

CONTENTS OF NEXT ISSUE

PMM Vol. 27, No. 2, 1963

- P.S. KRASNOSHCHEROV: On the oscillations of a physical pendulum possessing cavities filled with a viscous liquid
- D.R. MERKIN: Influence of the compression of the earth on the performance of a gyrohorizoncompass
- K.G. VALEEV: On some cases of integrability of the equations of motion of a particle under the action of Newtonian force and supplementary perturbing forces
- N.N. SEREBRIAKOVA: On periodic solutions of dynamic systems of second-order which are almost piecewise linear
- M. REGISH: On nonuniform asymptotic stability
- N.N. KRASOVSKII: On a problem of pursuit
- K.A. LUR'E: On the method of Hamilton-Jacobi in variational problems with partial derivatives
- V.I. FEODOS'EV: On a method of solution of nonlinear stability problems of deformable systems
- G.P. CHEREPANOV: On the buckling of membranes with cutouts under extension
- S.S. GRIGORIAN: On some simplifications in the description of the motion of soft soils
- M.R. UKHOVSKII and V.I. IUDOVICH: On the equations of stationary convection
- G.Z. GERSHUNI and E.M. ZHUKHOVITSKII: On convective instability of a two-component mixture in the gravity field
- O.S. RYZHOV: On the formation of shock waves in Laval nozzles
- A.B. VATAZHIN: On separation of the magnetohydrodynamic boundary layer

- A.V. SHIPILIN: The region of discontinuous solutions of variational problems in gas dynamics
- A.G. ISTRATOV and V.B. LIBROVICH: On the stability of solution in the stationary theory of thermal explosion
- G.I. BARENBLATT: On some boundary value problems for the filtration equations of a fluid in strata with cracks
- E.V. SKVORTSOV, B.Kh. FARZAN and A.Ia. CHILAP: The solution of some problems of matching by means of reduction to the generalized Riemann problem
- D.B. KIKIN: Extremum properties of the solutions of some classes of equations with partial derivatives of second-order and their applications to gas flow
- L.Ia. KOSACHEVSKII: Side waves in two-component media
- V.V. BOLOTIN: On the density of frequencies of natural vibrations of thin elastic shells
- G.V. PLOTNIKOVA: On the construction of periodic solutions of a non-autonomous quasilinear system with two degrees of freedom
- Iu.A. ARKHANGEL'SKII: Periodic solutions of quasilinear autonomous systems, possessing first integrals
- V.F. LIASHENKO: On the theory of the gyrohorizoncompass
- A.I. LUR'E: The moment of gravitational forces acting on a satellite
- Iu.I. KADASHEVICH: On the interrelation of two fundamental problems in the theory of flow, taking into account residual microstresses
- B.R. SETH: Transitional theory of strip bending
- Iu.P. SUVOROV: The distribution of temperature stresses in an elastoplastic bar
- D.D. IVLEV: Correction to author's paper "Rigid punch indentation into a plastic half-space," *PMM* Vol. 23, No. 2, 1959
