L-cymarose, from *Cynanchum africanum* **Sachiko Tsukamoto, Koji Hayashi, Kô Kaneko, Hiroshi Mitsuhashi, Friedrich O. Snyckers, and Theunis G. Fourie**
- 2633 Synthesis of erivanin and 1-epierivanin from 1-(α)-santonin **Ravi S. Harapanhalli**
- 2639 Alkylation studies of 5-*exo*-methylene substituted isoxazolidines **Albert Padwa, Stephen P. Carter, Ugo Chiacchio, Donald N. Kline, and John Perumattam**
- 2647 Endoannular interactions in cysteine-containing cyclotriptides: one-step synthesis and crystal structure of a tetracyclic aza-cyclol **Giancarlo Zanotti, Francesco Pinnen, Gino Lucente, Silvio Cerrini, and Enrico Gavuzzo**
- 2653 Photochemistry of 5-methylpyrimidin-4-ones in acetic acid solution: thermal rearrangements of Dewar pyrimidinones and 4-acetoxiazetid-2-ones **Tamiko Takahashi, Shun-ichi Hirokami, Masanori Nagata, and Takao Yamazaki**
- 2663 A stereocontrolled approach to electrophilic epoxides **Otto Meth-Cohn, Clive Moore, and Heinrich C. Taljaard**
- 2675 Synthetic studies on antibiotic validamycins. Part 12. Total synthesis of (+)-validamycin B and (+)-validoxylamine B **Seiichiro Ogawa, Yasunobu Miyamoto, and Taisuke Nose**
- 2681 Stereochemical features of the anomerizations in the 5,6-dihydrothymine nucleoside series **Jasenka Matulić-Adamić, Maja Pavela-Vrančić, and Vinko Škarić**

AUTHOR INDEX

- Alam, Maktoob, 2537
Ayles, David C., 2573
Ballini, Roberto, 2563
Cadet, Jean, 2555
Carter, Stephen P., 2639
Cerrini, Silvio, 2647
Chiacchio, Ugo, 2639
Dawson, Ian M., 2585

Zwaagstra, Oene, 2547

Perkin Communications

Communications will be published in *Perkin Transactions I* from the beginning of 1989. These will consist of preliminary accounts of novel and significant work of exceptional interest in any branch of organic, bio-organic, or physical organic chemistry. Material of wide general appeal is more appropriately submitted to *Chemical Communications*; *Perkin Communications* are intended for work of a more specialist nature. Where relevant, typical experimental data will be included; otherwise the principles governing acceptance are essentially the same as for *Chemical Communications*. Where appropriate, authors should provide corroborative material not for publication as supplementary information for referees. Full papers based upon communications will be acceptable subsequently provided that they represent a substantial amplification and extension of the original material.

Individual articles should be as brief as possible [normally less than 1 200 words (*ca.* 2 printed pages) or the equivalent]. The summary should be restricted to one sentence only. Otherwise, the format and style of presentation should be the same as for a full paper.

Times to publication will be similar to those for *Chemical Communications*. In order to achieve this, failure of an author to produce a revised script in response to referees' comments within 4 weeks will be regarded as a withdrawal of the communication. Furthermore, proof corrections received more than 2 weeks after despatch of proofs by the printer will not be incorporated.

NOTE: An asterisk in the heading of each paper indicates the author who is to receive any correspondence.
