

Journal of Chemical Research, Issue 3, 1991

Other papers in the subject areas covered by *J. Chem. Soc.* are published in synopsis/microform format in *J. Chem. Research*. For the benefit of readers of *J. Chem. Soc.*, the contents list of *J. Chem. Research (S)*, Issue 3, is reproduced below.

- 53 X-Ray Structure Assignment of a Novel Cyclohept[*b*]indole-Methyl Propiolate Adduct (1 IND + 2 MP - C₂H₆O) formed by Skeletal Rearrangements **Michael C. K. Choi, Roy M. Letcher and Kung Kai Cheung**
(M 0517)
- 54 Condensation of Ethyl Mandelate with a Cinnamate Ester: Bicyclocarbolactone Formation **Paul T. Anastas, Bruce M. Foxman, Brian A. McKittrick and Robert Stevenson**
(M 0501)
- 56 Synthesis of Selectively Protected Derivatives of Shikimic and Quinic Acids **Evelyne Delfourne, Pierre Despeyroux, Liliane Gorrichon and Jacqueline Véronique**
(M 0532)
- 58 Cyclisation of Benzylaminonitriles. Part 8. Anhydrous Hydrogen Fluoride as Cyclising Agent **Melvin R. Euerby, James P. Gavin, Tiwalade A. Olugbade, Sanjay S. Patel and Roger D. Waigh**
(M 0545)
- 60 Substituent Effects on the n and π Molecular Orbitals of Methanimines. Photoelectron Spectra and Electronic Structures of Some Aliphatic Non-conjugated Diimines with Implications for their Photochemistry **Andreas J. Bittner and Paul Rademacher**
(M 0555)
- 62 The Synthesis and Regioselectivity of Elimination of Some 1,3-Difunctional Sulphoxides
(M 0601) **M. Akram Khan**
- 64 Diethyl Azidomalonate: Revised Synthesis and Reactivity of the Anion with Electrophiles **Jean-Michel Delacotte and Herve Galons**
(—)
- 66 Measurement of the Fluorescence Quenching Constants of 3-Nitrotyrosine with *N*-Acetyltryptophanamide **Richard V. Prigodich and Adil Sanaula**
(—)
- 68 An Electron Spin Resonance Study of the Radical Cation of Tetramethylsulphonamide [(Me₂N)₂SO₂^{•+}] and its Photofragmentation **Christopher J. Rhodes**
(—)
- 70 The Photocyanation of 2-Nitrothiophene and the Mechanism of Nucleophilic Aromatic Photosubstitution **Pedro Berci Filho, Miguel G. Neumann and Frank H. Quina**
(—)
- 72 Oxidative Behaviour of Glycerophosphates with Osmium(VIII) in Alkaline Medium
(—) **Kalyan Kali Sen Gupta and Balaram Ghosh**
- 74 Friedel-Crafts Alkylation using Montmorillonite-supported ZnCl₂, CuCl₂ and MgCl₂ Catalysts **Simon J. Barlow, James H. Clark, Maxine R. Darby, Adrian P. Kybett, Philip Landon and Keith Martin**
(—)
- 76 Complexing Ability of Pesticides and Related Compounds. Protonation of 1,2,4-Triazole in Aqueous Solutions of Sodium Perchlorate and Calcium Chloride at Different Temperatures and Ionic Strengths **Lorenzo Abate, Concetta De Stefano and Placido Mineo**
(—)
- 78 2,3-Dichloro-5,6-dicyano-1,4-benzoquinone (DDQ) as a Dehydrogenating Agent in the Synthesis of Benzofurancarboxylic Acids **Peter Stanetty and Gerhard Pürstinger**
(—)

N.B. The numbers in parentheses, prefaced by *M*, indicate the first frame occupied by the *full-text version* of the paper in *J. Chem. Research (M)*. Where no such number is given, the paper as published in *J. Chem. Research (S)* is complete in itself, and there is no extra material in Part *M*.

Dynamic Properties of Biomolecular Assemblies

Edited by S.E. Harding, *University of Nottingham* and A.J. Rowe, *University of Leicester*.

In this important new book the authors have sought to cover recent advances in a range of techniques that can be regarded as 'Dynamic' (Hydrodynamics, NMR, Dynamic Light Scattering, Fluorescence Anisotropy Decay and Electro-Optics), and their application to specific assemblies of biological macromolecules: assemblies involving proteins, nucleic acids and glycoconjugates. Some important advances in the capture and analysis of data (in many cases of the notoriously difficult 'multi-exponential' type) are identified. In vivo, assemblies of biological macromolecules do not always exist in a dilute solution environment – normally far from it – and some attention is paid to the dynamic properties of more concentrated dispersions.

Biochemical Approaches to Cellular Calcium

Methodological Surveys in Biochemistry and Analysis Volume 19(B)

Edited by Eric Reid, *Guildford Academic Associates*, G.M.W. Cook, *University of Cambridge* and J.P. Luzio, *University of Cambridge*.

Methodological Surveys in Biochemistry and Analysis is divided into two sub-series, A: Analysis and B: Biochemistry, which are published alternately. A: Focuses on determining drugs in body fluids, the study of trace organics, and subtle chromatography. B: Focuses on cellular aspects of biochemistry, with different themes relevant to biochemical pharmacology including endocrinology, pathology and muscle function. Each book is an integrated compendium of edited articles, with authoritative international authorship. All volumes contain a thorough subject index and sub-series A has an analyte index too.

Biotransformations

A Survey of the Biotransformations of Drugs and Chemicals in Animals

Edited by David R. Hawkins *Huntingdon Research Centre*

The series has been devised to provide an up-to-date survey of the literature on the biotransformation of pharmaceuticals, pesticides, food additives, and environmental and industrial chemicals in animals. The objective is to provide a comprehensive data base which will allow an increased awareness of patterns in species differences and the influence of chemical structure on biotransformation pathways.

The material has been collated into chemical classes but an additional feature is the definition and allocation of key functional groups for each compound. The functional groups selected are those commonly associated with biotransformation. Indexing these functional groups provides ready access to reports on compounds containing common structural features. An additional index of biotransformation processes and compound names further increases the accessibility of relevant information.

Calixarenes

Series: Monographs in Supramolecular Chemistry

By C. David Gutsche, *Washington University, St. Louis, USA*.

Description and Contents

Calixarenes is the first book to be published in the new 'Monographs in Supramolecular Chemistry' series and is also the first complete survey available of this rapidly developing field. It provides a fascinating and lively account of the history, development and applications of calixarenes, which are probably the world's most readily available synthetic molecular baskets. These basket-shaped compounds possess the ability to hold metal ions, as well as molecules, in their interior and as a result of their extraordinarily easy synthesis from phenols and aldehydes are receiving increasingly wide attention.
