

CONTENTS OF NEXT ISSUE

PMM Vol. 27, No. 3, 1963

- V.V. LOKHIN and L.I. SEDOV: Nonlinear tensor functions of several tensor arguments
- V.I. MOSSAKOVSKII: Compression of elastic bodies under conditions of adhesion (axisymmetric case)
- G.P. CHEREPANOV: On a method of solving the elasto-plastic problem
- G.I. BARENBLATT and R.L. SALGANIK: On the wedging of brittle bodies. Auto-oscillations during wedging
- S.N. SHIMANOV: On the theory of linear differential equations with periodic coefficients and time lag
- V.A. PAL' MOV: Error stability of optimum systems
- Iu.E. BOROVSII and Iu.I. KULAKOV: On the motion of systems of variable compositions at the presence of variational forces
- F.L. CHERNOUS' KO: On the motion of a satellite with respect to a center of masses under the action of gravitational moments
- A.N. KRAIKO: On the determination of bodies of minimum drag using the resistance laws of Newton and Busemann
- A.A. NIKOL'SKII: Invariant transformation of the equations of motion of an ideal monoatomic gas and new classes of their exact solutions
- V.B. BARANOV, G.A. LIUBIMOV and KHU IUI-IN': Analysis of the boundary layer on a dielectric plate, placed in a flow of an incompressible anisotropically-conducting liquid, in the presence of a uniform magnetic field normal to the plate
- M.I. SHLIOMIS: Oscillating disturbances in a conducting fluid in a magnetic field
- I.B. CHEKMAREV: Influence of anisotropic electroconductivity on the development of the flow of a viscous fluid in the initial portion of a plane channel

- Iu.A. SOZONENKO: Motion of a piston under the action of gas pressure
- D.P. KOUZOV: Diffraction of plane hydroacoustic wave at the boundary of two elastic plates
- A.G. ALENITSYN: Rayleigh waves in a nonhomogeneous elastic half-space
- Ia.A. MINDLIN: Free elastic waves on the surface of a tube of infinite thickness
- V.F. DEM'IANOV: Construction of programmed control in a linear system, optimum in the integral sense
- A.P. PROSKURIAKOV: Stability of periodic solutions of quasilinear autonomous systems with one degree of freedom
- K.G. VALEEV: On the convergence of theories which determine the boundaries of instability regions of the solutions of a second-order linear differential equation with periodical coefficients
- K.A. LU'E: Theorems of Liouville and Stäckel for hyperbolic variational problems
- G. LEITMANN: On maximum flight duration of a rocket in a horizontal plane
- Iu.P. GUS'KOV: A method of control of a circular satellite orbit by means of plane rotation
- U.K. NIGUL: On the application of the symbolic method of A.I. Lur'e to the analysis of states of stress and two-dimensional theories of elastic plates
- D.D. IVLEV and T.N. MARTYNOVA: On the theory of compressible ideally plastic media
