

CONTENTS OF NEXT ISSUE

PMM Vol.28, № 2, 1964

- I.I. BLEKHMAN: The problem of synchronization of dynamic systems
- R.F. NAGAEV: On internal synchronization of almost like dynamic objects under the action of weak linear constraints
- L.M. MARKHASHOV: Group classification of algebraic equations by their root properties
- V.I. KIRGETOV: On equations of motion of guided mechanical systems
- V.D. ANDREEV: On general equations of inertial navigation
- K.A. LUR'E: Optimum control by conductivity of a liquid moving in a channel in a magnetic field
- A. BUSEMANN: Control of lift in magnetohydrodynamics
- S.V. FAL'KOVICH and I.A. CHERNOV: Sonic flow of gas past a body of revolution
- A.N. KRAIKO: Variational problems of gas dynamics of nonequilibrium and equilibrium flows
- I.G. FILIPPOV: On the theory of diffraction of cylindrical elastic and weak shock waves
- A.F. FILIPPOV: Diffraction of an arbitrary acoustic wave by a wedge
- A.S. MONIN: On the solution of the problem of turbulence by the method of perturbation theory
- G.I. BARENBLATT and V.A. GORODTSOV: On the structure of the micro-stress field of a developed plastic flow
- L.S. SRUBSHCHIK: On asymptotic integration of a system of nonlinear equations of plate theory
- V.M. ALEKSANDROV and I.I. VOROVICH: Contact problems of the elastic layer of small thickness
- V.K. PROKOPOV: On the relation of Papkovich's generalized orthogonality for a rectangular plate
- G.I. BYKOVITSEV: On consequences of Drucker's postulate in plasticity of anisotropic media

- A.A. BOGOIAVLENSKII: On a linear integral of cyclic displacement for a rigid body which contains movable masses within itself
- D.M. KLIMOV: On the stability of motion of an unperturbed physical pendulum
- I.Ia. KATS: On stability of stochastic systems in the large
- I.V. IOSLOVICH: On the problem of optimum trajectories of a rocket
- G.N. MIL'SHTEIN: Reduction of a class of problems of optimum control
- G.I. MAIKAPAR: Determination of current lines by known pressure distribution on the surface of a rigid body
- A.L. GONOR: Conical bodies of minimum drag in hypersonic gas flow
- G.G. CHERNYI: On the analysis of bodies of minimum drag for hypersonic speeds
- L.A. DIKII: On the stability of plane-parallel Couette flow
