

FARADAY TRANSACTIONS

An international journal of physical chemistry and chemical physics

Faraday Transactions is a fortnightly, interdisciplinary journal with a broad subject base encompassing all aspects of physical chemistry, biophysical chemistry and chemical physics. Dedicated to supporting the newest and most exciting areas of research, the journal covers everything from gas-phase kinetics to surface chemistry, from colloid and interface science to electrode processes, liquids and solutions.

KEY FEATURES

- ◆ A unique mix of physics, chemistry and biology
- ◆ Full papers, communications and research articles
- ◆ Rapid publication
- ◆ The strictest refereeing standards
- ◆ International authorship and readership
- ◆ Value for money - It's MUCH less expensive than commercial journals

1996 PRICES (24 Issues + author & subject index)	ISSN 0956-5000
EEA	£905.00
USA	\$1717.00
Rest of World	£928.00

Also of interest ... **FARADAY DISCUSSIONS**

Faraday Discussions is a key publication, documenting a long-established series of important meetings, which provide an international forum for the exchange of views and results in developing areas of physical chemistry and chemical physics.

The papers presented at these meetings, together with the opinions and ideas they stimulated, are presented in **Faraday Discussions**, creating a unique record of current knowledge and viewpoints from the world's leading experts in the field.

Available as a yearly subscription (3 issues), or singly

The latest information on
trends in organic chemistry on
a powerful new CD-ROM!

ECTOC – The First of its Kind

The **Electronic Conference on Trends in Organic Chemistry (ECTOC)** was the first completely electronic conference to be held on the subject of organic chemistry. The conference took place over the Internet, and included not just high-level academic research but new and exciting ways of presenting that information. The content of this conference is now available on a powerful new CD-ROM, allowing you to benefit from the advantages unique to this electronic medium.

What does the ECTOC CD-ROM contain?

- 6 keynote articles highlighting significant work from leading scientists
- 71 peer-reviewed articles and posters from authors in 13 different countries in synthetic, mechanistic and bio-organic chemistry
- the E-mail discussion of the articles among chemists across the whole organic scientific community

What else can the CD-ROM offer me?

- colour and "clickable" 2D diagrams
- rotatable 3D molecular images
- a "molecular hyperglossary" of 3D coordinates
- video animation and "virtual reality" navigation
- editable reaction schemes and search queries

Price: £50 (plus VAT in the UK); \$95

ISBN: 0 85404 899 5

Software: The ECTOC files on the CD-ROM can be viewed with a World Wide Web client program such as Netscape, Internet Explorer or Mosaic, on a Mac or a PC running Windows 3.1 or Windows 95.

Don't miss this chance to have this information-packed resource to hand – order your copy of the ECTOC CD-ROM now!
