

The American Chemical Society Presents  
The New, Unifying Bimonthly Journal of Conjugation Chemistry

# Bioconjugate Chemistry

**Editor:** Claude F. Meares  
Dept. of Chemistry, Univ. of California, Davis  
Davis, CA 95616 (916/752-3360)

**Associate Editor:** Paul S. Miller  
Sch. Hygiene/Pub. Health, Dept. Biochem.,  
The Johns Hopkins University

## Centralized Access Is Here!

Featuring highly technical, primary literature in biomedically related R&D, *Bioconjugate Chemistry* centralizes information previously published in some 200 different scholarly journals. It brings together—in one source—research forming the core of breakthroughs in biotechnology from universities, research institutes, biomedical firms, drug companies, and chemical laboratories.

Specifically, *Bioconjugate Chemistry* addresses the joining of two different molecular functions by chemical or biological means. No other journal has this unique, topical focus:

Conjugation of . . .  
antibodies (and their fragments)  
nucleic acids and their analogues ( $\alpha$ -anomers, phosphonates, . . .)  
liposomal components  
other biologically active molecules (receptor-binding proteins, hormones, peptides, . . .)

with each other or with any molecular groups that add useful properties . . .  
drugs, radionuclides, toxins, fluorophores, photoprobes, inhibitors, enzymes, haptens, ligands, etc.

In bimonthly issues you'll explore the chemical aspects of conjugate preparation and characterization, including:

- *In vivo* applications of conjugate methodology;
- Molecular biological aspects of antibodies, genetically engineered fragments, and other immunochemicals;
- The relationships between conjugation chemistry and the biological properties of conjugates.

## Guided by a "Who's Who" In the Field
