

Journal of Chemical Research, Issue 9, 1995

Other papers in the subject areas covered by *J. Chem. Soc.* are published in synopsis/microform format in *J. Chem. Research*. For the benefit of readers of *J. Chem. Soc.*, the contents list of *J. Chem. Research (S)*, Issue 9, is reproduced below.

- 341 A Novel Approach to 4-Dimethylaminocyclohexanone *via* Birch Reduction of *N,N*-Dimethyl-4-methoxyaniline **Peter Stanetty**
(M 2101) **Olaf Kasemann** and **Martin Schmid**
- 342 Regioselectivity in Sequential Bromine-Lithium Exchange Reactions of 2,4-Dibromo-*N,N*-dimethylaniline **Peter Stanetty**
(M 2111) **Barbara Krumpak** and **Inge K. Rodler**
- 344 Cationic Homo- and Hetero-binuclear Ruthenium(II)-Rhodium(III) Complexes with Dimethyl Phosphonate and Halides as Bridging Ligands **Mauricio Valderrama, Raúl Contreras** and **José Acevedo**
(M 2037)
- 345 Half-wave Potential as a Tool for predicting the Scope and Limitation of the Reaction of α,β -Unsaturated Ketones with Phosphorus Nucleophile **Imre Petneházy, György Clementis, Zsuzsa M. Jászay, Péter Tömpe** and **László Töke**
(M 2030)
- 346 Competitive Reaction Paths during the Photolysis of Furan-2,3-dione Derivatives: Matrix Experiments and Semi-empirical Calculations **Jean-Pierre Aycard, Elena Volanschi, Mohamed Hnach, Hamid Zineddine** and **Thomas Yao N'Guessan**
(M 2068)
- 347 Benzosuberones: Syntheses, Some Reactions and Formation of Benzo[3,4]cyclohepta[1,2-*b*]pyrrole Derivatives **Candido M. M. da Conceição, Jacqueline A. McRitchie, David Middlemiss** and **George R. Proctor**
(M 2161)
- 348 Synthesis and Electrical Properties of Alkanediyldisulfanyl-bridged Polymeric Phthalocyanines **Vefa Ahsen, Mustafa Özdemir**
(M 2050) **Z. Ziya Öztürk, Ahmet Gül** and **Özer Bekároğlu**
- 350 Tetracyclic Compounds from Tetrahydrocarbazolones. Part 1. Synthesis from 2,3,4,9-Tetrahydrocarbazol-1-ones **Delphin Joseph, Laurent Martarello** and **Gilbert Kirsch**
(M 2001)
- 352 Reactions of 2-Cyanomethylidene-1-azacycloalkanes with Benzonitrile Oxide **Antonino Corsaro, Ugo Chiacchio, Giancarlo Perrini, Venerando Pistrà, Giovanni Purrello** and **Giuseppe Scarlata**
(M 2015)
- 354 *Ab Initio* Force Fields and Vibrational Analysis of the Spectra of Oxazole and Thiazole using Density Functional Theory **Adel A El-Azhary, Azza A. Ghoneim** and **Mohamed E. El-Shakre**
(M 2123)
- 356 Metabolites of the Higher Fungi. Part 27. Berteric Acid, Cameronic Acid and Malaysic Acid, Three New Polysubstituted Fatty Acids related to Cubenic Acid from Species of the Fungus Genus *Xylaria* **Monilola O. Adebayo, Raymond L. Edwards**
(M 2137) **Thomas Laessøe** and **Derek J. Maitland**
- 358 4-Nitrosopyridine 1-Oxide compared with Other 4-Substituted Pyridine 1-Oxides as evidenced by Carbon-13 NMR Spectra and Dipole Moments **Brian G. Gowenlock, Mailer Cameron** and **Alan S. F. Boyd**
(—)
- 360 Relative Stereochemistry of the Adducts from the Addition of Lithiated Methyl Phenyl Sulfoxide to Oxaziridines **Abdol R Hajipour** and **Stephen G. Pyne**
(—)
- 362 Bromination of 5-Methylidene-1,3-dioxanes: Influence of the Acetal Group **Morad Amadji, Jérôme Vadecard, Ulrik Schimmel, Gérard Plé** and **Jean-Christophe Plaquevent**
(—)
- 364 Heterocyclic Transformations. Part 6. Studies on the Reactions of 3-Benzyl-6-methyl-1,3-oxazine-2,4(3*H*)-dione with α -Amino and Hydroxy Amides **Harjit Singh, Palwinder Singh, Swapandeep Singh Chimni** and **Subodh Kumar**
(—)
- 366 Radical Chain Addition of Aryloxy Radicals to Electron-deficient Alkenes **Woonphil Baik, Byeong Cheol Min, Ki Chang Lee**
(—) **Young Moo Jun** and **Byeong Hyo Kim**
- 368 Lewis Acid Effect on the Diels-Alder Reaction of Chiral Acetylenic Sulfoxides **Albert W. M. Lee, W. H. Chan, F. Y. Ji** and **W. H. Poon**
(—)
- 370 Reaction of 5-Aroylamino-1,3,4-thiadiazole-2(3*H*)-thiones with Hydrazonoyl Chlorides **Magda A. Abdallah, Mosselhi A. N Mosselhi, Ikhlass M. Abbas, Abdel-Gawad A. Fahmi** and **Ahmed S. Shawali**
(—)
- 372 Preparation of Amino- and Formylamino-coumarins by Selective Hydrogenation of Nitrocoumarins **Shaw-Tao Lin, Fu-Ma Yang, Heuy-Ju Yang** and **Keh-Feng Huang**
(—)
- 374 The Influence of the Solvent Nature on the Conformational Stability of Octaacylated Calix[4]resorcinolarenes **Alexander N Shivanyuk, Vladimir V. Pirozhenko, Vitaly I. Kalchenko** and **Leonid N. Markovsky**
(—)
- 376 Reactions of a Tetracyclic (Cyano)cyclopropyl Ketone, 10-Cyanotetracyclo[5.4.0.0^{2,9}.0^{8,10}]undeca-3,5-dien-11-one **Eckehard V Dehmlo** and **Michael Birkhahn**
(—)
- 378 Spectrochemical Studies on Reaction Products of Nickel(II), Copper(II) and Zinc(II) Ions with 1,1-Di(ethoxycarbonyl)-2,2-ethylene dithiolate in the Presence of Some Nitrogen Bases **Mahesh K. Singh**
(M 2084)

N.B. The numbers in parentheses, prefaced by *M*, indicate the first page occupied by the *full-text version* of the paper in *J. Chem. Research (M)*. Where no such number is given, the paper as published in *J. Chem. Research (S)* is complete in itself and there is no extra material in Part *M*.

Membranes and Molecular Assemblies: The Synkinetic Approach

By Jürgen-Hinrich Fuhrhop,
Freie Universität Berlin, Germany

Jürgen Köning,
Freie Universität Berlin, Germany

Membranes and Molecular Assemblies: The Synkinetic Approach is an inspiring, illustrated text in glorious full colour. It contains 118 colour illustrations and a further 70 in black and white. Great care has been taken to choose graphics that illustrate difficult concepts.

The book describes the wealth of membrane structures realized by chemists mainly within the last two decades - micelles, vesicles, fibres, and surface monolayers - from the point of view of supramolecular chemistry. It puts new emphasis on "synkinetic" procedures for the preparation of non-covalent assemblies as well as their structural characterization by electron microscopy, solid state NMR spectroscopy, and comparison to X-ray crystal structures. The supramolecular structure of well-defined molecular assemblies and their use as complex reaction systems is also emphasized. Stereoselective surface recognition, asymmetric membranes, vectorial photoreactions, solid molecular bilayers in the form of tubules or helical rods, and sealable nanopores in membranes or on electrode surfaces are a few outstanding examples. In addition, the importance of well-defined gaps on surfaces and within membranes and crystals is discussed in context for the first time.

Container Molecules and Their Guests

By Donald J. Cram, *University of California, Los Angeles, USA*

Jane M. Cram, *University of California, Los Angeles, USA*

This volume covers the evolution of host-guest complexation chemistry in the minds and hands of Nobel Prize winner Donald Cram and his co-workers at UCLA, over the 25-year period from 1970-1994. It deals with the fundamental principles and objectives that govern this rapidly developing subject and illustrates the emergence of a new field of biomimetic chemistry.

Hardcover xiv + 224 pages **ISBN 0 85186 972 6**
