

The SmithKline Beecham Research Symposium

**ORGANOMETALLIC REAGENTS
IN ORGANIC SYNTHESIS**

25TH-26TH MARCH 1993

ROBINSON COLLEGE, CAMBRIDGE, UK

The Symposium will be wide-ranging, subsuming all topics relating to the assembly of molecules which involve organometallic reagents and metallo intermediates. These will include:

The synthesis of natural products and biomolecules

Synthetic methodology

Enantioselectivity and stereocontrol

Aspects of molecular recognition

The Speakers include:

PROFESSOR J-E BACKVALL

University of Uppsala

PROFESSOR D A EVANS

Harvard University

PROFESSOR B GIESE

University of Basel

PROFESSOR P KOZIENSKI

University of Southampton

PROFESSOR J-M LEHN

University Louis Pasteur, Strasbourg

PROFESSOR P D MAGNUS, FRs

University of Texas at Austin

PROFESSOR I E MARKO

University of Louvain

DR W B MOTHERWELL

Imperial College

PROFESSOR W OPPOLZER

University of Geneva

PROFESSOR L E OYERMAN

University of California at Irvine

PROFESSOR G E PATTENDEN, FRs

University of Nottingham

POSTER SESSION:

Posters are invited from participants and abstracts will be published in the Conference Proceedings. Closing date for the receipt of abstracts is 29th January 1993.

REGISTRATION:

The registration fee of £250.00 (£100.00 for registered under-graduate and graduate students) includes welcome buffet, conference dinner and all other meals, accommodation for two nights in Robinson College and a copy of the Symposium Proceedings.

REGISTRATION DETAILS ARE AVAILABLE FROM:

Miss S. Luker

SmithKline Beecham Pharmaceuticals,

The Frythe, Welwyn, Hertfordshire

AL6 9AR, UK

Telephone (0438) 782056

Facsimile (0438) 782580

ORGANISING COMMITTEE:

J H Bateson, B K Leigh, M B Mitchell

For an international, molecular focus
on the toxicological effects of chemical agents

Chemical Research in Toxicology

Published bimonthly by the American Chemical Society

Editor: Lawrence J. Marnett
Department of Biochemistry & Center for Molecular Toxicology
School of Medicine
Vanderbilt University
Nashville, TN 37232
(615) 343-7328

Associate Editors: Frederick P. Guengerich
Vanderbilt University

Paul F. Hollenberg
Wayne State University

In primary research reports,
Chemical Research in Toxicology
covers:

- Structure elucidation of novel toxic agents;
- Chemical and physical studies on chemical agents that provide insight into their mode or mechanism of action;
- Experimental and theoretical investigations of the interaction of toxic chemicals with biological macromolecules and other biological targets;
- A range of topics which includes toxicity, teratogenicity, mutagenicity, carcinogenicity, neurotoxicity, and immunotoxicity.

1992 Subscription Information

Chemical Research in Toxicology is published by the American Chemical Society. One volume per year.
Volume 5 1992 ISSN 0893-228X

To FAX your order call (614) 447-3671.

For nonmember rates in Japan, contact Maruzen Co., Ltd. This publication is available on microfilm, microfiche, and online through CJO on STN International.

Guided by an esteemed, international editorial advisory board, *Chemical Research in Toxicology* delivers peer-reviewed articles and invited reviews, communications and perspectives, such as these:

- **A Metabolically Competent Human Cell Line Expressing Five cDNAs Encoding Procarcinogen-Activating Enzymes: Application to Mutagenicity Testing.** C.L. Crespie, F.J. Gonzalez, D.T. Steimel, T.R. Turner, H.V. Gelvoine, B.W. Penman, and R. Langenbach.
- **Carbamoylation of Peptides and Proteins In Vitro by S-(N-Methylcarbamoyl) glutathione and S-(N-Methylcarbamoyl) cysteine, Two Electrophilic S-Linked Conjugates of Methyl Isocyanate.** P.G. Pearson, J.G. Slatter, M.S. Rashed, D.-H. Han, and T.A. Billie.
- **Identification of Epoxide- and Quinone-Derived Bromobenzene Adducts to Protein Sulfur Nucleophiles.** D.E. Slaughter and R.P. Hanzlik.
- **Mass Spectrometric Analysis of Tobacco-Specific Nitrosamine-DNA Adducts in Smokers and Nonsmokers.** P.G. Foiles, S.A. Akerkar, S.G. Carmella, M. Kagan, G.D. Stoner, J.H. Resau, and S.S. Hecht.

Keep current with the latest research findings in the field...

Biochemistry

Featuring the results of original research in all areas of biochemistry, the weekly journal **Biochemistry** publishes peer-reviewed research of the highest caliber. Of special interest to subscribers is the accelerated publication given to manuscripts of exceptional and immediate significance.

Emphasis is given to the rapidly changing arena where chemistry, biochemistry, and molecular and cell biology interrelate. You'll receive international coverage, including structure, function, and regulation of:

- ◆ proteins ◆ enzymes ◆ receptors
- ◆ carbohydrates ◆ lipids & nucleic acids
- ◆ gene structure & expression ◆ biosynthesis
- ◆ viruses and immunochemistry
- ◆ membrane structure & function
- ◆ x-ray crystallography

Subscribe now to **Biochemistry**—and stay on top of the most current research available in the field today!

The American Chemical Society Presents
The New, Unifying Bimonthly Journal of Conjugation Chemistry

Bioconjugate Chemistry

Editor: Claude F. Meares
Dept. of Chemistry, Univ. of California, Davis
Davis, CA 95616 (916/752-3360)

Associate Editor: Paul S. Miller
Sch. Hygiene/Pub. Health, Div. of Biophysics
The Johns Hopkins Univ.

Centralized Access Is Here!

Featuring highly technical, primary literature in biomedically related R&D, *Bioconjugate Chemistry* centralizes information previously published in some 200 different scholarly journals. It brings together—in one source—research forming the core of breakthroughs in biotechnology from universities, research institutes, biomedical firms, drug companies, and chemical laboratories.

Specifically, *Bioconjugate Chemistry* addresses the joining of two different molecular functions by chemical or biological means. No other journal has this unique, topical focus:

Conjugation of . . .

antibodies (and their fragments)
nucleic acids and their analogues (α -anomers, phosphonates, . . .)
liposomal components
other biologically active molecules (receptor-binding proteins, hormones, peptides, . . .)

with each other or with any molecular groups that add useful properties . . .

drugs, radionuclides, toxins, fluorophores, photoprobes, inhibitors, enzymes, haptens, ligands, etc.

In bimonthly issues you'll explore the chemical aspects of conjugate preparation and characterization, including:

- *In vivo* applications of conjugate methodology;
- Molecular biological aspects of antibodies, genetically engineered fragments, and other immunochemicals;
- The relationships between conjugation chemistry and the biological properties of conjugates.

What is a MARPAT?

No, it is not a stout-bodied, short-legged marsupial with coarse fur, a long tail, and very small ears.

MARPATSM is a new online file from CAS available on STN International[®]. MARPAT gives you access to chemical patent documents containing Markush (generic) structures cited in CHEMICAL ABSTRACTS[®] from 1988 to the present. You can search by structure to find generic and prophetic (not made in the lab) substances---perhaps including those your competitors are working on!

Because MARPAT is on STN, you can search it in connection with the CAS REGISTRY File of almost 11,000,000 substances. A patent search in only REGISTRY may not be complete---MARPAT supplies the missing link. You'll find other files on STN important for patent searching as well.

Use the same structure query in MARPAT as in other STN structure-searchable files like REGISTRY and BEILSTEIN. No need to rebuild the query each time you search, as you must with some online systems.

For comprehensive structure searching and retrieval. . . use MARPAT.

For a limited time, you can receive a poster of the MARPAT "critter." Respond now!

Yes! Please send me information about MARPAT, the new CAS file of chemical patents with Markush structures on STN International, and a MARPAT poster---FREE!

Journal of Chemical Research, Issue 12, 1992

Other papers in the subject areas covered by *J. Chem. Soc.* are published in synopsis/microform format in *J. Chem. Research*. For the benefit of readers of *J. Chem. Soc.*, the contents list of *J. Chem. Research (S)*, Issue 12, is reproduced below.

- 389 Synthesis of 3-[4(5)-Imidazolylmethyl]-2-methylbenzoic Acid, a Metabolite of the Drug Detomidine Christine J. Cardin, Maire
(M 3026) A. Convery, Pierce V. Kavanagh, Michael T. B. Lambert, Brian McKenna and T. Brian H. McMurry
- 390 Structure-Activity Relations. Part 14. Phenylglyoxal Modification of Arginine Residues in *L. casei* Dihydrofolate Reductase
(M 3072) Keith Bowden and Adrian D. Hall
- 391 Modified Amino Acids and Peptides. Part 2. A Convenient Conversion of Amino and Peptide Alcohols into Amines George
(M 3117) Kokotos and Violetta Constantinou-Kokotou
- 392 Kinetics and Mechanism of the Oxidation of Nitrite by *N*-Chlorotoluene-*p*-sulfonamide (Chloramine T) in Aqueous Acid Per-
(M 3133) chlorate Medium Indu Rao, Juzar Hussain, Som K. Mishra and P. D. Sharma
- 393 Synthesis of Medium-sized Cyclic Sulfides and Selenides by Crosspiece C—X Bond Cleavage of Bicyclic Onium Salts bearing a
(M 3153) Bridgehead Sulfur or Selenium Atom Tadashi Kataoka, Tetsuo Iwama, Kazuhiro Tsutsumi, Yoshihide Nakamura,
Harutoshi Matsumoto, Hiroshi Shimizu and Mikio Hori
- 394 An 'Anomalous' Ozonolysis of an Olefin: Isolation and Crystal Structure of Methyl (4a*RS*,8*RS*,8a*SR*)-Decahydro-2,5-dioxoquino-
(M 3001) line-8-carboxylate Tarun K. Sarkar, Sunil K. Ghosh, P. S. V. Subba Rao and Binay K. Ghorai
- 396 Reactions with 5-Trifluoromethyl-2,4-dihydropyrazol-3-one Derivatives: A New Route for the Synthesis of Fluorinated Poly-
(M 3015) functionally Substituted Pyrazole and Pyrano[2,3-*c*]pyrazole Derivatives Hussein F. Zohdi, Ahmed H. H. Elghandour, Nora
M. Rateb and Mohamed M. M. Sallam
- 398 Kinetic Studies of Alcohol-Isocyanate Reactions. Part 2.† Search for Complexes from and Influence of Organotin Content on the
(M 3039) Reaction of a Protected L-Hydroxyproline with 1,6-Diisocyanatohexane Jean-Jacques Tondeur, Gilbert Vandendunghen
and Marc Watelet
- 400 Applications of Phase Transfer Catalysis. Part 56. Experiments with Some (–)-Sparteine and (–)-Brucine Derivatives as Phase
(M 3056) Transfer Catalysts Eckehard V. Dehmlow and Marta S. Romero
- 402 Enantio- and Diastereo-selective Synthesis of [*R*-(*R**,*R**)]- α -1,3-Benzodioxol-5-yl-5,6,7,8-tetrahydro-6-methyl-1,3-dioxolo-
(M 3101) [4,5-*g*]isoquinolin-5-ylmethanol from D-Ribonolactone Zbigniew Czarnocki
- 404 MNDO Study of Acyloxy Carbene-Carbene Rearrangements
(M 3201) Vibha Walia and Rita Kakkar
- 406 Synthesis of a 7,7'-Cyclolignane and a 7',8-Cyclo-7,8'-neolignane via Photodimerization of (*E*)-Cinnamic Acids in the Solid State
(–) Sebastião F. Fonseca and Eleonilce Rosa B. Rossi
- 408 Reductions of Organic Halides by Group 6 Hydrido Anions
(–) Yekhlief S. Elomrani
- 410 Tertiary Amide Hydrolysis: the Putative α -Methyl Effect Philip Denton, David Horwell, C. David Johnson and David
(–) Williamson
- 412 The Formation of 4,6-Diamino-2-(phenylthio)pyridine-3-carbonitrile
(–) Stephen W. Breuer and Colleen M. Moe
- 414 An Efficient Synthesis of Ethyl 3'-Aminocinnamate
(–) Stephen W. Breuer and Keith A. Dillingham
- 415 An Efficient and Direct Synthesis of Bis(acetylacetonato)oxovanadium(IV)
(–) Manish Bhattacharjee
- 416 Photochemical Transformations of 1,1,4-Trisubstituted Buta-1,3-dienes: 2,5-Diphenyl- and 2-(*p*-Methoxyphenyl)-5-phenyl-penta-
(–) 2,4-dienoic Acid Grace Karminski-Zamola, Anđelko Ristevski and Miroslav Bajić
- 418 An Efficient Synthesis of *cis*-Jasmone
(–) Achintya K. Sarkar
- 420 Medium-sized Cyclophanes. Part 23. Iodine-induced Cycloisomerization Reaction of 8-Methyl[2.2]metacyclophanes to
(–) 3a-Methyl-1,2,3,3a,4,5-hexahydropyrenes Takehiko Yamato, Jun-ichi Matsumoto, Seiji Ide, Kiwamu Tokuhisa, Kazuaki
Suehiro and Masashi Tashiro
- 422 A Stereoselective Synthesis of Ceph-3-em (*R*)-Sulfoxides David H. Bremner, Mark S. Brown, Neil S. Ringan and Jacqui M.
(–) Torrance

N.B. The numbers in parentheses, prefaced by *M*, indicate the first frame occupied by the full-text version of the paper in *J. Chem. Research (M)*. Where no such number is given, the paper as published in *J. Chem. Research (S)* is complete in itself, and there is no extra material in Part *M*.
