

## CONTENTS OF NEXT ISSUE

PMM Vol.29, № 6, 1965

- G.I. BARENBLATT, V.M. ENTOV and R.L. SALGANIK: On the propagation of excitation in an electrochemical diffusion model of a nerve
- V.F. D'IACHENKO and V.S. IMSHENNIK: On converging cylindrical symmetric shock wave in the presence of dissipative effects
- V.V. SYCHEV: On the theory of strong explosion in heat conducting gas
- O.S. RYZHOV: Asymptotic flow pattern past bodies of revolution by a sonic viscous and heat conducting gas
- N.N. MOISEEV: On some features of fluid flow subjected to the action of surface tension forces
- I.M. IAVORSKAIA: Short wave asymptotic behavior of the diffraction field at a sphere for incoming plane transverse waves
- N.A. BAZARENKO and I.I. VOROVICH: Asymptotic behavior of the solution of the problem of the theory of elasticity for a hollow cylinder of finite length and small thickness
- G.V. KAMENKOV: On the problem of stability of motion in critical cases
- E.A. GAL'PERIN: On stabilization of steady motions of a nonlinear control system in the critical case of a pair of pure imaginary roots
- N.G. BULGAKOV and N.N. KRASOVSKII: On the stabilization of nonstationary systems
- G.V. PLOTNIKOVA: On the stability of periodic solutions of nonautonomous quasi-linear systems with two degrees of freedom
- A.G. PILLIUTIK and P.A. TALALAEV: On improving estimates of solutions of systems of linear differential equations with variable coefficients
- I.M. BELEN'KII: Generalization of Whittaker's formula for periodic orbits for the case of fields with arbitrary law of attraction
- K.G. VALEEV: The equations of the motion of an Earth satellite taking atmospheric resistance into account
- N.S. TSODOKOVA: On permanent axes of rotation of a gyrostator with a fixed point
- V.D. ANDREEV: On the theory of a pendulous-gyroscopic system, satisfying the conditions of M. Schuler
- V.T. KHARIN: On the calculation of eigenvalues by the Bubnov-Galerkin method and its application in the theory of hydrodynamic stability
- T.A. LETOVA: On a particular case of damped rotation of a gyrostator
- A.I. KOROTKIN: Stability of plane Poiseuille flow in the presence of elastic boundaries
- G.P. SHINDIAPIN: On the regime of regular interaction of weak shock waves
- Iu.N. KUZ'MIN and Ia.S. UFLIAND: Axisymmetric problem of the theory of elasticity for half-space, weakened by a plane circular slit
- L.V. CHERKESOV: Three-dimensional Cauchy-Poisson problem for waves in a viscous fluid
- I.I. VOROVICH and R.L. SALGANIK: On the behavior of asymptotic estimates in the theory of thin plates
