

## CONTENTS OF NEXT ISSUE

PMM Vol.29, № 2, 1965

- R.F. NAGAEV: Synchronization in a system of essentially nonlinear objects with a single degree of freedom
- N.N. KRASOVSKII: On the problem of damping of a linear system under minimum control intensity
- Iu.M. REPIN: On the approximate replacement of systems with lag by ordinary dynamic systems
- K.G. VALEEV and A.I. LUR'E: On the motion of the satellite inertia center in the Earth's gravitational field
- V.D. ANDREEV: Integration of the error equations of an inertial guidance system for Keplerian motions of an object
- V.V. NOVOZHILOV and L.I. SLEPIAN: On Saint-Venant's principle in the dynamics of beams
- G.P. CHEREPANOV: Pressure of a rigid body on plates and membranes
- V.I. MOSSAKOVSKII and M.T. RYBKA: An attempt of constructing a theory of fracture for brittle materials, based on energy considerations of Griffith's criterion
- E.L. AERO, A.N. BULYGIN and E.V. KUVSHINSKII: Asymmetric hydromechanics
- Iu.B. PONOMARENKO: On "rigid" origination of stationary motions in hydrodynamics
- A.N. KRAIKO and F.A. SLOBODKINA: On the solution of variational problems of one-dimensional magneto-hydrodynamics
- E.I. ZABABAKHIN and V.A. SIMONENKO: Convergent shock wave in a heat conducting gas
- S.A. KAGANOV: On the theory of flame propagation
- V.P. VOROTILIN, V.S. KRYLOV and V.G. LEVICH: On the theory of extraction from a falling drop
- M.E. EGLIT: A generalization of a model of ideal compressible fluid
- M.I. GUREVICH: Influence of an aperture on the drag of a body under flow separation conditions
- M.N. REPNIKOV: On the theory of axisymmetric turbulence
- L.Ia. KOSACHEVSKII: Reflection of magneto-acoustic waves at the boundary between two media with finite electric conductivity

- S.S. KALMYKOVA: Diffraction of a plane wave at the junction of an ideally conducting and a dielectric wedge
- I.A. BALAEVA: On the problem of determining the position of a nonlinear system in phase space
- V.A. KOSMODEM'IANSKII: Necessary conditions of variational calculus for a problem of the Bolza-Mayer type
- P.V. KHARLAMOV: On uniform rotations of a body with a fixed point
- N.G. APYKHITIN: On the stability of some permanent rotations of a rigid body
- A. ANCHEV: On the stability of steady rotation of a rigid body with a fixed point
- S.S. GRIGORIAN: The stable form of equilibrium of a pebble beach subjected to surf
- V.I. FEODOS'EV: On a stability problem
- M.I. GUSEIN-ZADE: On the conditions of existence of decaying solutions of the two-dimensional problem of the theory of elasticity for a semi-infinite strip
- B.D. ANNIN: Remark concerning the paper by V.L. Dobrovolskii entitled "On the application of complex variables to a plane plastic deformation"
