

## CONTENTS OF NEXT ISSUE

*PMM Vol. 24, No. 5, 1960*

- I.L. KHMELEVSKII: On Hamilton's principle for nonholonomic systems
- V.I. KIRGETOV: On purely elastic impact of material systems
- V.N. KOSHLIAKOV: On an asymptotic solution of the equations of motion of a gyroscopic compass
- A.M. TABAROVSKII: On the stability of motion of Foucault gyroscopes with two degrees of freedom
- V.M. MATROSOV: On the stability of gyroscopic stabilizers
- I.Ia. KATS and N.N. KRASOVSKII: On the stability of systems with random parameters
- L.M. GORBUNOV: On isochronous suspension of the pendulum in a clock
- V.V. BOLOTIN: Edge effect in vibrating elastic shells
- A.M. KOSEVICH and L.V. TANATAROV: Plastic deformation and irreversible changes in a solid body under local melting. A point heat source
- G.I. BARENBLATT, Iu.P. ZHELTOV and I.N. KOCHINA: On basic concepts of the theory of filtration of homogeneous liquids in strata with cracks
- V.I. IAGODKIN: On the theory of stability of viscous liquid flow in channels
- M.F. PRITULO: Flow past wings flying with gliding
- G.A. DOMBROVSKII: Supersonic flow of a gas from a nozzle into a region of low pressure
- F.L. CHERNOUS'KO: Merging shock waves in a gas of variable density
- Iu.P. LADIKOV: Some problems of dynamics of magneto-vortex configurations
- V.V. SYCHEV: On the motion of a viscous electricity-conducting fluid under the action of a rotating disc in the presence of a magnetic field

- A.B. VATAZHIN: On insufflation of an electricity-conducting liquid or gas into the boundary layer in the presence of a magnetic field
- O.Iu. POLIANSKII: On the decay of shock-waves in a moving medium with variable density and temperature
- V.A. SMIRNOV: On the flow of a plane hypersonic jet into a medium at rest
- M.P. MIKHAILOVA: Motion of a spherical piston with constant velocity in a nonhomogeneous medium
- Iu.D. SHMYGLEVSKII: On a class of rotational bodies with a minimum wave resistance
- P.I. CHUSHKIN: Submersion of a body of simple shape in a supersonic gas flow
- N.A. ROSTOVTSEV: On the problem of sound diffraction from a circular opening
- G.V. PLOTNIKOVA: On the construction of periodic solutions of a non-autonomous, quasi-linear system with two degrees of freedom
- I.I. BLEKHMAN and B.P. LAVROV: On an integral symptom of stability of motion
- B.N. BUBLIK and V.I. MERKULOV: On dynamic stability of thin elastic shells filled with a liquid
- M.E. EGLIT: On tensorial characteristics of finite deformations
- D.D. IVLEV: On extreme properties of plasticity conditions
- V.L. DOBROVOL'SKII: On the application of complex variables to plane plastic deformation
- V.V. SOKOLOVSKII: On the drawing of a thin tube through a conical matrix
- V.V. DUDUKALENKO: On the indentation of a rigid stamp into an anisotropic medium
- I.M. MINKOV: On certain functional equations
- S.A. PANKRATOV: On a numerical method of determining the roots of characteristic equations
