

## NOTICES

### *The Society for Advancement of Electrochemical Science and Technology, India*

The Society for Advancement of Electrochemical Science and Technology, India will be organizing an international symposium on 'Industrial Electrochemistry' during November 1976 at Madras, India. The duration of the symposium will be four days. A maximum of 60 papers, both invited and contributed, will be presented during the symposium. An exhibition and industrial visits are also planned. The topics covered will be:

1. New developments in power sources;
2. Electro-inorganic and organic chemical industries;
3. Electro-winning and refining of metals;
4. Engineering aspects of electrochemical systems, scale-up and optimization;
5. Pollution control;
6. Industrial electrocoatings;
7. Semi-conductors;
8. Bioelectrochemistry;
9. Economics — country-wise and regionwise surveys.

### *Australian Corrosion Conference 16*

22–26 November 1976 at University of Auckland, New Zealand.

### *The Third Euechem Meeting*

The third Euechem meeting on Organic Electrochemistry will be held at the Atholl Palace Hotel, Pitlochry, Scotland, from Monday 23rd–Friday 27th May, 1977. The topic of the meeting will be organic electrosynthesis and the programme will include discussion of both preparative and mechanistic aspects of this subject. The total costs per person (including accommodation, meals and registration) should be approximately £105. Please inform Dr D. Pletcher, Department of Chemistry, The University, Southampton, England, if you would like further information.
