The 8th International Symposium on Molecular Recognition and Inclusion will be held in Ottawa, Ontario, Canada from July 31 to August 5, 1994. For further information please contact Mrs. Huguette Morin-Dumais, Steacie Institute for Molecular Sciences, National Research Council Canada, 100 Sussex Drive, Ottawa, Ontario, Canada, K1A 0R6. Telephone: (613) 990-0936. FAX: (613) 954-5242, E-Mail: ISMRI@NED1.SIMS.NRC.CA.

The symposium will focus on the rapidly advancing field of supramolecular chemistry including all aspects of molecular recognition and inclusion. As part of the main symposium, a special "Lock and Key" symposium will be held to commemorate the 100th anniversary of Emil Fischer's seminal paper in which the lock and key analogy was first proposed. The symposium will focus on molecular recognition and will include all chemical and biological aspects (structure, catalysis, complex formation biomimetic reactions, self assembly, sensors, drug design, new and modified hosts). Additional areas to be covered include: physical methods and computation (advances and applications to molecular recognition and guest-host chemistry) and the solid state (new inclusion hosts, microporous solids, clathrates, inclusion compounds, intercalates, chemistry in confined spaces, clusters). The program will consist of 35-40 plenary and invited lectures as well as contributed presentations in poster format. Abstracts of oral and poster presentations will be available to participants in booklet form.

THE 35TH IUPAC INTERNATIONAL SYMPOSIUM ON MACROMOLECULES

MacroAkron '94
The University of Akron, Akron, Ohio, USA
July 11-15, 1994

Major Topics: New Polymerization Reactions and Reaction Mechanisms
Complex Macromolecular Architectures and
Supramolecular Polymers
Polymers and Biology
Frontier Polymeric Materials
Field Responsive Polymers
Structure and Morphology
Thermodynamic and Dynamic Properties in Solution and Bulk
Polymers at Interfaces
History of Polymers

Plenary Speakers

Andrew Keller, University of Bristol; Toyoki Kunitake, Kyushu University;
Helmut Ringsdorf, University of Mainz; Walter Stockmayer, Dartmouth College

In addition to the Plenary Speakers, there will be more than 100 invited speakers and numerous contributed oral and poster presentations covering all aspects of polymer science. 24 parallel sessions are planned. **Abstract Deadline is February 1, 1994.**

NATURAL PRODUCT UPDATES (NPU)

*Keep up-to-date on
developments in natural product
chemistry!*

Natural Product Updates (NPU) is an alerting service for chemists, biochemists, pharmacists, medical chemists, botanists and other scientists working in the natural products area. It covers topics such as isolation studies, new compounds and known compounds from new sources, structural determinations, new properties and activities, total and biosyntheses. In addition, information on books, reviews and conference proceedings is included. Each monthly issue contains approximately 200 items including structure diagrams, together with trivial and taxonomic names, molecular formulae, physical properties, spectral and biological activities. **NPU** also contains six indexes – author plus five subject indexes (source, taxonomic names, trivial names, biological activity and compound class).
