

CONTENTS OF NEXT ISSUE

PMM Vol.22, No.6, 1958

- V.A. EGOROV: On Bonnet's theorem
- V.D. ANDREEV: On a case of small vibrations of a physical pendulum with a movable point of support
- A.A. BOGOIAVLENSKII: On some particular solutions of the problem of motion of a heavy rigid body about a fixed point.
- M.A. AIZERMAN and F.R. GANTMAKHER: On stability of periodic motions
- Kh.A. RAKHMATULIN: On propagation of elastoplastic waves for complex loading
- R.A. ALEKSANDRIAN, N.Kh. ARUTIUNIAN and M.M. MANUKIAN: Torsion of thin-walled shafts with closed profile under conditions of unsteady creep
- B.M. BULAKH: Nonlinear conical gas flows
- V.S. VOITSENIA: A problem of vibrations of a body below the surface of separation of two liquids
- V.S. ROGOZHIN: Sufficient conditions of univalence of solutions of inverse boundary value problems
- I.A. BIRGER: On a method of solution of integral equations for large values of the parameter
- G.I. KOPZON: Vibration of a thin rectangular wing of large aspect ratio in supersonic flow
- M.D. KHASKIND and V.S. KHOMENKO: Supersonic constrained flow around a profile
- A.S. GINEYSKII and E.E. SOLODKIN: The influence of transverse surface curvature on the characteristics of an axially-symmetric turbulent boundary layer
- E.V. BULYGINA: On the problem of the wing of given volume with minimum wave resistance
- L.M. FLITMAN: On a mixed boundary value problem for the wave equation
- V.P. ALEKSEEVSKII: On a problem of the theory of jets

- I.M. IUR'EV: On the analysis of plane nozzles
- V.N. GOLUBENKOV: Thermal convection in a rotating circular tube for constant temperature gradient (compressible liquid)
- L.A. ROZIN: Approximate method of analysis of non-stationary turbulent boundary layer in an incompressible liquid
- V.I. MOSSAKOVSKII and B.L. RVACHEV: On the problem of horizontal hydrodynamic impact of a sphere
- D.D. IVLEV: On the construction of the theory of ideal plasticity
- V.S. ANTSIFEROV: Self-similar problem of penetration of a rigid body into the ground
