

CONTENTS OF NEXT ISSUE

PMM Vol. 26, No. 1, 1961

- G.K. POZHARITSKII: On stability of equilibria for systems with dry friction
- V.F. ILLARIONOV and L.M. SHADOV: Rotation of circular orbit plane of a satellite
- A. ANCHEV: On stability of permanent rotations of a heavy gyrostat
- V.A. TROITSKII: On variational problems of optimization of control processes
- N.N. KRASOVSKII: On analytical construction of optimum control in a system with time lag
- A.I. KLIMUSHEV: On asymptotic stability of systems with after-effect, containing a small parameter at the derivatives
- E.P. POPOV: On features of introducing a small parameter in studying nonlinear oscillations in automatic systems
- K. SHTAIDTEN: On synthesis of linear automatic control systems for limited displacements of control organs, using the criterion of the minimum mean-square error at given time instant
- G.A. GRINBERG: On some cases of flow of a conducting fluid in pipes of rectangular cross-section placed in a magnetic field
- V.V. GOGOSOV: Decomposition of an arbitrary discontinuity in magneto-fluidynamics
- V.S. TKALICH: Two-parameter motions in magnetogasdynamics (transformations of Gromeka and Chaplygin)
- V.A. VARDANIAN and R.S. OGANESIAN: On the theory of stability of a plane layer of a gravitating fluid with an exponentially diminishing density in the presence of a magnetic field
- Iu.D. SHMYGLEVSKII: Variational problems for supersonic bodies of revolution and for nozzles
- G.S. SAMOILOVICH: On the analysis of nonsteady flow past a cascade of arbitrary profiles, vibrating with arbitrary phase lag

- A. Ia. ALEKSANDROV and Iu. I. SOLOV'EV: A solution of three-dimensional axisymmetric problems of the theory of elasticity with the aid of functions of a complex variable and the solution of such problems for a sphere
- S. G. LEKHNITSKII: Radial stress distribution in a wedge and a plane with variable modulus of elasticity
- G. Ia. POPOV: Contact problem of the theory of elasticity in the presence of a circular contact area
- N. Kh. ARUTIUNIAN and M. M. MANUKIAN: On the indentation of a rigid wedge into a half-plane under the conditions of steady creep
- I. G. TEREГУLOV: On a variational theorem of the nonlinear theory of elasticity
- V. M. STARZHINSKII: Free, completely elastic, vibrating chains
- L. S. GNOENSKII: On a problem of optimum control
- V. V. KREMENTULO: On the stability of motion of a gyroscope in a Cardan suspension placed in a potential force field
- M. G. ALISHEAV: Forced convection of a viscous compressible gas in the vicinity of a heat source
- E. F. AFANAS'EV: Diffraction of a nonstationary pressure wave at a moving plate
- V. F. BAKLANOVSKAIA: On some nonlinear problems of nonstationary filtration
