### Erratum to: J Appl Electrochem (2007) DOI 10.1007/s10800-007-9421-2

Unfortunately some mistakes were introduced during the typesetting of Tables 5 and 6. Please find the corrected versions below.

**Table 5** Selectivity of alkali insoluble perfluoro products obtained from ECPF of *n*-alkane carboxylic acid chlorides

No.	Reactants	<sup>b</sup> Perfluorinated products obtained from alkali insoluble fraction/mole %				
		Perfluoro- <i>n</i> -alkane	Perfluoro- iso-alkane	Perfluoro oxolane	Perfluoro oxane	<sup>a</sup> Other cleavage products
1.	<i>n</i> -hexanoyl chloride	40.4	4.7	23.4	5.9	26.4
2.	<i>n</i> -heptanoyl chloride	38.9	3.4	25.0	6.2	26.5
3.	<i>n</i> -octanoyl chloride	43.6	9.8	22.2	3.7	20.7
4.	<i>n</i> -nonanoyl chloride	41.3	10.9	20.9	3.4	23.5
5.	<i>n</i> -decanoyl chloride	39.5	11.5	18.2	4.2	26.7

*Note.* Perfluoro oxolane (Five membered cyclic ether) is more than Perfluoro oxane (six membered cyclic ether)

<sup>a</sup> Other cleavage products are mainly lower alkanes

<sup>b</sup> Based on  $^{19}\text{F}$  NMR
