

SPECIALIST PERIODICAL REPORTS

The highly praised series of Chemical Society publications which provide comprehensive and systematic review coverage of major areas of research.

Biosynthesis Vol. 2

Senior Reporter: Professor T. A. GEISSMAN
University of California at Los Angeles

This second volume covers the literature published during 1972 and follows the format of Volume 1 about which Ludwig Bauer in the *Journal of the American Chemical Society* said, "the extensive research published in this area over the past several years is clearly reviewed by experts in the area. Their interpretations of the results are concise and their mechanisms illustrated amply with clear structures. These reviews are well coordinated and the book is well written. The formulae are beautifully reproduced. This Report will serve as source material to lecturers

and students alike in natural product chemistry pharmacognosy, and botany. It is a stimulating account of recent progress in this area".

The chapter headings are as follows:

Biosynthesis of C₅-C₂₀ Terpenoid Compounds; Biosynthesis of Triterpenes, Steroids, and Carotenoids; Non-protein Amino-acids, Cyanogenic Glycosides, and Glucosinolates; Biosynthesis of Alkaloids; Biosynthesis of Polyketides; Biosynthesis of Phenolic Compounds Derived from Shikimate; Stable Isotopes in Biosynthetic Studies.

Clothbound 318pp 8 $\frac{3}{4}$ " × 5 $\frac{5}{8}$ " ISBN 0 85186 513 5 £8.00 (CS Members £6.00)

Carbohydrate Chemistry Vol. 6

Senior Reporter: Professor J. S. BRIMACOMBE
Chemistry Department, University of Dundee

The sixth volume in this now well established series covers the literature from mid-January 1972 to mid-January 1973. It follows the pattern of Volume 5 about which W. G. Overend in *Chemistry in Britain* said, "the usual high standard of the series is maintained and Volume 5 is strongly recommended to all chemists interested in developments in the chemistry of carbohydrates. It is indispensable to those actively engaged in research on this class of natural products".

The volume is divided into two parts as follows:

Part I: Mono-, Di-, and Tri-saccharides and their Derivatives: Introduction; Free Sugars; Glycosides; Ethers and Anhydro-sugars; Acetals; Esters; Halogenated Sugars; Amino-sugars; Hydrazones, Osazones, and Related Compounds; Miscellaneous Nitrogen-containing Compounds; Thio-sugars;

Derivatives with Nitrogen or Sulphur in the Sugar Ring; Deoxy-sugars; Unsaturated Derivatives; Branched-chain Sugars; Aldehydo-sugars, Alduloses, Dialduloses, and Diuloses; Sugar Acids and Lactones; Inorganic Derivatives; Cyclitols; Antibiotics; Nucleosides; Oxidation and Reduction; N.M.R. Spectroscopy and Conformational Features of Carbohydrates; Other Physical Methods; Polarimetry; Separatory and Analytical Methods; Alditols.

Part II: Macromolecules: Introduction; General Methods; Plant and Algal Polysaccharides; Microbial Polysaccharides; Glycoproteins, Glycopeptides, and Animal Polysaccharides; Enzymes; Glycolipids and Gangliosides; Chemical Synthesis and Modification of Oligosaccharides, Polysaccharides, Glycoproteins, Enzymes, and Glycolipids.

Clothbound 620pp 8 $\frac{3}{4}$ " × 5 $\frac{5}{8}$ " ISBN 0 85186 052 4 £8.00 (CS Members £6.00)

Orders for these publications should be sent to: The Publications Sales Officer, The Chemical Society, Blackhorse Road, Letchworth, Herts SG6 1HN. (Members should indicate that they are claiming the privilege price and, if possible quote their membership number)

SPECIALIST PERIODICAL REPORTS

The highly praised series of Chemical Society publications which provide comprehensive and systematic review coverage of major areas of research.

Aliphatic Chemistry Vol. 2

Senior Reporter: Professor W. PARKER, *University of Stirling*

The coverage of the 1970 and 1971 literature on this subject was contained in the umbrella title, *Aliphatic, Alicyclic, and Saturated Heterocyclic Chemistry Vol. 1*. That report received a very favourable response and it has therefore been possible to make each of these areas an individual series.

Aliphatic Chemistry Volume 2 is the first such

title, the others being, *Alicyclic Chemistry*, and *Saturated Heterocyclic Chemistry*. It covers literature published during 1972 and the chapter headings are as follows: Acetylenes, Alkanes, Allenes, and Alkenes; Functional Groups other than Acetylenes, Alkanes, Allenes, and Olefins; Naturally Occurring Polyolefinic and Polyacetylenic Compounds; Chemistry of the Prostaglandins.

Clothbound 332pp 8 $\frac{3}{4}$ " × 5 $\frac{5}{8}$ " ISBN 0 85186 512 7 Price £11.00 (CS Members £8.00)

Amino-acids, Peptides, and Proteins Vol. 5

Senior Reporter: Dr. R. C. SHEPPARD, *Medical Research Council*

The fifth volume in this well-established series covers papers published during 1972.

"Preceding volumes of the series have done an excellent job of lightening the burden and Volume 4 continues the standard of excellence set in previous years. The active investigator as well as the casually interested scientist will find this book indispensable to fulfilling his needs".

—Eugene L. Woroch, *Journal of the American Chemical Society*

The chapter headings are as follows: Amino-acids; Structural Investigation of Peptides and Proteins; Peptide Synthesis; Peptides with Structural Features not Typical of Proteins; Chemical Structure and Biological Activity; Metal Derivatives of Amino-acids, Peptides and Proteins; Further Extracts from the Rules and Tentative Rules of the I.U.P.A.C. - I.U.B. Commission on Biochemical Nomenclature.

Clothbound 534pp 8 $\frac{3}{4}$ " × 5 $\frac{5}{8}$ " ISBN 0 85186 044 6 Price £8.00 (CS Members £6.00)
