3–7 July 2006
University of Southampton, UK
Short Course on Modern Applications of Electrochemistry:
Electrochemistry, Electrochemical Engineering &
Electrochemical Technology

- Fundamental concepts in electrochemistry
- Industrial applications of electrochemical technology
- Scale-up and cell design
- Electrode and membrane materials
- Typical cell designs
- Performance of electrochemical reactors
- Fuel cells
- Electrodeposition of nanostructures/nanotechnology
- Electrochemical sensors and biosensors

27 August–01 September 2006

Edinburgh, UK

57th Annual Meeting of the International Society of Electrochemistry: Innovative Electrochemistry, Enterprising Science

- Batteries and supercapacitors
- Computational electrochemistry
- Electroanalysis and sensors
- Enterprise and innovation
- In-situ techniques
- Industrial electrochemistry and electrochemical technology
- Liquid–liquid electrochemistry
- Membranes and ion-conductive polymers
- Surface chemistry and dynamics of electrocatalysis
- Sustainable energy

6–11 May 2007

Chicago, USA

211th Meeting of the Electrochemical Society

- Electronics and photonics/electrodeposition
- ULSI process integration
- SOI device technology
- Compound semiconductors

- Processes at the compound semiconductor/solution interface
- High temperature materials: ionics and mixed conduction
- Luminescence and display materials: persistent phosphors
- Organic and biological nanosystems
- Sensors, actuators, and microsystems
- Sensors based on nanotechnology
- Design of electrode structures

NEWS ITEMS

7th Hellmuth Fischer Medal – Call for Nominations

Preference is given to younger scientists for work that has contributed towards extending or deepening the fundamentals of electrochemistry, corrosion or corrosion protection or towards their industrial application. Previous medallists were Prof Dr Ulrich Stimming (1989), Prof Dr Klaus-Michael Jüttner (1991), Dr Roger

Newman (1994), Dr Philippe Allongue (1997), Prof R M Penner (2000) and Prof Dr Nongjian Tao (2003). Nominations for candidates should be accompanied by a curriculum vitae, reprints of important publications, a list of publications and a brief statement for the reasons for the nomination (approximately 1 typed page). Nominations for the medal, with supporting documentation, should be submitted, *by 1 November 2005*, to Professor Dr G. Kreysa, DECHEMA eV, PO Box 15 01 04, D-60061, Frankfurt am Main, Germany. The final decision on the award lies with the selection Committee, which is composed of six distinguished scientists. The medal will be presented on the occasion of the 10th International Fischer Symposium on Electrochemical Aspects of Biological and Nanoscopic Structures at Kloster Benediktbeuren, Germany, 23–28 July 2006.

Please send details of relevant meetings and other worthy news to the News Editor: Professor Frank C. Walsh, Electrochemical Engineering Group, School of Engineering Sciences, University of Southampton, Highfield, Southampton SO17 1BJ, UK. (Email: F.C.Walsh@soton.ac.uk).

BOOK REVIEWS

Subject areas relevant to the Journal's interests include: environmental electrochemistry, recycling and removal of contaminants, batteries, fuel cells and electrochemical energy conversion, corrosion and protection of metals, electrosynthesis (of organics, inorganics, metals, alloys, polymers, ceramics and composites), electrodeposition of metals, conductive polymers and composites, electrocatalysis, photo- and semiconductor electrochemistry, electrochemical engineering and reactor design, electrode materials and coatings, electrochemical techniques, electrochemical sensors and monitors.

Publishers are invited to send copies of new books for review in this journal to Professor Frank C. Walsh, Electrochemical & Surface Engineering Groups, School of Engineering Sciences, University of Southampton, Highfield, Southampton SO17 1BJ, UK. (Email: F.C.Walsh@soton.ac.uk).
