

Index to Volume 33 (2003)

The subject index has been organized into topics for easy reference.

Subject Index 2003

Corrosion and prevention

- Corrosion behaviour of tantalum in sodium hydroxide solutions 37
Inhibition of acid corrosion of steel using cetylpyridinium chloride 171
Protection of copper corrosion by carbazole and *N*-vinylcarbazole self-assembled films in NaCl solution 179
Corrosion inhibition by fatty acid triazoles for mild steel in formic acid 233
Corrosion resistance of compositionally modulated multilayered Zn–Ni alloys deposited from a single bath 239
Indole and 5-chloroindole as inhibitors of anodic dissolution and cathodic deposition of copper in acidic chloride solutions 287
Aspects of electrochemical behaviour of carbon steel in different Bayer plant solutions 311
Corrosion behaviour of AB₅-type hydride electrodes in alkaline electrolyte solution 325
Electrochemical studies of magnetite coating on carbon steel in ascorbic and picolinic acid 333
Synergistic effect of 2-mercapto benzimidazole and KI on copper corrosion inhibition in aerated sulfuric acid solution 361
Electroactive polymer films for stainless steel corrosion protection 533
An EXAFS investigation of molybdate-based conversion coatings 553
AISI 304 L stainless steel decontamination by a corrosion process using cerium IV regenerated by ozone. Part I: Study of the accelerated corrosion process 703
AISI 304 L stainless steel decontamination by a corrosion process using cerium IV regenerated by ozone. Part II: Process optimization 709
Potential dependent selective dissolution of Ti–6Al–4V and laser treated Ti–6Al–4V in acid/chloride media 817
Hydrophobic interfacial layers for improvement of corrosion protection by polymeric coatings 1063
A nonlinear kinetic model introduced for the corrosion inhibitive properties of some organic inhibitors 1137
Hector bases – a new class of heterocyclic corrosion inhibitors for mild steel in acid solutions 1163
Corrosion inhibition of mild steel by benzotriazole derivatives in acidic medium 1175
The performance of a migrating corrosion inhibitor suitable for reinforced concrete 1183
Effect of resistivity on the corrosion mechanism of mild steel in sodium sulfate solutions 1229

Effluent and water treatment

- Chemical and electrochemical considerations on the removal process of hexavalent chromium from aqueous media 61
Electrolytic decomposition of amaranth dyestuff using diamond electrodes 85
Removal of toxic chromate ions by the films of poly(1,8-diaminonaphthalene) 113
Influence of various parameters on the electrochemical treatment of landfill leachates 155
Electrolytic reduction of trichloroethylene and chloroform at a Pt- or Pd-coated ceramic cathode 161
Electrochemical reduction of As(III) and As(V) in acidic and basic solutions 483
Anodic oxidation of 2,4-dihydroxybenzoic acid for wastewater treatment 693
Electrochemical treatment of wastewater containing phenolic compounds: oxidation at boron-doped diamond electrodes 885
Electrochemical reduction of indigo in fixed and fluidized beds of graphite granules 901
Electrochemical oxidation of several chlorophenols on diamond electrodes. Part I. Reaction mechanism 917
Selective oxidation of pentachlorophenol on diamond electrodes 951
Electrochemical decomposition of ppb level trihalomethane in tap water 1049
Electrochemical oxidation of *p*-chlorophenol on SnO₂–Sb₂O₅ based anodes for wastewater treatment 1211
Reduction of hexavalent chromium using polyaniline films. Effect of film thickness, potential and flow velocity on the reaction rate and polymer stability 1217

Electrocatalysis and kinetics

- Preparation of methanol oxidation electrocatalysts: ruthenium deposition on carbon-supported platinum nanoparticles 1
Electrochemical oxidation of water on synthetic boron-doped diamond thin film anodes 151
Degradation kinetics of ascorbic acid during ohmic heating with stainless steel electrodes 187
Electrooxidation of methanol at platinum–ruthenium catalyst prepared from colloidal precursors: Atomic composition and temperature effects 419
Electroreduction of oxygen on mercury in the presence of titanium silicalite, TS-1 443
Electrochemical reduction of CO₂ at Pb- and Sn-electrodes in a fixed-bed reactor in aqueous K₂CO₃ and KHCO₃ media 447
Influence of surface inhomogeneities of boron doped CVD-diamond electrodes on reversible charge transfer reactions 959
Electrochemical study and complete factorial design of Toluidine Blue immobilized on SiO₂/Sb₂O₃ binary oxide 1069
Effects of process conditions and electrode material on reaction pathways for carbon dioxide electroreduction with particular reference to formate formation 1107
Methanol oxidation at Pt/MoO_x/MoSe₂ thin film electrodes prepared with exfoliated MoSe₂ 1191
Electrochemical reduction of carbon dioxide at ruthenium dioxide deposited on boron-doped diamond 1205

Electrochemical engineering

- The effect of corrugated membranes on salt splitting 411
 Ohmic interelectrode voltage drop in alumina reduction cells 563
 A mathematical model of multiple ion transport across an ion-selective membrane under current load conditions 675
 Mathematical simulation of a vertically moving particle bed electrochemical cell 839
 Investigation of transport phenomena in a hybrid ion exchange-electrodialysis system for the removal of copper ions 875
 Accelerated degradation testing of gas diffusion electrodes for the chlor-alkali process 929
 Development of an integrated process for electrochemical reaction and chromatographic SMB-separation 939

Electrochemical synthesis

- Post-discharge plasma-chemical oxidation of Iron(II) complexes 73
 Electrochemical oxidation of simple indoles at a PbO₂ anode 79
 A new approach to electrochemical production of benzaldehyde from toluene in an undivided cell in the presence of the couple V⁵⁺/V⁴⁺ 273
 Electrochemical synthesis and structural studies of polypyrroles, poly(3,4-ethylenedioxythiophene)s and copolymers of pyrrole and 3,4-ethylenedioxythiophene on carbon fibre microelectrodes 295
 Electrochemical behaviour of Mn³⁺/Mn²⁺, Co³⁺/Co²⁺ and Ce⁴⁺/Ce⁴⁺ redox mediators in methanesulfonic acid 319
 Electropolymerization of aniline on carbonized polyacrylonitrile aerogel electrodes: applications for supercapacitors 465
 Electroorganic reactions. Part 57. DDQ mediated anodic oxidation of 2-methyl- and 2-benzyl-naphthalenes 525
 Electrocatalytic hydrogenation of cyclohexanone: Simple dynamic cell design 541
 Electrocoagulation and recovery of tannins from tree barks 647
 Electrosynthesis of hydrogen peroxide in acidic solutions by mediated oxygen reduction in a three-phase (aqueous/organic/gaseous) system. Part I: Emulsion structure, electrode kinetics and batch electrolysis 655
 Electrosynthesis of hydrogen peroxide in acidic solutions by mediated oxygen reduction in a three-phase (aqueous/organic/gaseous) system. Part II: Experiments in flow-by fixed-bed electrochemical cells with three-phase flow 665
 Paired electrooxidation IV. Decarboxylation of sodium gluconate to D-arabinose 741
 Thermally coated Ti/TiO₂ as cathode material for the synthesis of succinic and dihydrophthalic acids 831
 Hydrodehalogenation of 2,4-dibromophenol by electrochemical reduction 893
 Catalytic epoxidation with electrochemically *in situ* generated hydrogen peroxide 933
 Electro-organic synthesis without supporting electrolyte: Possibilities of solid polymer electrolyte technology 969
 Electrochemical synthesis of EDOT-ECZ-EDOT copolymer on carbon fiber micro-electrodes 1223

Energy conversion, batteries and fuel cells

- H₂/Cl₂ fuel cell for co-generation of electricity and HCl 9
 An environmentally friendly water-activated manganese dioxide battery 15
 New structures of thin air cathodes for zinc-air batteries 29
 An electrochemical investigation of sintered thick metal hydride electrode for oxygen-metal hydride semi-fuel cell applications 101
 Submicro-sized LiMn₂O₄ prepared by a sol-gel, spray-drying method 107
 Influence of electrolyte additives on safety and cycle life of rechargeable lithium cells 143
 Development of a novel redox flow battery for electricity storage system 197
 Effect of ambient conditions on performance and current distribution of a polymer electrolyte membrane fuel cell 265
 Influence of alloying additives on the performance of commercial grade aluminium as galvanic anode in alkaline zincate solution for use in primary alkaline batteries 303
 Operating characteristics of aqueous magnetite electrochemical capacitors 345
 Electrooxidation of Mn(II) to MnO₂ on graphite fibre electrodes 387
 Electrochemical properties of Li ion polymer battery with gel polymer electrolyte based on polyurethane 491
 Effect of copper additive on Zr_{0.9}Ti_{0.1}V_{0.2}Mn_{0.6}Cr_{0.05}Co_{0.05}Ni_{1.2} alloy anode for nickel-metal hydride batteries 497
 Effects of a fuel cell test on the structure of irradiation grafted ion exchange membranes based on different fluoropolymers 505
 Calculation of the oxygen potential profile across solid-state electrochemical cells 571
 γ -Butyrolactone-ethylene carbonate based electrolytes for lithium-ion batteries 589
 Effects of the stoichiometric ratio of aluminium and manganese on electrochemical properties of hydrogen storage alloys 619
 Comparison of pH 6 potentials, alkaline potentials and initial open circuit voltages of electrolytic MnO₂ 717
 Preparation of alkaline PVA-based polymer electrolytes for Ni-MH and Zn-air batteries 777
 Mass transport in the cathode of a free-breathing polymer electrolyte membrane fuel cell 979
 Neutralization of used Li batteries: Anodic dissolution of the iron-nickel alloy positive pins of Li-SOCl₂ batteries in seawater 989
 Lead-coated glass fibre mesh grids for lead-acid batteries 1057
 Poly(acrylonitrile-methyl methacrylate) as a non-fluorinated binder for the graphite anode of Li-ion batteries 1099
 Electrochemical properties of layered Li[Ni_{1/2}Mn_{1/2}]O₂ cathode material synthesised by ultrasonic spray pyrolysis 1169

Instruments, sensors, methods

- Electrochemical detection of large channels in porous rocks 51
 Voltammetry in electrolyte-free liquids using a three-electrode probe with a sol-gel matrix 121
 Electrochemical reduction of vinyl chloride on a Au/porous alumina plate/Pt electrode assembly in nonaqueous electrolytes: Toward the development of gas sensors 253
 Cu(II) selective sensor based on 5,7,12,14-tetramethyldibenzo[b,i]-1,4,8,11-tetraazacyclotetradecane in PVC matrix 381
 Electrodiffusion detection of the near-wall flow reversal in liquid films at the regime of solitary waves 577
 Enrichment of ⁴¹K isotope in potassium formed on and in a rhenium electrode during plasma electrolysis in K₂CO₃/H₂O and K₂CO₃/D₂O solutions 643

Simultaneous determination of dopamine and serotonin in the presence of ascorbic acid and uric acid at poly(*o*-phenylenediamine) modified electrode 759

A thermodynamic approach to calculate the yttria-stabilized zirconia pH sensor potential 1025

Mass transfer and hydrodynamics

Study of mass transfer in a vertically moving particle bed electrode 205

Laminar and turbulent mass transfer simulations in a parallel plate reactor 863

Materials electrochemistry

Optimization of chemical and electrochemical parameters for the preparation of *n*-type Bi₂Te_{2.7}Se_{0.3} thin films by electrodeposition 23

Preparation and characterization of polyaniline powder synthesized on microstructured aluminium 355

Electroconductive coatings on porous ceramic supports 475

Preparation and electrochromic properties of V–Nb mixed-oxide films by evaporation 515

Electrochemical hydrogen permeation on steel sheets with *in situ* electrodeposition of a Pd layer at the exit side 613

Purification of carbon nanotubes using anodic oxidation in a solid polymer electrolyte (SPE) cell 755

The electroformation of Zr metal, Zr–Al alloy and carbon films on ceramic 785

Electrochemical characterization of galvanically coupled single phases and nanocrystalline NdFeB-based magnets in NaCl solutions 795

Effect of crystal structure on the electrochemical behaviour of synthetic semiconductor diamond: Comparison of growth and a nucleation surfaces of a coarse-grained polycrystalline film 909

Structural characterization and electrocatalytic properties of Au₃₀Zr₇₀ amorphous alloy obtained by rapid quenching 995

The role of defects, or active states, in surface electrochemistry with particular reference to gold in neutral solution 1125

Water phase sensitization of nanoporous TiO₂ film 1239

Metal and alloy deposition and dissolution

Hydrogen coevolution and permeation in nickel electroplating 93

Unusual cavity shapes resulting from multistep mass transport controlled dissolution: Numerical simulation and experimental investigation with titanium using oxide film laser lithography 135

Detection and characterization of molybdenum oxides formed during the initial stages of cobalt–molybdenum electrodeposition 245

Electrochemical investigations of copper behaviour in different cupric complex solutions: Voltammetric study 339

Anodic linear sweep voltammetric analysis of Ni–Co alloys electrodeposited from dilute sulfate baths 367

Effect of benzylideneacetone on the electrodeposition mechanism of Zn–Co alloy 373

A study of copper deposition in the presence of Group-15 elements by cyclic voltammetry and Auger-electron spectroscopy 393

Anisotropic copper etching with monoethanolamine-complexed cupric ion solutions 403

Influence of agarose on the electrochemical behaviour of the silver and platinum aqueous acid electrolyte interface 431

Electrochemical investigations on the influence of electrolyte composition of Watts baths with special regard to throwing power 457

Electroplating of copper onto a preanodized 7005Al/Al₂O_{3(P)} metal matrix composite 597

Structural and electrochemical characterization of mechanochemically synthesized calcium zincate as rechargeable anodic materials 607

Electrodeposition of noncrystalline cobalttungsten alloys from citrate electrolytes 627

Effect of nucleation mode on the morphology and texture of electrodeposited zinc 635

Kinetics of copper electrodeposition in the presence of triethyl-benzyl ammonium chloride 685

Multiple-step constant current density electrodeposition of continuous metal material with high porosity 725

The effect of current density on properties of electrodeposited nanocrystalline nickel 733

Electrodeposition of Au–Sn alloys from acid Au(III) baths 747

An electrochemical study of the dissolution of gold in thiosulfate solutions. Part I: Alkaline solutions 767

Electroless Ni–P composite coatings 807

Void-free anisotropic deposition for IC interconnect with polyethylene glycol as the single additive based on uneven adsorption distribution 823

Investigation of electroless plating of Ni–W–P alloy films 1001

Electrodeposition and characterization of thin layers of Zn–Co alloys obtained from glycinate baths 1035

Electrodeposition of antimony in a water-stable 1-ethyl-3-methylimidazolium chloride tetrafluoroborate room temperature ionic liquid 1077

Electrodeposition of Co–Cu alloy coatings from glycinate baths 1085

Effect of pulse plating on composition of Sn–Pb coatings deposited in fluoroborate solutions 1143

Electrodeposition of copper–zinc alloys in pyrophosphate-based electrolytes 1155

Effect of electrolysis conditions on the deposition of silver–bismuth alloys 1199

Mineral and metallurgical electrochemistry

Effects of cobalt, temperature and certain impurities upon cobalt electrowinning from sulfate solutions 43

A study of copper electrowinning parameters using a statistically designed methodology 217

Electrochemical remediation of acid mine drainage 259

Removal and recovery of copper via a galvanic cementation system. Part I: Single-pass reactor 279

Simultaneous recovery of Pb and PbO₂ from battery plant effluents. Part II 853

Anodic behaviour of arsenopyrite and cathodic reduction of ferrate(VI) and oxygen in alkaline solutions 1017

Electrical conductivity and density of NiSO₄/H₂SO₄ solutions in the range of modern nickel electrorefining and electrowinning electrolytes 1043

The use of electrochemical noise measurements to detect bad copper electrorefining conditions 1093

Molten salt electrochemistry

Behaviour of multicomponent lead–tin alloys under cathodic polarization in a sodium hydroxide melt 519

Exploration of molten hydroxide electrochemistry for thermal battery applications 1011
