

METHODS IN ORGANIC SYNTHESIS

Keep up-to-date with developments in this vital area!

Methods in Organic Synthesis (MOS) is now established as a major reference source designed to meet the requirements of synthetic organic chemists.

Each monthly issue contains about 200 items including titles, bibliographic details and reaction schemes. Text is included when additional information is required. There are five indexes in every issue: an Author Index, and a Subject Index split into four sections (Product, Reaction, Reactant and Reagent).
