

NATURAL PRODUCT UPDATES (NPU)

*Keep up-to-date on
developments in natural product
chemistry!*

Natural Product Updates (NPU) is an alerting service for chemists, biochemists, pharmacists, medical chemists, botanists and other scientists working in the natural products area. It covers topics such as isolation studies, new compounds and known compounds from new sources, structural determinations, new properties and activities, total and biosyntheses. In addition, information on books, reviews and conference proceedings is included. Each monthly issue contains approximately 200 items including structure diagrams, together with trivial and taxonomic names, molecular formulae, physical properties, spectral and biological activities. **NPU** also contains six indexes – author plus five subject indexes (source, taxonomic names, trivial names, biological activity and compound class).

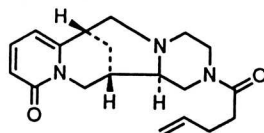

13136 Sophazrine, a novel quinolizidine alkaloid from *Sophora griffithii*
Atta-Ur-Rahman*, A. Pervin, M. I. Choudhary, N. Hasan, B. Sener

J. Nat. Prod., 1991, **54**(4), 929-935

X-ray crystallography of a related alkaloid anagyrine, from *Thermopsis turcica* (C₁₅H₂₀N₂O, monoclinic) confirms the structure.

Sophazrine
C₁₉H₂₅N₃O₂
amorphous solid
[α]_D+213°

Sophazrine
C₁₉H₂₅N₃O₂
amorphous solid

Please return to:

Sales and Promotion Department, Royal Society of Chemistry,
Thomas Graham House, Science Park, Milton Road,
Cambridge CB4 4WF, United Kingdom.

To order please phone (0462)
672555 quoting your credit card
details – we now accept
Access/Visa/Mastercard/Eurocard
Or write to the address below
enclosing a cheque made payable
to the Royal Society of Chemistry.
We can also issue pro/forma invoices
if required.

METHODS IN ORGANIC SYNTHESIS

Keep up-to-date with developments in this vital area!

Methods in Organic Synthesis (MOS) is now established as a major reference source designed to meet the requirements of synthetic organic chemists.

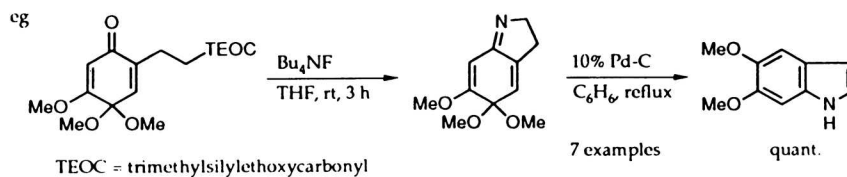

Each monthly issue contains about 200 items including titles, bibliographic details and reaction schemes. Text is included when additional information is required. There are five indexes in every issue: an Author Index, and a Subject Index split into four sections (Product, Reaction, Reactant and Reagent).

22320 A general formation of quinone imines and quinone imine acetals: an efficient synthesis of 5-oxygenated indoles

Y. Kita*, H. Tohma, M. Inagaki, K. Hatanaka

Heterocycles, 1992, **33**(2), 503-506

ISSN 0265-4245 12 issues per annum

Annual Subscription 1993
 EC £190
 USA \$420
 Rest of World £210

ROYAL SOCIETY OF CHEMISTRY
 Information Services

What can a MARPAT do?

*...capture both Markush structures
and patent information*

MARPAT[®], the structure-searchable patent database from CAS, gives you online access to chemical patent documents that contain Markush (generic) structures. MARPAT is available only on STN International[®]

Search MARPAT in connection with the CAS REGISTRY File of more than 11 million substances. A patent search in only REGISTRY may not be complete—MARPAT can supply unique answers for specific and generic structures. On STN, you'll find other files important for patent searching as well.

With the information MARPAT provides, who knows? You may just capture the market.

Yes! MARPAT has captured my interest. Please send a brochure and a MARPAT poster—FREE!

Journal of Chemical Research, Issue 6, 1993

Other papers in the subject areas covered by *J. Chem. Soc.* are published in synopsis/microform format in *J. Chem. Research*. For the benefit of readers of *J. Chem. Soc.*, the contents list of *J. Chem. Research (S)*, Issue 6, is reproduced below.

- 201 The Preparation of Imidazo[2,1-*b*]thiazole and its 5-Substituted and 2,5-Disubstituted Analogues **Christopher P. Hopkinson, G. Denis Meakins and Robert J. Purcell**
(M 1218)
- 202 Novel Reformatsky Reactions of 3-Arylmethylene-4,5-dihydrofuran-2(3*H*)-ones and 4-Arylmethylene-3-methylisoxazol-5(4*H*)-ones **Sanjay Batra, Dibyendu De, (the late) Manju Seth and Amiya Prasad Bhaduri**
(M 1228)
- 203 Site Selectivity and Regioselectivity of Nitrile Oxide Cycloadditions to *N,N*-Diarylminoallenes **Gianluigi Broggin, Giorgio Molteni and Gaetano Zecchi**
(M 1263)
- 204 An Unusual Synthesis of New (*E*)-Dimethyl 2-(Cycloalk-1-enylmethylene)butanedioates (1,1-Disubstituted 3,4-Polymethylene-butane-1,3-dienes) **Kanchan Agarwal, Shri Nivas Rastogi and Amiya Prasad Bhaduri**
(M 1301)
- 205 Platinum and Palladium Complexes of 2-Aminofluorene; Structure of *trans*-(2-Aminofluorene)(triethylphosphine)platinum(II) Dichloride **Adeyemi Adedapo, Penny A. Chaloner, Peter B. Hitchcock and Salih S. Al-Juaid**
(M 1312)
- 206 A New Macrocyclic Cyclophane incorporating Three Naphthalene and One Anthracene Units. Crystal Structure and Fluorescence Quenching by Th⁴⁺ and Other Metal Cations **Michel Cotrait, Harimbola Andrianatoandro, Pierre Marsau, Jean-Pierre Desvergne, Frédéric Fages, Sonja Ramm and Henri Bouas-Laurent**
(M 1201)
- 208 Heterocyclic Synthesis using Hydrazonoyl Halides: Synthesis of Annelated Pyrimidines, Pyridazines and Pyrazoles **Abdou O. Abdelhamid**
(M 1239)
- 210 Addition Reactions of Acetylenic Esters upon 1-(2-Thienyl)- and 1-(3-Thienyl)-ethanone Oximes and upon 6,7-Dihydrobenzo[*b*]thiophen-4(5*H*)-one and 5,6-Dihydrobenzo[*b*]thiophen-7(4*H*)-one Oximes. Formation of 2-(Thienyl)pyrroles and 4,5-Dihydro-1*H*-thieno[*g*]indoles **Gérard Aimè Pinna, Maria Antonietta Pirisi and Giuseppe Paglietti**
(M 1279)
- 212 Crystal and Molecular Structures of 5-Fluoro-3-methyl-, 5-Chloro-3-methyl- and 5-Chloro-1,3-dimethyl-uracil. Hydrogen-bond Patterns through X-Ray and Molecular-orbital Analysis **Gabriella Vampa, Luciano Antolini, Giulio Rastelli, M. Paola Costi, Marcella Rinaldi and Piergiorgio Pecorari**
(M 1346)
- 214 Kamlet-Taft Solvatochromic Parameters for Hydroxylic Solvents **Raquel M. C. Gonçalves, Ana M. N. Simões, Lidia M. P. C. Albuquerque, Martí Rosés, Clara Ràfols and Elisabeth Bosch**
(M 1380)
- 216 Synthesis of (2*Z*,4*E*)-5-Aryl-2-cyano-3-methylpenta-2,4-dienamides, with X-Ray Crystal Structure of the Cyclodimeric Dimethyl 1,3-Dicyano-2,4-dimethyl-2,4-distyrylcyclobutane-1,3-dicarboxylate **Conor N. O'Callaghan, T. Brian H. McMurry, Christine J. Cardin and Deborah J. Wilcock**
(M 1401)
- 218 The Heterocyclization of *N,N'*-Disubstituted 2-Halogenobenzohydrazides to 1,1-Disubstituted Indazol-3-ylidene Oxides **Vicente J. Arán, Juan L. Asensio, José R. Ruiz and Manfred Stud**
(M 1322)
- 219 A Short and Practical Synthesis of 8-Methylnonanoic Acid, a Synthone of Dihydrocapsaicin, *via* Grignard Coupling **Sham A. Hassarajani, Seturam Mithran and Vasant R. Mamdapur**
(—)
- 220 Synthesis of 4-Fluoro-3,5-dinitrophenol **Gregory W. Bradley and David G. Morris**
(—)
- 222 A Convenient Synthesis of α -Fluoro- β -hydroxy Esters **Yanchang Shen and Ming Qi**
(—)
- 224 Facile *S*-Monodemethylation of 3,4,5-Tris(methylthio)-1,2-dithiolium Iodide: Synthesis of a Highly Functionalized Tetrathiacyclodecane **Jai D. Singh and Harkesh B. Singh**
(—)
- 226 Solid-state Conformations of Diaryl Dichalcogenides **Marc Dötze and Günter Klar**
(—)
- 228 Facile Synthesis of a Short Peptide with a Side-chain-constrained Structure **Shui-Tein Chen, Hsiu-Jen Chen, Hui-Ming Yu and Kung-Tsung Wang**
(—)
- 230 Synthesis of (+)-Eldanolide, the Sex Pheromone of *Eldana saccharina*, by Enantioselective Alkylation of a Chiral Imide **Giovanna Mobbili, Mario Orena, Gianni Porzi and Sergio Sandri**
(—)
- 232 Electro-oxidation of *p*-Chlorophenol and *p*-Bromophenol in Aqueous Medium **Shaheen Taj, Mohammed Farooq Ahmed and Sankarapapavinasam**
(—)
- 234 Withametelins F and G, Two New Withanolides of *Datura metel* **M. A. Farboodniay Jahromi, M. Manickam, Mohini Gupta, Yoshiteru Oshima, Susumi Hatakeyama and Anil B. Ray**
(—)
- 236 Metabolism of Androst-4-ene-3,17-dione by *Aspergillus fumigatus* **Sukdeb Banerjee, Emele Mukherjee and Shashi B. Mahato**
(—)
- 238 Hydrogen-bonded Complexes of Phosphonic Acid Esters and Phosphine Oxides with Alkyl Hydroperoxides; an Infrared Spectroscopic Study **Heinz Kropf, Ralf Reichwaldt and Thomas Pesel**
(—)
- 240 Isotopic-labelling Studies on an Unstabilised Azomethine Ylide **Jonathan M. Bentley, Duncan M. Smith, Harry J. Wadsworth and Christine L. Willis**
(—)
- 242 Tin(II) Chloride Dihydrate: a Mild and Efficient Catalyst for Dithioacetalization **Nalin B. Das, Amalendu Nayak and Ram P. Sharma**
(—)
- 244 Hypervalent Iodine in the Synthesis of Bridgehead Heterocycles. Part 2. A Facile Route for the Synthesis of 1,2,4-Triazololo[3,4-*b*]benzothiazoles **Devinder Kumar, Om Prakash and Shiv P. Singh**
(—)

N.B. The numbers in parentheses, prefaced by *M*, indicate the first frame occupied by the *full-text version* of the paper in *J. Chem. Research (M)*. Where no such number is given, the paper as published in *J. Chem. Research (S)* is complete in itself, and there is no extra material in Part *M*.
