

Journal of Chemical Research, Issue 9, 1992

Other papers in the subject areas covered by *J. Chem. Soc.* are published in synopsis/microform format in *J. Chem. Research*. For the benefit of readers of *J. Chem. Soc.*, the contents list of *J. Chem. Research (S)*, Issue 9, is reproduced below.

- 291 Formation of Pyrazol-3-ylacetohydrazides by Reaction of Methyl 3-Hydroxythiophene-2-carboxylates with Hydrazine Hydrate
(M 2383) **John M. Barker, Patrick R. Huddleston and Michael L. Wood**
- 292 Failure in Several Attempts to prepare Arylsilyllithium Reagents by the Gilman Cleavage of Disilanes with Lithium **Noorsaadah Abd. Rahman, Ian Fleming and Anna B. Zwicky**
(M 2401)
- 293 Spiro Naphthoxazine Derivatives of Furanose Sugars **Jean M. J. Tronchet, Maria Koufaki, Guido Zosimo-Landolfo and Gérald Bernardinelli**
(M 2501)
- 294 A New Application of Friedel-Crafts Acylation for the Synthesis of Trinuclear Compounds **Shashi B. Mahato, Peter Luger and Manuela Weber**
(M 2301)
- 296 Structural Studies on 2-Pyridyl Complexes of the Platinum Triad Metals. The Crystal and Molecular Structures of *trans*-[PtCl(C₅H₄N-C²)(PMe₂Ph)₂] and of its *N*-Protonated and *N*-Chloromethylated Derivatives **Bruno Crociani, Francesca Di Bianca, Franco Benetollo and Gabriella Bombieri**
(M 2316)
- 298 Prokaryotic Triterpenoids of the Hopane Series. Bacteriohopanetetrols of New Side-chain Configuration from *Acetobacter* Species **Beate Peiseler and Michel Rohmer**
(M 2353)
- 300 Synthesis of Some Mononuclear and Dinuclear Copper(II) Complexes of Symmetrical or Unsymmetrical Schiff Base Ligands **Bhavna M. Trivedi and Pabitra Krishna Bhattacharya**
(M 2370)
- 302 Enamine Chemistry. Part 39. Multipath Reaction of Methyl Vinyl Ketone with Dienamines of 5-Oxo- $\Delta^{1,8a}$ -2-octalones, 1,2,3,6,7,8a-Hexahydroinden-5-one and Isophorone **Peter W. Hickmott and Richard Simpson**
(M 2447)
- 304 Enamine Chemistry. Part 40. Reaction of Phenyl Vinyl Ketone with Dienamines of $\Delta^{1,8a}$ -2-Octalones **Peter W. Hickmott and Richard Simpson**
(M 2476)
- 306 Homolytic Displacement at Saturated Carbon: Part 5. Synthesis of Cyclopropylmethyl, Bicyclo[3.1.0]hept-2-yl, Bicyclo[4.1.0]hept-2-yl and Cyclohexanespirocycloprop-2-yl Sulfones from the Corresponding But-3-enylcobaloximes **B. Dass Gupta, Indira Das and Vandana Dixit**
(M 2409)
- 308 Aromatic Ring Cleavage in 6-Methoxyquinolines and 2-Methoxynaphthalene with Fuming Nitric Acid **Piotr Balczewski, Gareth A. Morris and John A. Joule**
(M 2514)
- 309 Hofmann Eliminations of Some Tetrahydropyridines: Stereoselective Synthesis of Penta-2,4-dienylamines **Achintya K. Sarkar and Nabanita Sarkar**
(—)
- 310 A Formal Total Synthesis of (\pm)-Cuahtemone **Ajoy K. Banerjee, Nieves Canudas-González and Migdalia Corredor de Sepúlveda**
(—)
- 312 Spectral Properties of Benzothiazolyl[*n*.2]metacyclophanes **Akihiko Tsuge, Tsutomu Ishii, Shuntaro Mataka and Masashi Tashiro**
(—)
- 314 2-Fluoro-2-phenylacetic Acid. Part 6. Fluorine-19 Nuclear Magnetic Resonance Study of its Dipeptide Derivatives **Michelle Keramidas and Sylvain Hamman**
(—)
- 316 Kinetics of Electron Transfer between Dodecatungstocobaltate(III) and Vanadyl Ion in Acidic Medium **Mahammad Ali, Sumana Gangopadhyay and Pradyot Banerjee**
(—)

N.B. The numbers in parentheses, prefaced by *M*, indicate the first frame occupied by the *full-text version* of the paper in *J. Chem. Research (M)*. Where no such number is given, the paper as published in *J. Chem. Research (S)* is complete in itself, and there is no extra material in Part *M*.

ROYAL SOCIETY OF CHEMISTRY

IMPORTANT ORGANIC CHEMISTRY BOOK

100 Modern Reagents

Consulting Editor:

Dr N.S. Simpkins

University of Nottingham

1st Reprint 1992

The challenge of carrying out highly selective chemical transformations on ever more complex molecules has resulted in the development of a vast armoury of organic reagents. This book brings together a selection of 100 reagents which have found significant application in organic synthesis.

100 Modern Reagents features less familiar reagents which have been identified in *Methods in Organic Synthesis* during a five year period. The selection reflects reagents which have found widespread use, with emphasis on those which allow important transformations or which show interesting and varied reactivity.

The book includes the following data on each reagent listed:

- ★ name
- ★ molecular formula
- ★ physical properties
- ★ price range
- ★ structure
- ★ molecular weight
- ★ preparation and modifications
- ★ safety precautions needed

The reagents are arranged in alphabetical order and cover two pages each, with the second page providing three reaction schemes highlighting the uses of the reagent.

Softcover 210 pages

ISBN 0 85186 893 2 (1989)

Price £24.00

Services

To Order, Please write to the:

Royal Society of Chemistry, Turpin Distribution Services Limited, Blackhorse Road, Letchworth, Herts SG6 1HN, United Kingdom.
or telephone (0462) 672555 quoting your credit card details. We accept Access/Visa/MasterCard/Eurocard.

Turpin Distribution Services Limited is wholly owned by the Royal Society of Chemistry.

For information on other books and journals, please write to:

Royal Society of Chemistry, Sales and Promotion Department, Thomas Graham House, Science Park, Milton Road, Cambridge CB4 4WF, United Kingdom.

RSC Members should obtain members prices and order from :

The Membership Affairs Department at the Cambridge address above.

The American Chemical Society Presents
The New, Unifying Bimonthly Journal of Conjugation Chemistry

Bioconjugate Chemistry

Editor: Claude F. Meares
Dept. of Chemistry, Univ. of California, Davis
Davis, CA 95616 (916/752-3360)

Associate Editor: Paul S. Miller
Sch. Hygiene/Pub. Health, Div. of Biophysics
The Johns Hopkins Univ.

Centralized Access Is Here!

Featuring highly technical, primary literature in biomedically related R&D, *Bioconjugate Chemistry* centralizes information previously published in some 200 different scholarly journals. It brings together—in one source—research forming the core of breakthroughs in biotechnology from universities, research institutes, biomedical firms, drug companies, and chemical laboratories.

Specifically, *Bioconjugate Chemistry* addresses the joining of two different molecular functions by chemical or biological means. No other journal has this unique, topical focus:

Conjugation of . . .

antibodies (and their fragments)
nucleic acids and their analogues (α -anomers, phosphonates, . . .)
liposomal components
other biologically active molecules (receptor-binding proteins, hormones, peptides, . . .)

with each other or with any molecular groups that add useful properties . . .

drugs, radionuclides, toxins, fluorophores, photoprobes, inhibitors, enzymes, haptens, ligands, etc.

In bimonthly issues you'll explore the chemical aspects of conjugate preparation and characterization, including:

- *In vivo* applications of conjugate methodology;
- Molecular biological aspects of antibodies, genetically engineered fragments, and other immunochemicals;
- The relationships between conjugation chemistry and the biological properties of conjugates.

Keep current with the latest research findings in the field...

Biochemistry

Featuring the results of original research in all areas of biochemistry, the weekly journal **Biochemistry** publishes peer-reviewed research of the highest caliber. Of special interest to subscribers is the accelerated publication given to manuscripts of exceptional and immediate significance.

Emphasis is given to the rapidly changing arena where chemistry, biochemistry, and molecular and cell biology interrelate. You'll receive international coverage, including structure, function, and regulation of:

- ◆ proteins ◆ enzymes ◆ receptors
- ◆ carbohydrates ◆ lipids & nucleic acids
- ◆ gene structure & expression ◆ biosynthesis
- ◆ viruses and immunochemistry
- ◆ membrane structure & function
- ◆ x-ray crystallography

Subscribe now to **Biochemistry**—and stay on top of the most current research available in the field today!
