	89	Editorial
		<i>Synthesis</i>
<b>L.G. Sneddon, M.J. Pender, K.M. Forsthoefel, U. Kusari and X. Wei</b>	91	Design, syntheses and applications of chemical precursors to advanced ceramic materials in nanostructured forms
<b>M. Hörz, A. Zern, F. Berger, J. Haug, K. Müller, F. Aldinger and M. Weinmann</b>	99	Novel polysilazanes as precursors for silicon nitride/silicon carbide composites without “free” carbon
<b>D. Cornu, S. Bernard, S. Duperrier, B. Toury and P. Miele</b>	111	Alkylaminoborazine-based precursors for the preparation of boron nitride fibers by the polymer-derived ceramics (PDCs) route
<b>J. Clade, E. Seider and D. Sporn</b>	123	A new type of precursor for fibers in the system Si–C
		<i>Characterisation</i>
<b>C. Gervais, E. Framery, C. Duriez, J. Maquet, M. Vaultier and F. Babonneau</b>	129	<sup>11</sup> B and <sup>15</sup> N solid state NMR investigation of a boron nitride preceramic polymer prepared by ammonolysis of borazine
<b>B. Toury, D. Cornu, F. Chassagneux and P. Miele</b>	137	Complete characterisation of BN fibres obtained from a new polyborylborazine
<b>Y.D. Blum, D.B. MacQueen and H.-J. Kleebe</b>	143	Synthesis and characterization of carbon-enriched silicon oxycarbides
<b>A. Hilbig, E. Müller, R. Wenzel, G. Roewer, E. Brendler, G. Irmer and G. Schreiber</b>	151	The microstructure of polymer-derived amorphous silicon carbide layers
<b>P. Miele, B. Toury, F. Chassagneux and R. Fulchiron</b>	157	Correlation between structural features and mechanical properties of boron nitride fibres derived from alkylaminoborazines
<b>P. Kroll</b>	163	Modelling polymer-derived ceramics
		<i>Processing and Properties</i>
<b>M. Scheffler, R. Bordia, N. Travitzky and P. Greil</b>	175	Development of a rapid crosslinking preceramic polymer system
<b>O. Goerke, E. Feike and H. Schubert</b>	181	Spray winding, a novel one-step spray-technology to perform CMCs from preceramic polymers
<b>A. Herzog, M. Thünemann, U. Vogt and O. Beffort</b>	187	Novel application of ceramic precursors for the fabrication of composites
<b>T. Friedel, N. Travitzky, F. Niebling, M. Scheffler and P. Greil</b>	193	Fabrication of polymer derived ceramic parts by selective laser curing
<b>M. Schulz, M. Börner, J. Haußelt and R. Heldele</b>	199	Polymer derived ceramic microparts from X-ray lithography—cross-linking behavior and process optimization
<b>G. Stantshev, M. Frieß, R. Kochendörfer and W. Krenkel</b>	205	Long fibre reinforced ceramics with active fillers and a modified intra-matrix bond based on the LPI process

<b>T. Jäschke and M. Jansen</b>	211	Improved durability of Si/B/N/C random inorganic networks
<b>R. Gadow, F. Kern and H. Ulutas</b>	221	Mechanical properties of ceramic matrix composites with siloxane matrix and liquid phase coated carbon fiber reinforcement
<b>H. Schmidt, W. Gruber, G. Borchardt, P. Gerstel, A. Müller and N. Bunjes</b>	227	Coarsening of nano-crystalline SiC in amorphous Si–B–C–N
		<i>Products I</i>
<b>Q.-M. Cheng, L.V. Interrante, M. Lienhard, Q. Shen and Z. Wu</b>	233	Methylene-bridged carbosilanes and polycarbosilanes as precursors to silicon carbide—from ceramic composites to SiC nano-materials
<b>S.R. Shah and R. Raj</b>	243	Nanodevices that explore the synergies between PDCs and carbon nanotubes
<b>S. Bernard, M. Weinmann, D. Cornu, P. Miele and F. Aldinger</b>	251	Preparation of high-temperature stable Si–B–C–N fibers from tailored single source polyborosilazanes
		<i>Products II</i>
<b>Y. Iwamoto, K. Sato, T. Kato, T. Inada and Y. Kubo</b>	257	A hydrogen-permselective amorphous silica membrane derived from polysilazane
<b>B. Toury and F. Babonneau</b>	265	Synthesis of periodic mesoporous organosilica from bis(triethoxysilyl)methane and their pyrolytic conversion into porous SiCO glasses
<b>M. Wilhelm, C. Soltmann, D. Koch and G. Grathwohl</b>	271	Ceramers—functional materials for adsorption techniques
<b>G.D. Sorarù, Y. Zhang, M. Ferrari, L. Zampedri and R.R. Gonçalves</b>	277	Novel Er-doped SiC/SiO <sub>2</sub> nanocomposites: Synthesis via polymer pyrolysis and their optical characterization
<b>A. Gaudon, A. Dauger, A. Lecomte, B. Soulestin and R. Guinebretière</b>	283	Phase separation in sol–gel derived ZrO <sub>2</sub> –SiO <sub>2</sub> nanostructured materials
<b>S. Mondal and A.K. Banthia</b>	287	Low-temperature synthetic route for boron carbide
