

CONTENTS OF NEXT ISSUE

PMM Vol.25, No.1, 1961

- D.I. KIRGETOV: On the theory of purely elastic impact of material systems
- V.V. RUMIANTSEV: On the stability of motion of gyrostats
- S.K. PERSIDSKII: On the second method of Liapunov
- M.G. KREIN and G.Ia. LIAUBARSKII: On the theory of pass bands in periodic wave guides
- B.M. BABICH: Fundamental solutions of the dynamic equations of the theory of elasticity for a heterogeneous medium
- S.G. LEKHNITSKII: Torsion of an anisotropic shaft by forces distributed on the lateral surface
- B. VISARION and K. STENESKU: Study of quasi-invariance of the static-geometric analogy in the theory of thin shells
- G.Ia. POPOV: On a method of solving the axially-symmetric contact problem of the theory of elasticity
- S.S. GRIGORIAN and F.L. CHERNOUS'KO: One-dimensional quasi-static motions of the soil
- G.G. CHERNYI: Method of integral relations in the analysis of gas flows with strong shock waves
- V.V. GOGOSOV: The composition of an arbitrary discontinuity in magnetohydrodynamics
- A.G. KULIKOVSKII and G.A. LIUBIMOV: On the structure of an inclined magnetohydrodynamic shock wave
- M.N. KOGAN: On magnetohydrodynamic flows of the mixed type
- V.N. ARKHIPOV: Plane parallel flow of a compressible fluid past a body
- S.A. BOSTANDZHIIAN: Homogeneous screw motion in a cone
- N.V. KURDIUMOVA: On the solution of the plane irrotational problem of hydrodynamics for doubly-connected domains

- N.N. KOCHINA: Thermodynamic functions for some specific forms of the internal energy in an ideal compressible medium
- CHEN CHZHEN-CHEN: On dynamic pressure of a liquid on a dam caused by an earthquake
- V.V. BOLOTIN: On free vibrations of a rectangular elastic parallelepiped
- Ia.S. UFLIAND: On torsional vibrations of semi-space
- L.M. KACHANOV: On the problem of solving problems of unsteady creep
- N.A. ROSTOVTSEV: On an integral equation encountered in the problem of pressure of a rigid foundation on heterogeneous ground
- V.L. DOBROVOL'SKII: Plane plastic deformation of anisotropic materials
- I.I. BLEKHMAN and G.Iu. DZHANELIDZE: On the stability of vibrationally linearized nonlinear systems
