

CONTENTS OF NEXT ISSUE

PMM Vol. 26, No. 4, 1962

- G.K. POZHARITSKII: The minimum problem in the problem of stability of equilibrium of a solid body partially filled with a liquid
- N.N. KOLESNIKOV: On the stability of a free solid body with a cavity filled with an incompressible viscous fluid
- Ia.N. ROITENBERG: Some problems of dynamic programming for nonlinear impulsive systems
- G.N. MIL'SHTEIN: On approximate realization of processes with the aid of transition curves
- A.G. KULIKOVSKII: On the structure of shock waves
- M.D. LADYZHENSII: On the flow of a viscous gas into vacuum
- G.M. VALOV: On axisymmetric deformation of a solid circular cylinder of finite length
- A.L. GOL'DENVEIZER: Construction of an approximate bending theory of plates by the method of asymptotic integration of the equations of the theory of elasticity
- S.G. LEKHNITSKII: Elastic equilibrium of a transversely isotropic layer and thick plate
- G.P. CHEREPANOV: Elasto-plastic problem under the conditions of anti-plane deformation
- D.D. IVLUV: On ideally plastic flow of a material taking microstresses into account
- V.P. TAMUZH: On a minimum principle in the dynamics of a rigid-plastic body
- M.E. EGLIT: Models of continuous media with nonholonomic equations of state
- I.G. TEREGULOV: Nonsteady creep of thin plates and shells for small displacements

- I. I. VOROVICH: Some asymptotic relations in statistical theory of shell stability
- V. M. GONCHARENKO: Study of probability of snap-through of an elongated cylindrical panel under the action of random loading
- K. I. OGURTSOV, L. S. PAKHOMENKO and A. I. SUTIAGINA: On some exact and approximate solutions of dynamic problems of the theory of elasticity
- G. V. PLOTNIKOVA: On the construction of periodic solutions of a non-autonomous quasilinear system with one degree of freedom in the vicinity of resonance in the case of double roots of the equations of fundamental amplitudes
- K. G. VALEEV: Stability investigation of the solutions of a linear differential equation with periodic coefficients and stationary argument lag using Hill's method
- I. B. CHELPANOV: Vibrations of a second order system for random parameter changes
- L. S. GNOENSKII: On optimization of tracking systems
- L. M. MARKHASHOV: On separation and calculation of roots of an algebraic equation
- K. S. KOLESNIKOV: On special properties of a pendulum system
- V. G. DEGTIAREV: On stability of circular motions in the problem of two immovable centers
- Iu. N. IVANOV: Optimum change of power during the motion of a body of variable mass in a gravitational field
- V. V. TOKAREV: Influence of random processes of power decrease on the motion of a body of variable mass in a gravitational field
- I. B. CHEKMAREV: On stationary flow of a viscous, electro-conducting gas in a plane channel in the presence of crossed fields
- A. G. KULIKOVSKII and G. A. LIUBIMOV: On the structure of a magnetohydrodynamic shock wave in a gas with anisotropic conductivity
- B. M. BULAKH: Remarks on the paper by J. W. Reyn "Differential-geometric considerations on the hodograph transformation for conical flow"
- N. V. KURDIUMOVA: On plane parallel motion of a thick elliptic wing under a free surface
