The expression of the Vronskian of a system of linearly independent integrals of Chaplygin's equation  $Z_n(\tau)$  and  $\zeta_n(\tau)$  is given in the form

$$W[Z_n(\tau), \zeta_n(\tau)] = H_n \frac{(1-\tau)^{\beta}}{\tau}$$

 $H_n$  is given as equal to n, whereas it should be equal to 2n.

This inaccuracy is not reflected to any important degree in the results of the works listed above.

This error was observed by S.K. ASLANOV.
