

## NOTICE

### *Electrochemical Process Engineering Course*

This course will be held in the Department of Chemical Engineering at The University of Newcastle upon Tyne on 6–10 July 1981. It will place considerable emphasis on industrial aspects of electrochemistry and electrochemical engineering and cover the following topics: a brief introduction to electrochemistry; flowsheets, mass and energy balances; cell design, materials and costs; scale-up of cells and their optimization; micro-processor applications; process costing; membrane technology; electrochemical engineering aspects of metal winning, chlorine production and organic electrosynthesis.

Lectures will be supplemented by a comprehensive programme of laboratory work on pilot-plant-scale equipment, and there will be ample opportunity for discussion with the course lecturers.

Further details may be obtained from:

Dr J. R. Backhurst,
