- 165 Enzyme-catalysed carbon-carbon bond formation: use of transketolase from *Escherichia coli*

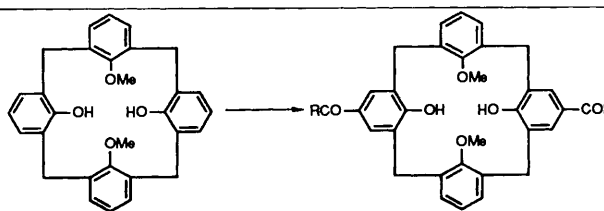

Gordon R. Hobbs, Malcolm D. Lilly, Nicholas J. Turner, John M. Ward, Andrew J. Willets and John M. Woodley

Transketolase has been obtained in large quantities from *E. coli*. The enzyme shows a relaxed substrate specificity

- 167 Selective Friedel-Crafts reaction of 26,28-dimethoxycalix[4]arene

Zhi-Tang Huang and Guo-Qiang Wang

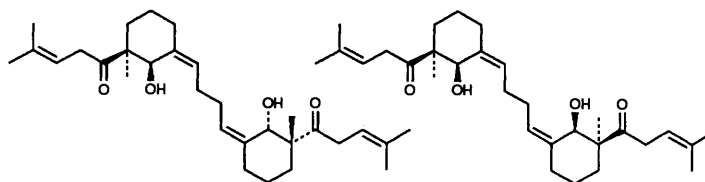

Reagents: i, RCOCl or C(O)CH<sub>2</sub>CH<sub>2</sub>C(O), AlCl<sub>3</sub>, room temp.  
R = Me, Et, CH<sub>2</sub>CH<sub>2</sub>Cl, (CH<sub>2</sub>)<sub>3</sub>CH<sub>2</sub>Cl, CH=CH<sub>2</sub>, Ph, CH<sub>2</sub>CH<sub>2</sub>CO<sub>2</sub>H.

## Articles

- 169 Triterpenoid total synthesis. Part 3. Synthesis of *meso*- and ( $\pm$ )-limatulone, defensive metabolites of the limpet *Collisella limatula*

Kenji Mori, Hirosato Takikawa and Masaru Kido

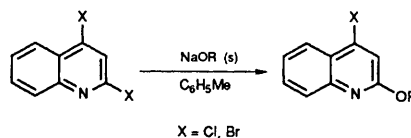

*meso*-Limatulone

( $\pm$ )-Limatulone

The synthesis of the two isomers shown above is described

- 181 **Regioselective alkoxydehalogenation of 2,4-dihalogenoquinolines and a reinvestigation of the bromination of 2-methoxyquinoline**

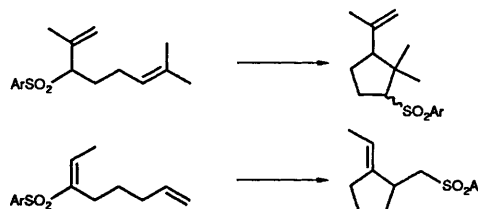

Alan G. Osborne and Luke A. D. Miller

It is proposed that the observed selectivity arises from a surface reaction.  $^1\text{H}$  and  $^{13}\text{C}$  NMR spectroscopic data are presented

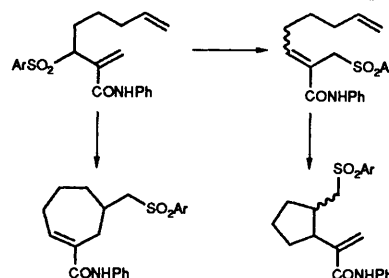

- 185 **Further radical induced cyclisations of unsaturated sulfones**

Iain W. Harvey and Gordon H. Whitham

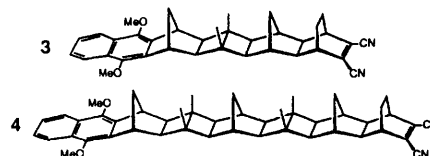

- 191 **Radical induced cyclisations of unsaturated allylic sulfones containing an activating electron withdrawing group**

Iain W. Harvey and Gordon H. Whitham

- 197 **Synthesis of rigidly linked donor-acceptor systems designed to test the effect of orbital symmetry on the dynamics of long-range intramolecular electron transfer processes**

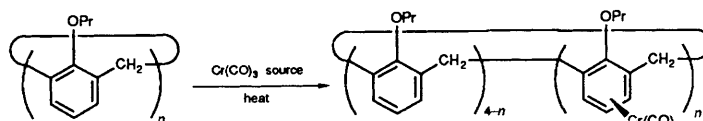

Donald C. Craig, Anna M. Oliver and Michael N. Paddon-Row

The synthesis of 3 and 4 is described

- 205 **Syntheses and spectral characterizations of tricarbonylchromium complexes of calix[4]arenes**

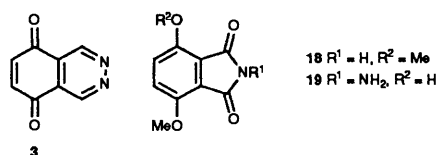

Hideshi Iki, Taketoshi Kikuchi and Seiji Shinkai

Arenetricarbonylchromium complexes were synthesised from four conformational isomers of calix[4]arene and 1:2, 1:3 and 1:4 complexes of cone conformers were also synthesized

- 211 **Studies of phthalazine-5,8-quinone, a ring contraction, and some novel and potentially useful fluorescent phthalimides**

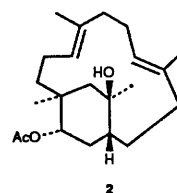

John Parrick and Ramanaranjinie Ragunathan

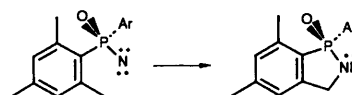

The phthalazinequinone 3 and some potentially useful derivatives of the novel fluorescent phthalimides 18 and 19 are described

217 **Synthesis of secotrinervitanes, unique bicyclic diterpenes from termites**

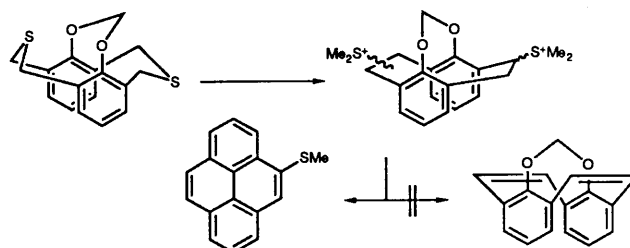

Toshifumi Hirukawa, Toshiyuki Shudo and Tadahiro Kato

A total synthesis of ( $\pm$ )-3 $\alpha$ -acetoxy-5 $\beta$ -hydroxy-7,16-secotrinervita-7,11-diene was performed227 **Photochemical reactions of phenylphosphinic azides having *ortho* alkyl substituents: diminution of Curtius-like rearrangement; intramolecular nitrene insertion into C–H bonds**

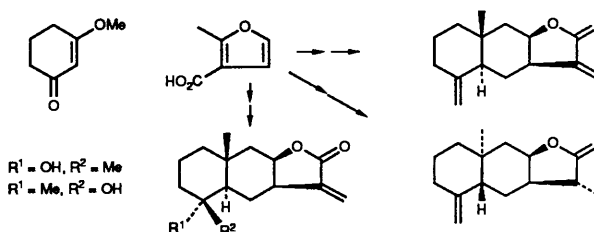

Martin J. P. Harger and P. Andrew Shimmin

233 **Novel formation of 4-methylthiopyrene in a Hofmann elimination reaction directed toward the synthesis of 17,19-dioxa[2.2.3]-(1,2,3)cyclophanediene**

Yee-Hing Lai and Hong-Leng Eu

239 **Total synthesis of three eudesman-12,8-olides, ( $\pm$ )-isoalantolactone, ( $\pm$ )-dihydrocallitrisin and ( $\pm$ )-septuplinolide; structure revision of septuplinolide**

Masahiro Tada, Hirokazu Yamada, Akira Kanamori and Kazuhiro Chiba

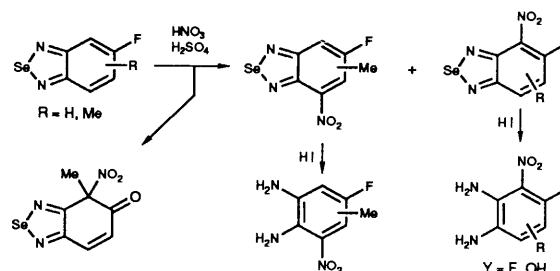

249 **Structural elucidation of trikoningins KA and KB, peptaibols from *Trichoderma koningii***

Catherine Auvin-Guette, Sylvie Rebuffat, Isabelle Vuidepot, Marcel Massias and Bernard Bodo

From a *Trichoderma koningii* strain, the antibiotic and membrane-active peptides trikoningins KA V, KB I and KB II were isolated. Their sequences were elucidated by FAB MS and  $^1\text{H}$  NMR spectroscopy. KA V was a 19-residue peptaibol and KB I and KB II were 11-residue lipopeptaibols.

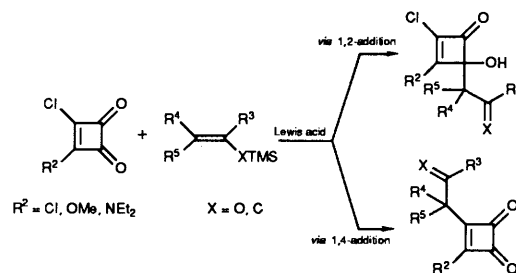

257 **Nitration of 5-fluoro-2,1,3-benzoselenadiazoles, and the synthesis of 4-fluoro-3-nitro-, 4-fluoro-6-nitro-, 5-fluoro-3-nitro-*o*-phenylenediamines and 3,4-diamino-2-nitrophenols by subsequent deselenation**

Wei Tian, Spiros Grivas and Kjell Olsson

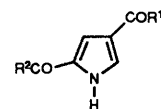

- 263 **Synthesis of squaric acid derivatives by Lewis acid-catalysed reaction of its dichloride, methyl ester chloride, diethylamide chloride, and ethyl diester with unsaturated organosilanes: new method for C–C bond formation on cyclobutenedione**

Masatomi Ohno, Yoshihiko Yamamoto, Yuhichi Shirasaki and Shoji Eguchi

- 273 **General methods for synthesizing 2,4-diacetylpyrroles and their precursors containing one or two masked acyl groups**

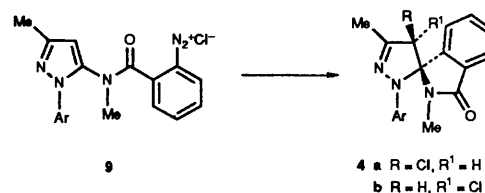

Silvano Cadamuro, Iacopo Degani, Stefano Dughera, Rita Fochi, Antonella Gatti and Laura Piscopo

A thorough study on the synthesis of 2,4-diacetylpyrroles by direct acylation of pyrrole, 2- and 3-acetylpyrroles is reported

- 285 **Modifications and extensions of the Pschorr reaction in pyrazole series. Access to the [2]benzopyrano[4,3-*c*]pyrazole system of pharmaceutical interest**

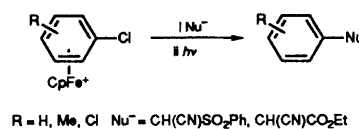

Giuseppe Daidone, Salvatore Plescia, Benedetta Maggio, Vincenzo Sprio, Franco Benetollo and Gabriella Bombieri

The Pschorr reaction performed under non-classical reaction conditions on the diazonium chloride **9** afforded the epimers **4a, b**

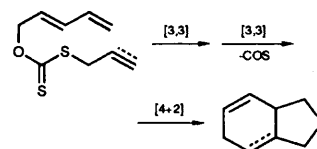

- 293 **A convenient synthesis of some arylated phenylsulfonylacetonitriles and ethyl cyanoacetates using organo-iron complexes**

Alaa S. Abd-El-Aziz and Christine R. de Denus

- 299 **Sequential pericyclic reactions of unsaturated xanthates. One-pot synthesis of hydrobenzo[*c*]thiophenes**

Kazunobu Harano, Masashi Eto, Kikuma Ono, Keisuke Misaka and Takuzo Hisano
