The above paper should be modified as follows:

Synthesis of 1,2-Dihydroisoquinoline-3-carbaldehydes

Manfred Schlosser† and Gyula Simig

Institut de Chimie Organique de l'Université, Rue de la Barre 2, 1005 Lausanne, Switzerland

ortho-Formylation of *N*-(2,2-diethoxyethyl)benzylamines followed by acid-catalysed cyclisation leads to 1,2-dihydroisoquinoline-3-carbaldehydes
