

ORGANIC REACTIONS MECHANISMS GROUP

Following the annual general meeting of the Organic Reactions Mechanisms Group (ORMG) of The Royal Society of Chemistry on 5th January 1988, membership of the ORMG will be open to non-members of the RSC from 1989. This initiative by the ORMG is intended to widen its membership to all those interested in its subject area: experimental and theoretical investigations into mechanisms of reactions and reactivity of organic compounds including reactive intermediates and biologically important molecules. For further details and information during 1988, please contact the secretary/treasurer of the ORMG: **Dr. H. Maskill, Department of Chemistry, University of Stirling, Stirling FK9 4LA, Scotland.**

JOURNAL OF THE CHEMICAL SOCIETY

Perkin Transactions II

Physical Organic Chemistry

CONTENTS

- 1749 Rotamers and isomers in the fulgide series. Part 1. Stereochemistry and conformational analysis of bis-(3,4-dimethoxybenzylidene)succinic anhydrides by *X*-ray crystallography and molecular mechanics **Jan C. A. Boeyens, Louis Denner, and Guido W. Perold**
- 1759 A discussion of the Hammett acidity function. Study of some weak bases **Begoña Garcia, José M. Leal, Luis A. Herrero, and Juan C. Palacios**
- 1769 Kinetics and stereochemistry in the catalytic hydrogenation of acridine **Kinya Sakanishi, Masato Ohira, Isao Mochida, Hiroshi Okazaki, and Mahito Soeda**
- 1775 Crystal and molecular structure of cytosine hemitrichloroacetate **Maria Gdaniec, Bogumił Brycki, and Mirosław Szafran**
- 1781 Kinetics and mechanism of the reduction of dodecatungstocobaltate(III) by D-fructose, D-glucose, and D-mannose: comparison between keto- and aldo-hexoses **Mala Gupta, Swapan K. Saha, and Pradyot Banerjee**
- 1787 Boron-11 nuclear magnetic resonance study of the reactions of 2-functionalized pyridines with borane-tetrahydrofuran and -dimethyl sulphide. Formation of borinic esters and N → B bond energy differences in five- and six-membered ring borates **Norberto Farfán and Rosalinda Contreras**
- 1793 Nucleophilic substitution at sulphonyl sulphur. Part 4. Hydrolysis of substituted thiophenesulphonyl halides in water-acetone mixtures **Antonino Arcoria, Francesco P. Ballistreri, Emanuela Spina, Gaetano A. Tomaselli, and Emanuele Maccarone**
- 1799 Constituent analysis of the interaction of solvents with the leaving group anions for S_N1-E1 reactions. Thermodynamic evidence for the nature of the conjugate base of *p*-nitrophenylhydrazonomalononitrile **Yasuhiko Kondo, Shigekazu Kusabayashi, and Tsutomu Mitsuhashi**
- 1805 The effect of solvent interaction with the hydroxy group of saturated monohydroxy alcohols from measurement of hydroxy stretching vibrations **John F. Bacon and John H. van der Mass**
- 1809 Hydrolysis of 6-alkyl penicillins catalysed by β-lactamase I from *Bacillus cereus* and by hydroxide ion **Stephen C. Buckwell, Michael I. Page and Jethro L. Longridge**
- 1815 Hydrolysis of 7-substituted cephalosporins catalysed by β-lactamases I and II from *Bacillus cereus* and by hydroxide ion **Stephen C. Buckwell, Michael I. Page, Stephen G. Waley, and Jethro L. Longridge**
- 1823 Hydrolysis of 3-substituted cephalosporins catalysed by β-lactamases I and II from *Bacillus cereus* and by hydroxide ion **Stephen C. Buckwell, Michael I. Page, Jethro L. Longridge, and Stephen G. Waley**
- 1829 Stibonium and bismuthonium ylides. A comparison with arsonium and other ylides, also including the crystal structure of triphenylarsonium bis(phenylsulphonyl)methylide and triphenylarsonium and triphenylstibonium 4,4-dimethyl-2,6-dioxocyclohexylides **George Ferguson, Christopher Glidewell, Ian Gosney, Douglas Lloyd, Shirley Metcalfe, and Henri Lumbroso**
- 1839 Protonation equilibria of cardiotonic polyaza heterocycles **Paul Barraclough, David Firmin, Ramachandran Iyer, W. Richard King, John C. Lindon, Malcolm S. Nobbs, Steven Smith, Clifford J. Wharton, and Janet M. Williams**

- 1847 Stereoselectivity in the formation and allylic rearrangement of 8a-methyl- and 8a-ethyl-1,2,3,4,4a,7,8,8a-octahydro-naphthalenyl hydroperoxides **David V. Avila, Alwyn G. Davies, and Ian G. E. Davison**
- 1853 Catalysis of nucleophilic aromatic substitution reactions in mixed solvents. Part 1. Reaction of phenyl 2,4,6-trinitrophenyl ether with aniline in benzene–methanol mixtures: strong evidence against the ‘dimer’ mechanism **Olayinka Banjoko and Ibitola A. Bayeroju**
- 1859 Catalysis of the aromatic nucleophilic substitution reactions of anilines in aprotic solvents **Elizabeth T. Akinyele, Ikenna Onyido, and Jack Hirst**
- 1863 ¹³C and ¹⁵N Solution and solid-state nuclear magnetic resonance study of the intermolecular interactions in the 1:1 trimethoprim: sulphamethoxazole **Roberta Fruttero, Geoffrey E. Hawkes, Edward W. Randall, Alberto Gasco, and Christopher J. Groombridge**
- 1867 Electron spin resonance studies of the effect of copper(II) and copper(I) on the generation and reactions of organic radicals formed from the Fenton reaction and the Ti^{III}–H₂O₂ and Ti^{III}–S₂O₈²⁻ redox couples **Bruce C. Gilbert, Jonathan K. Stell, and Martin Jeff**
- 1875 Retentive solvolysis. Part 14. The methanol-perturbed phenolysis of optically active 2,2-dimethyl-1-(*p*-methoxyphenyl)-propyl *p*-nitrobenzoate. The mechanism and the structure of the second ion-pair intermediate **Tomomi Kinoshita, Koichi Komatsu, Keizo Ikai, Tsugunori Kashimura, Shogo Tanikawa, Atsufumi Hatanaka, and Kunio Okamoto**
- 1885 Non-conjugated bichromophoric systems. Part 4. Synthesis and photochemical study of bis-9-anthryls with a four-membered chain; influence of the replacement of methylene links by oxygen atoms or dimethylsilyl groups on the formation of intramolecular excimers and photocyclomers **Jean-Pierre Desvergne, Najib Bitit, Alain Castellan, Michael Webb, and Henri Bouas-Laurent**
- 1895 Homolytic reactions of ligated boranes. Part 10. Electron spin resonance studies of radicals derived from ligated aryl-boranes **Vikram Paul and Brian P. Roberts**

AUTHOR INDEX
