

INTERNATIONAL CONFERENCE

High Temperature High Pressure Electrochemistry
in Aqueous Solutions

An international meeting on high temperature high pressure electrochemistry in aqueous solutions will be held January 7–12, 1973 at the University of Surrey, England. This subject is pertinent to high temperature corrosion, geochemistry, fuel cells, high temperature synthesis, catalysis, and desalination. This will be an international interdisciplinary conference.

The meeting is sponsored by the Central Electricity Research Laboratory (UK), the University of Surrey (UK), and the National Association of Corrosion Engineers (USA). The proceedings will be published as a part of NACE's subject area conferences.

Abstracts for contributed papers are due May 30, 1972. Accepted papers will be announced June 30, 1972.
