

New and Recent Titles in Bioinorganic Chemistry

Environmental Inorganic Chemistry

edited by K. J. Irgolic and A. E. Martell
1985. XIV, 654 pages with 105 figures and
102 tables. Hardcover. DM 230.00.
ISBN 3-527-26194-X

The Chemistry and Biochemistry of N-Substituted Porphyrins

by D. K. Lavalley
1987. X, 313 pages with 45 figures and
51 tables. Hardcover. DM 89.00.
ISBN 3-527-26693-3

The Bioinorganic Chemistry of Nickel

edited by J. R. Lancaster
1988. Ca 400 pages with 99 figures and 32 tables. Hardcover. Ca DM 156.00. ISBN 3-527-26692-5
Fourteen articles by leading researchers constitute the first book exclusively devoted to the biological
utilization of nickel. The articles range from the chemistry and physics of nickel complexes in general
to the roles of this metal in cellular catalytic phenomena.
The book's purpose is to provide extensive background for nonspecialists, as well as insight into the
possible future research directions. The contributions are broad-based and in some cases speculative,
rather than merely compendia of recent data.

Iron Transport in Microbes, Plants and Animals

edited by G. Winkelmann,
D. van der Helm and J. B. Neilands
1987. XXIV, 533 pages with 193 figures and 72 tables.
Hardcover. DM 198.00. ISBN 3-527-26685-2

Frontiers in Bioinorganic Chemistry

edited by A. V. Xavier
1986. XIII, 736 pages with 230 figures and
96 tables. Hardcover. DM 185.00.
ISBN 3-527-26460-4

In preparation: Iron Porphyrins and Spectroscopy of Iron Porphyrins and Proteins

both titles edited by H. B. Gray and A. B. P. Lever
