

CONTENTS OF NEXT ISSUE

PMM Vol.23, No.1, 1959

- V.S. PUGACHEV: Method of solution of the basic integral equation of the statistical theory of optimum systems in finite form
- V.A. IAKUBOVICH: The method of a small parameter for canonical systems with periodic coefficients
- A.L. GOL'DENVEIZER: Asymptotic integration of linear partial differential equations with a small main part
- A.Iu. ISHLINSKII: On autonomous determination of the location of a moving object by means of a space gyroscopic compass, a directional gyroscope and integration equipment
- G.I. MAIKAPAR: Taking into account centrifugal forces on air pressure acting on a body of arbitrary shape, situated in a supersonic flow
- M.N. KOGAN: Magnetodynamics of plane and axisymmetric gas flows with infinite electric conductivity
- V.N. ZHIGULEV: Analysis of weak explosions in magnetohydrodynamics
- O.S. RYZHOV and S.Iu. CHERNIAVSKII: On reflection of weak explosions from the nozzle center
- N.N. KOCHINA and N.S. MEL'NIKOVA: On piston expansion in water
- Ia.S. UFLIAND: Elastic equilibrium of an infinite body, weakened by an external circular slit
- D.I. SHERMAN: On transverse bending of a plate, supported along a contour composed of several closed curves
- N.A. KIL'CHEVSKII: Integro-differential and integral equations of equilibrium of thin elastic shells
- V.S. ZHGENTI: A study of the equations of equilibrium of thin elastic shells of positive Gaussian curvature
- L.A. TOLOKONNIKOV: Finite plastic deformations of an incompressible material
- M.S. KORNISHIN and Kh.M. MUSHTARI: On an algorithm for the solution of nonlinear problems of the theory of shallow shells

Iu.N. RABOTNOV: A model illustrating some properties of a hardening plastic body

V.L. RVACHEV: On pressure on elastic semi-space of a disc which has the plan form of a wedge

G.S. SHAPIRO: Impact on a ring-shaped rigid-plastic plate

V.S. NOVOSELOV: Motion of gyroscopic systems

A.I. OGURTSOV: On stability of solutions of two nonlinear differential equations of third and fourth orders

S.S. KVASHNINA and G.G. CHERNYI: Steady flow of a detonating gas past a cone

E.V. RIAZANOV: On the solutions of the equation of magnetohydrodynamics, describing one-dimensional, axisymmetric motions of a gravitating gas

S.K. ASLANOV and V.A. LEGKOVA: Flow of a gas jet from a vessel of finite width

V.V. LUNEV: On similarity of viscous gas flows with high supersonic velocities past thin bodies

G.L. GRODZOVSKII, A.N. DIUKALOV, V.V. TOKAREV and A.I. TOLSTYKH: Self-similar motion of a gas with shock waves, propagating with constant velocity through a gas at rest

I.M. IUR'EV: On the theory of plane gas flows
