## Use of Structure Diagrams produced with ChemDraw

The Society's Publications Production Department is now using the computer program ChemDraw to produce chemical structure diagrams, reaction schemes *etc.* for publication in the primary journals. Authors who use this program to produce diagrams for inclusion in submitted manuscripts are asked to take note of the settings given below, which are those employed by RSC production staff. It may be possible to make direct use of diagrams prepared according to these standards and submitted to us as laser printer output on good quality white paper. Single column (8.3 × 22.8 cm) layout is preferred, for flexibility; however, double column (17.1 × 22.8 cm) is acceptable.
