

## Dedication

*Professor Michel Billy*

Members of the international ceramics community will have been much saddened to learn of the death in June 1991 of Professor Michel Billy. Professor Billy was, in addition to his many other roles, one of the founding fathers of the series of meetings 'Journées d'Etudes sur les Nitrures'. The special issues of the Journal which contain work from the most recent of these meetings (JENI 8) are respectfully dedicated to his memory.

F.T.
