The authors regret that errors occurred in the published article indicated above. The corrections are shown below. The rate of normalized degree of curvature, \dot{k} , of the bilayer was predicted using Ref. 54:

$$\dot{k} = \frac{d([t_1 + t_2]/r)}{dt} = \frac{6(m+1)^2 mn}{m^4 n^2 + 2mn(2m^2 + 3m + 2) + 1} \Delta \dot{\epsilon} \quad (5)$$
