

CONTENTS OF NEXT ISSUE

PMM Vol. 28, No. 1, 1964

- N.N. KRASOVSKII: On the theory of control and observability of linear dynamic systems
- V.I. KIRGETOV: On kinematically controlled mechanical systems
- E.P. GRIGOR'EV: On a class of linear optimum problems
- V.D. ANDREEV: On the theory on inertial systems of autonomous determination of coordinates of a moving object
- Iu.I. NEIMARK and N.A. FUFAYEV: On the equations of motion of systems with nonholonomic constraints
- G.K. POZHARITSKII: On the influence of viscosity on the stability of equilibrium and of stationary rotation of a solid body with a cavity, partially filled with a viscous liquid
- Iu.V. VANDAKUROV: On the theory of stability of a plasma in a strong longitudinal magnetic field, variable along the axes of symmetry
- M. Van DYKE: Lifting line theory as a problem with singular perturbations
- Iu.P. SUVOROV: On the propagation of elasto-plastic waves during heating of a semi-infinite rod
- B.V. KOSTROV: Motion of a rigid massive layer welded into an elastic medium, under the action of a plane wave
- N.A. ROSTOVTSEV: On some solutions of the integral equation in the theory of linearly deformable foundation
- V.K. PROKOPOV: Generalization of Green's formula
- U.K. NIGUL: On an approximate manner in which to take Saint-Venant-type boundary effects into account in boundary value problems of plate statics
- A.I. POBEDONOSTSEV: On stress analysis in a half-plane with a circular cavity

- G.P. CHEREPANOV: On the solution of some problems of the theory of elasticity and plasticity with unknown boundary
- V.A. SVEKLO: On initial pressure on the half-space of a smooth plane die under impact
- N.V. AZBELEV and Z.B. TSALIUK: Necessary and sufficient condition of boundedness of solutions of a class of systems of linear differential equations
- L.V. DOKUCHAEV: On the solution of a boundary value problem of vibrations of a liquid in conical cavities
- F.L. CHERNOUS'KO: On the stability of regular precession of a satellite
- P.V. KHARLAMOV: A solution of the problem of motion of a body with a fixed point
- N.V. STOIANOV: On relative periodic motions of a pendulum
- A. ANCHEV: On stability of permanent rotations of a quasi-symmetric gyrostat
- Iu.N. IVANOV: Supplemental weight components in problems of optimization of motion with limited power
- B.A. SMOL'NIKOV: On the motion of a solid body under the action of rotation of an internal flywheel
- N.P. MAR'IN: Diffusion and absorption of particles in a medium with variable density
- A.N. KRAIKO, I.N. NAUMOVA and Iu.D. SHMYGLEVSKII: On the construction of bodies of optimum shape in supersonic flow
- V.M. BORISOV and A.V. SHIPILIN: On nozzles of maximum thrust with arbitrary isoperimetric conditions
- F.V. SHUGAEV: Axisymmetric flow far from a body in the vicinity of the axis with a number M_∞ close to unity
- V.S. GALKIN: One-dimensional nonstationary solution of the equations of kinematic moments of a monoatomic gas
- E.M. SHAKHOV: Temperature field in a solid body for a nonuniformly heated surface
