

CONTENTS OF NEXT ISSUE

PMM Vol. 27, No. 6, 1963

- M.S. IAROV-IAROVOI: On the integration of the Hamilton-Jacobi equation by the method of separation of variables
- E.A. GAL'PERIN and N.N. KRASOVSKII: On the stabilization of steady motions of nonlinear control systems
- V.V. KREMENTULO: A problem on the stability of a spherical gyroscope
- L.N. SRETENSKII: Periodic waves generated by a source located above an inclined bottom
- I.G. FILIPPOV: On the theory of diffraction of plane elastic and electromagnetic waves
- D.P. KOUZOV: Diffraction of a plane hydro-acoustic wave at a crack in an elastic plate
- U.K. NIGUL: Application of the three-dimensional theory of elasticity to the analysis of the wave process in bending of a semi-infinite plate subjected to a boundary loading of short duration
- O.K. AKSENTIAN and I.I. VOROVICH: The state of stress in a thin plate
- G.I. BARENBLATT and R.L. SALGANIK: On auto-oscillations produced during wedging of thin bodies
- G.P. CHEREPANOV: Some problems of the theory of cracks in hydrodynamic formulation
- V.N. MIKHAILOV: Analysis of three-dimensional vortex supersonic flow of gas in the vicinity of a curve on which there occurs a discontinuity of the stream line
- P.I. CHUSHKIN: Hypersonic flow past a circle and a sphere in a magnetic field
- S.A. REGIRER: Flow of a conducting fluid above a permeable plane in the presence of a nonhomogeneous magnetic field

- Iu.A. ARKHANGEL'SKII: On a motion of a balanced gyroscope in a Newtonian force field
- V.G. DEGTIAREV: On polar orbits of artificial earth satellites
- V.F. LIASHENKO: On sufficient stability conditions in the theory of a gyrohorizoncompass
- I.D. KILL': On a periodic solution of a nonlinear equation
- V.A. KOSMODEM' IANSKII: On a type of variational problems
- V.A. TROITSKII: On optimization of the vibro-transportation process
- T.F. IVANOV: On periodic motions of a class of autonomous systems
- A.P. PROSKURIAKOV: Construction of periodic solutions of quasilinear autonomous systems with several degrees of freedom in special cases
- K.G. VALEEV: On the danger of combination resonances
- V.I. ROZHKOV: Asymptotic representation of periodic solution of the equation of the neutral type with small lag
- V.A. MEDVEDEV: On the convergence of the Bubnov-Galerkin method.
