

## CONTENTS OF NEXT ISSUE

*PMM Vol. 25, No. 2, 1961*

For the 70th Anniversary of N.I. Muskhelishvili

- G.A. LIUBIMOV: Structure of magnetohydrodynamic shock waves in a gas with anisotropic conductivity
- V.V. GOGOSOV: Interaction of magnetohydrodynamic waves with contact and vortex discontinuities
- G.A. TIRSKII: Conditions at the surfaces of a strong discontinuity in multicomponent mixtures
- F.L. CHERNOUS'KO: Reflection of converging weak shock waves in a gas of variable density
- S.V. FAL' KOVICH: Transonic plane gas flows with singular points on the sonic line
- B.M. BULAKH: Some problems of the theory of conical flows
- I.G. FILIPPOV: On vortex motion beneath the surface of a liquid
- V.S. SOROKIN: Nonlinear phenomena in closed flows in the vicinity of critical Reynolds numbers
- A.M. TABAROVSKII: On the motion and stability of a gyroscope on gimbals placed in a Newtonian central force field
- L.M. MARKHASHOV: On critical cases of stability, in the sense of Liapunov, of stationary motions
- E.A. BARBASHIN: On the construction of periodic motions
- E.N. ROZENVASSER: On forced vibrations and stability of quasi-harmonic systems
- Iu.P. PYT'EV: Stability regions of an equation with periodic coefficients
- V.I. ZUBOV: On the behavior of integral curves in the vicinity of periodic motions

- K.G. VALEEV: On the Hill method in the theory of linear differential equations with periodic coefficients. Determination of characteristic indices
- L.S. GNOENSKII: On the accumulation of perturbations in linear systems
- D.D. IVLEV: On the determination of the surface of bulged material as a result of indentation of a thin blade into plastic half space
- V.V. SOKOLOVSKII: On the drawing of a plastic strip
- G.Ia. POPOV: Bending of a semi-infinite plate resting on a linearly-deformable foundation
- I.A. MARKUZON: On the wedging of a brittle body by a wedge of finite thickness
- A.I. TSEITLIN: On the influence of shear and rotatory inertia on a vibrating beam resting on an elastic foundation
- P.I. TSOI: Diffraction of (short) sound waves at a cylinder (a sphere, a cone, a plane)
- S.S. VOIT: Diffraction of waves at a half-plane formed on the surface of a liquid by a periodically acting source
- M.N. KOGAN: On three-dimensional magnetohydrodynamic flows
- A.F. SIDOROV: On shock waves in polytropic gas flows having rectilinear characteristics
- E.P. ZIMIN: Flow of an electricity-conducting gas in a transverse magnetic field in the presence of heat transfer
- N.N. MAKEEV: Remarks on the paper by Ia.I. Sekerzh-Zen'kovich entitled "On the theory of the Borda mouthpiece for a gas"
