

JOURNAL OF THE CHEMICAL SOCIETY

Perkin Transactions 1

Organic and Bio-organic Chemistry

CONTENTS

- iv Report on the Perkin Journals for the period January 1990–December 1990
- 243 Tetracyclic triterpenes. Part 13. A new synthesis of 4 β -demethyl-24,25-dihydrolanosterol **Zdzisław Paryzek** and **Jacek Martynow**
- 249 2-Diazo-1,3-dimesityl-2*H*-indene and 1,3-dimesitylisoindenylidene **David W. Jones** and **Alan Pomfret**
- 255 Pseudomonic acid biosynthesis. The putative role of 3-hydroxy-3-methylglutarate **Peter G. Mantle** and **Katharine M. Macgeorge**
- 259 Quinoline alkaloids. Part 27. Synthesis of the *Ptelea* alkaloids pteleflorine, neohydroxylunine, *O*-methylhydroxyluninium salt and hydroxylunine **Charles F. Neville**, **Michael F. Grundon**, **Venkat N. Ramachandran** and **Johannes Reisch**
- 263 An isolable but highly reactive *o*-quinodimethane; 1,1a,2,3,4,4a-hexahydro-9,10-diphenyl-1,4-methanoanthracene **David W. Jones** and **Alan Pomfret**
- 269 Reaction of benzeneselenenyl halides with estrogens **Hasrat Ali** and **Johan E. van Lier**
- 273 The influence of A^{1,3} steric interactions on the conformational features of benzo[*g*]pyridazino[1,2-*b*]phthalazine-6,13-dione derivatives **M. Carmen Cano**, **Fernando Gómez-Contreras** and **Manuel Lora-Tamayo**
- 279 Synthesis of *ara*-3,7-dideazaadenosine and related pyrrolo[3,2-*c*]pyridine D-arabinofuranosides **Werner Bourgeois** and **Frank Seela**
- 285 Novel fused bicyclic sulphur compounds **Paul A. Delaney**, **Robert A. W. Johnstone**, **Paul A. Leonard** and **Peter Regan**
- 291 Stages in the biosynthesis of the epoxy lactol side chain of nic-1, insect antifeedant steroid of *Nicandra physaloides* **Warren Andrews-Smith**, **Harjit K. Gill**, **Roland W. Smith** and **Donald A. Whiting**
- 297 A simple and unambiguous synthesis of α,α - and α,α' -dihalogeno ketones **José Barluenga**, **Luján Llavona**, **José M. Concellón** and **Miguel Yus**
- 301 Organic heterocyclothiazenes. Part 14. Aminotrithiadiazepines and trithiadiazepyne **M. John Plater** and **Charles W. Rees**
- 311 Organic heterocyclothiazenes. Part 15. Pyrazolotrithiadiazepines and their rearrangement to 1,2,3-dithiazoles **M. John Plater** and **Charles W. Rees**
- 317 Organic heterocyclothiazenes. Part 16. Reactions of trithiadiazepyne with cyclopentadienones. Some stable norbornadienones **M. John Plater** and **Charles W. Rees**
- 323 Generation and reactions of *N*-(α -lithioalkyl)tetrazoles **Christopher J. Moody**, **Charles W. Rees** and **Richard G. Young**
- 329 Synthesis of 3-phenylpyrazoles from 2-alkenyl-5-phenyltetrazoles **Christopher J. Moody**, **Charles W. Rees** and **Richard G. Young**
- 335 Synthesis and properties of 4*H*-imidazoles. Part 2 **Christopher J. Moody**, **Charles W. Rees** and **Richard G. Young**
- 341 Synthesis and reactions of β -enamino phosphonium salts. Preparation of 2-vinyl-1-aza-1,3-dienes and penta-1,4-dien-3-ones **José Barluenga**, **Isabel Merino** and **Francisco Palacios**
- 347 Photochemical δ -hydrogen abstraction from acyclic and semicyclic monothioimides **Masami Sakamoto**, **Masakazu Tohnishi**, **Tsutomu Fujita** and **Shoji Watanabe**
- 353 Regiochemistry of radical cyclisations (6-*exo*/7-*endo* and 7-*exo*/8-*endo*) of *N*-(*o*-alkenylphenyl)-2,2-dichloroacetamides **Tatsunori Sato**, **Satoshi Ishida**, **Hiroyuki Ishibashi** and **Masazumi Ikeda**

- 361 Regio- and enantio-selectivity of the cytosolic epoxide hydrolase-catalysed hydrolysis of racemic monosubstituted alkyloxiranes **Giuseppe Bellucci, Cinzia Chiappe, Franco Marioni and Massimiliano Benetti**
- 365 Biosynthesis of natural products with a P-C bond. Part 6. Preparation of deuterium- and carbon-13-labelled L-alanyl- and L-alanyl-L-alanyl-(2-aminoethyl)phosphonic acids and their use in biosynthetic studies of fosfomycin in *Streptomyces fradiae* **Friedrich Hammerschmidt, Hanspeter Kählig and Norbert Müller**
- 371 New synthesis of catalpalactone **Mahendra D. Chordia and Nurani S. Narasimhan**
- 377 Gas-phase rearrangement and cyclisation reactions of 2-benzylphenylaminy radicals and related 2-hetero-analogues **J. I. G. Cadogan, Clare L. Hickson, H. Susan Hutchison and Hamish McNab**
- 385 Gas-phase reactions of 2-benzyl- and 2-benzoyl-phenoxy radicals, and of 2-phenoxybenzyl radicals: examples of new hydrogen-transfer processes **J. I. G. Cadogan, H. Susan Hutchison and Hamish McNab**
- 395 Photochemical oxa-di- π -methane rearrangement approach to [3.3.3]propellanes. Total synthesis of sesquiterpene hydrocarbon (\pm)-modhephene **Goverdhan Mehta and Duvvuri Subrahmanyam**
- 403 Thietane-fused β -lactams *via* photochemical cycloaddition reaction of N-(α,β -unsaturated carbonyl)thioamides **Masami Sakamoto, Tohru Yanase, Tsutomu Fujita, Shoji Watanabe, Hiromu Aoyama and Yoshimori Omote**
- 409 The synthesis of 5- and 6-substituted quinuclidine-3-carboxylic esters: intermediates for novel muscarinic ligands **Roger J. Snow, Raymond Baker, Richard H. Herbert, Ian J. Hunt, Kevin J. Merchant and John Saunders**
- 421 Synthesis and properties of a novel 1-pyrroline fatty ester derivative from methyl isoricinoleate **Marcel S. F. Lie Ken Jie and M. S. K. Syed-Rahmatullah**
- 425 Structure of two new sesquiterpenoid insect antifeedants from *Celastrus rosthornianus* **Yong Q. Tu**
- 429 Synthesis of α -substituted allyl- and homoallyl-stannanes by selenoxide elimination **Vincent J. Jephcote and Eric J. Thomas**
- 435 Studies on the liverwort sesquiterpene alcohol tamariscol. Synthesis and absolute configuration **Motoo Tori, Masakazu Sono, Yukiko Nishigaki, Katsuyuki Nakashima and Yoshinori Asakawa**
- 447 Synthesis and relative structure of conocephalenol, a sesquiterpene alcohol isolated from the European liverwort *Conocephalum conicum* **Motoo Tori, Masakazu Sono, Katsuyuki Nakashima, Yoko Nakaki and Yoshinori Asakawa**
- 451 Transformation of cyclic α -phenylthio aldehydes by stereoselective aldol reactions and phenylthio migration into spirocyclic lactones and ethers, and *E*-allylic alcohols with 1,4-related chiral centres **Varinder K. Aggarwal, Iain Coldham, Sara McIntyre and Stuart Warren**
- 461 Some photoproducts from the photochemical cycloaddition reactions between acrylonitrile and 1-methyl-, 2-methyl- and 2,6-dimethyl-naphthalenes **John J. McCullough, T. Brian McMurry and D. Neil Work**
- 465 Generation and reactions of 2-alkoxydiphenylcarbenes in fluid solution and rigid matrices **Hideo Tomioka, Keisaku Nakanishi and Yasuji Izawa**
- 471 Buttressing effect in carbene chemistry. Effect of 3-alkyl groups on the reactions of 2-alkoxydiphenylcarbenes **Hideo Tomioka, Kohji Kimoto, Hiroshi Murata and Yasuji Izawa**
- 479 Novel borane-selenium complex: highly selective reduction of tertiary amides and nitriles to the corresponding amines with sodium borohydride-dialkylselenium dibromide **Sadatoshi Akabori and Yoshinori Takanohashi**

Perkin Communications

- 483 5-Substituted bicyclo[3.2.0]hept-2-en-6-ones: synthesis and ring-opening reactions **Holger Butenschön**
- 484 Electrophilic substitution of a 2-azabicyclo[2.2.1]hept-5-en-3-one as a potential route to 3-deoxycarbocyclic nucleosides **Christopher F. Palmer, Keith P. Parry and Stanley M. Roberts**
- 487 A novel synthesis of β -perfluoroalkylated α,β -unsaturated nitriles **Yanchang Shen and Tielin Wang**
- 488 A regiospecific rearrangement of 4(5)-substituted 2-phenacylthio-1*H*-imidazoles to 4-substituted 2-mercapto-1-phenacyl-1*H*-imidazoles **Jiban K. Chakrabarti and Colin W. Smith**
- 490 Enantioselective synthesis of the lactone moiety of the mevinic acids using D-xylose as a chiral precursor **Roberto Ballini, Enrico Marcantoni and Marino Petrini**
- 491 An improved procedure for regioselective acylation of carbohydrates: novel enzymatic acylation of α -D-glucopyranose and methyl α -D-glucopyranoside **Vicente Gotor and Rosalino Pulido**

NOTE: An asterisk in the heading of each paper indicates the author who is to receive any correspondence.

Report on the Perkin Journals for the period January 1990–December 1990

In response to a number of requests we would like to present some of the factual data relating to the performance of the Perkin Journals during 1990.

The time taken for an article to appear in print from when the

script arrives in the Editorial Office has fallen quite dramatically over the twelve-month period (Fig. 1). t_{50} now standing at *ca.* 200 days for full papers (t_{50} is the time taken for 50% of the papers in an issue to be published). The backlog of papers that

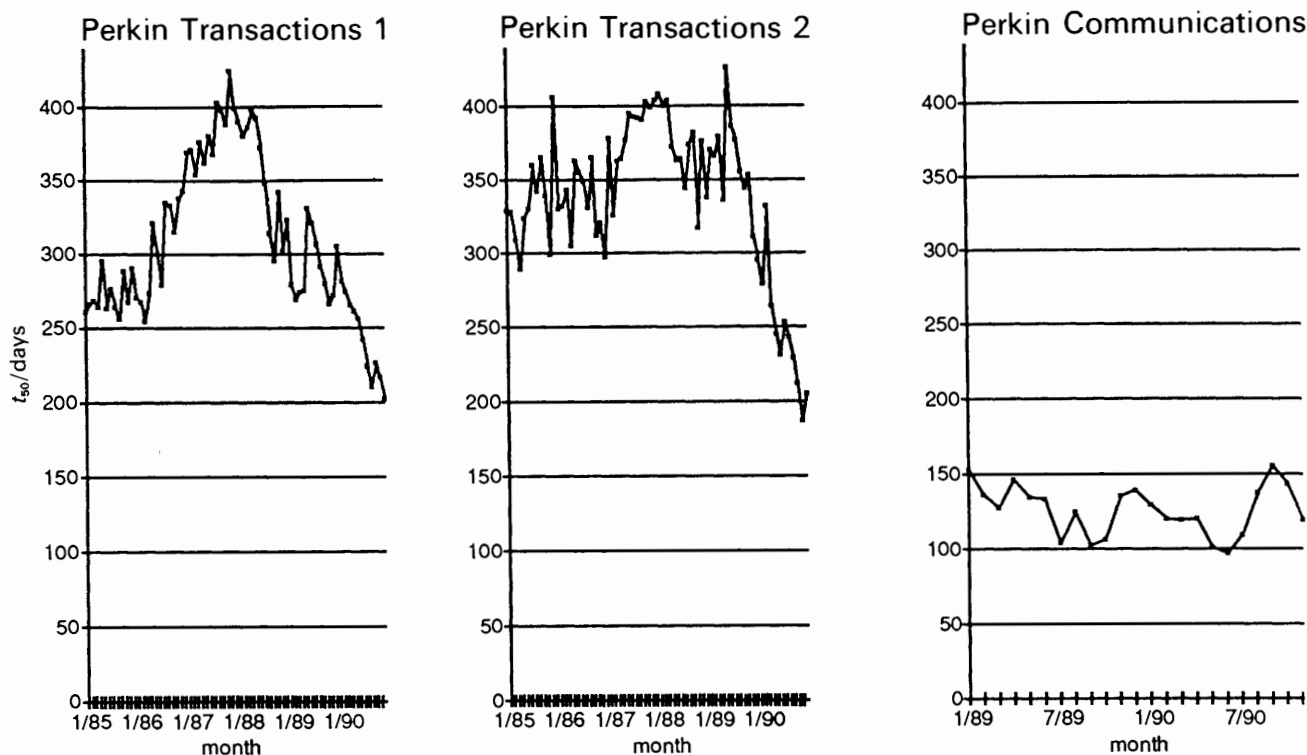

Fig. 1 Times from receipt to publication of papers and communications in *Perkin Transactions* since 1985 (1989 for communications)

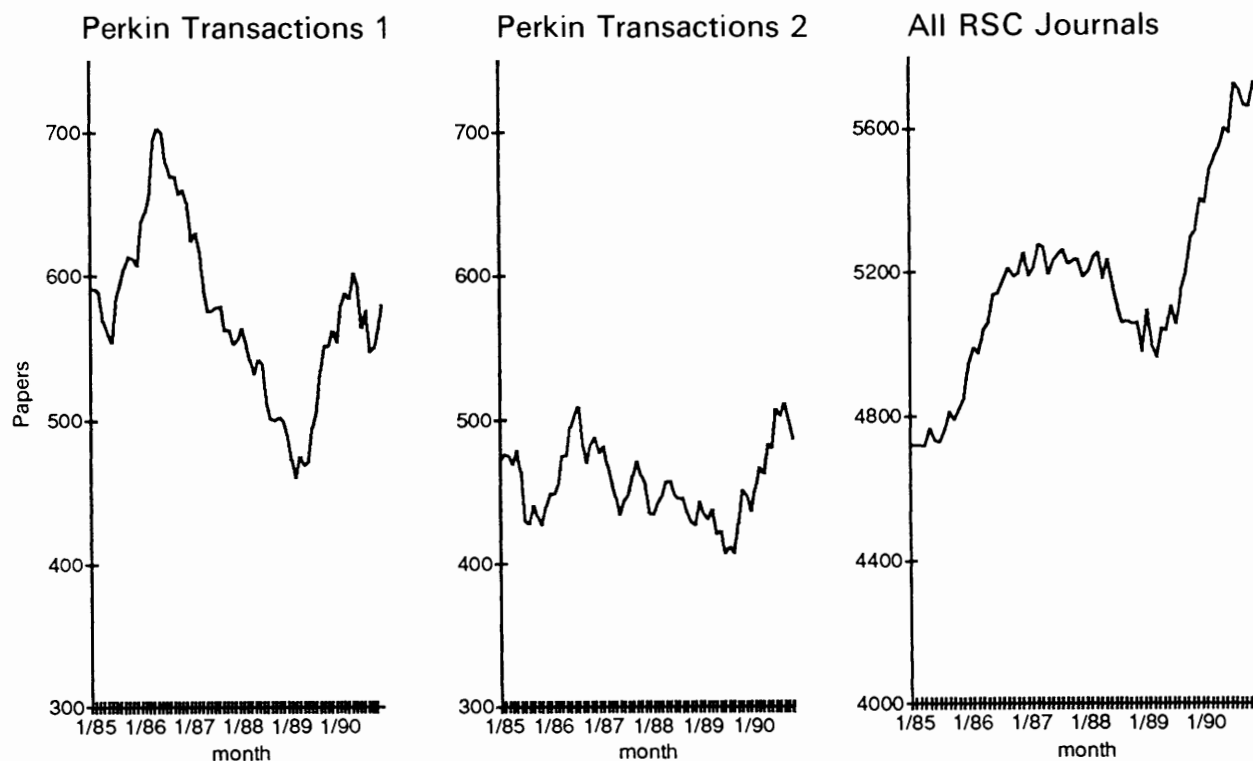

Fig. 2 Rolling annual submissions of papers to *Perkin Transactions 1*, *Perkin Transactions 2* and all RSC journals, from 1985. Each point represents a year's intake

built up as a result of the relocation of the Journals Department from the Editorial Office in London to Thomas Graham House in Cambridge has been cleared. We expect that, from now on, papers that require little or no revision should appear in the Journal 5–6 months after receipt. Obviously the high quality of the presentation of the material will be maintained while we endeavour to reduce ‘times to publication’ still further.

The decrease in the time taken to publish full papers has contributed to two noteworthy trends. First, the number of full papers received by the office has increased (Fig. 2). It is interesting to note that 1232 papers were processed by the Perkin Editorial staff in the period 1989–1990 and that a total of 5588 pages were published. Secondly, the quality of the papers that have been published in the Journals has markedly improved.

The improvement in the quality of the published papers can be attributed, to some extent, to the fact that stricter refereeing standards have been introduced, with a consequent rise in the rejection rate in recent months. We have attempted to increase the uniformity of refereeing standards by establishing a panel of referees (*ca.* 80 persons), which carries out more than half the refereeing duties.

Submissions to Perkin Communications numbered 148 last year. The rapid (*ca.* 120 days) publication of these short articles provides a means for new work of principal interest to organic chemists to be published without delay.

We are committed to a continuing process of development of systems and techniques that will be useful to authors. Over the past year we have encouraged authors to send disks of formulae relevant to their papers, so that the original artwork can be used in the finished article. We are in the process of investigating the opportunities for taking text *and* formulae from a computer disk directly into print. We may be able to offer this service to authors in the not-too-distant future.

In short, we believe that it has been a highly successful year for *Perkin Transactions* and we look forward to an equally successful 1991 for Britain’s premier organic chemistry journals.

Professor Stanley M. Roberts
Chairman, Perkin Editorial Board
Dr. Sheila R. Buxton
Editorial Manager
