

CONTENTS OF NEXT ISSUE

PMM Vol. 27, No. 4, 1963

- A.L. GOL'DENVEIZER: Construction of an approximate theory of shells with the aid of asymptotic integration of the equations of the theory of elasticity
- N.N. KOCHINA: On auto-oscillations of a liquid of large density in pipes
- L.M. FLITMAN: Waves, generated by instantaneous discontinuity in a continuous elastic medium
- V.V. TOKAREV: Optimum control of the motion of a body with variable mass by means of a power source with active excess power
- N.N. KRASOVSKII: On stabilization of unstable motions by means of supplementary forces with incomplete feed-back
- E.A. BARBASHIN and V.A. TABUEVA: A theorem on the stability of solution of a differential equation of third-order with discontinuous characteristics
- V.Kh. KHARASAKHAL: On quasi-periodic solutions of systems of ordinary differential equations
- R.Z. KHAS'MINSKII: On the behavior of an auto-oscillating system subjected to slight noise
- A.I. EGOROV: On optimum control of processes in distributed objects
- Iu.A. ARKHANGEL'SKII: On algebraic and single-valued integrals in the problem on the motion of a rigid body in a Newtonian force field
- N.N. KOLESNIKOV: On the stability of a free gyrost
- P.V. KHARLAMOV: On the equations of motion of a heavy rigid body with a fixed point
- I.G. FILIPPOV: On the theory of linear three-dimensional non-steady problems of diffraction and some nonlinear problems

- M.P. RIABOKON': On linearized supersonic flows in Laval nozzles
- A.F. SIDOROV: On the motion of a compressible fluid in plane channels with movable walls
- G.V. CHERKESOV: Generation and damping of ship waves
- L.P. CHEREPANOV: Flow of an ideal fluid with free surfaces in doubly and triply connected regions
- L.A. EPSTEIN: Motion of an inclined plate below a free surface
- V.A. SUCHKOV: Efflux into a vacuum at an oblique wall
- Ia.S. UFLIAND: Vibrations of elastic bodies of finite conductivity in a transverse magnetic field
- A.I. LIKHODED: On stationary vibrations of a plate, supported along the edge
- G.V. IVANOV: On variational methods in the theory of creep
- S.A. AMBARTSUMIAN: On the stability of inelastic plates taking into account the deformations of transverse shear
- V.M. ALEKSANDROV: Some contact problems for the elastic layer
