

CONTENTS OF NEXT ISSUE

PMM Vol.31, № 1, 1967

- KAMENKOV, Georgii Vladimirovich: Biographical note
Survey of scientific work of G.V. Kamenkov. List of works
- G.V. KAMENKOV: On the stability of periodic motions
- T.K. SIRAZETDINOV: On the theory of stability of processes with distributed parameters
- A. ANCHEV: On steady rotations of a heavy gyrostat with one fixed point
- N.A. BELOVA and Ia.S. UPLIAND: Dirichlet problem for a toroidal segment
- Iu.Ia. POLIAK: On the motion of two interacting charged particles in the homogeneous magnetic field
- A.B. VATAZHIN: Deformation of the velocity profile in the nonhomogeneous magnetic field
- B.A. BABESHKO: On an effective method of solution of some integral equations of the theory of elasticity and mathematical physics
- O.A. OLEINIK: On the solution of Prandtl equations by the method of finite differences
- V.I. IUDOVICH: Free convection and branching
- A.T. LISTROV: On the model of viscous fluid with the nonsymmetric stress tensor
- G.Z. GERSHUNI, E.M. ZHUKHOVITSKII and D.L. SHVARTSBLAT: On the stability of transverse flow of fluid between permeable boundaries
- V.A. KONDRAT'EV: Asymptotic of solution of the Navier-Stokes equation near the angular point of the boundary
- S.M. ZEN'KOVSKAIA: On the stability of a periodic solution of the Navier-Stokes equation
- L.A. MOVSESIAN: On an invariant transformation of equations of one-dimensional steady motions of ideal compressible fluid
- V.N. RUBANOVSKII: On the stability of motion of a body in a fluid
- G.I. SIVASHINSKII: On the existence and stability of solutions in the steady state theory of thermal burst
- G.A. KUZ'MIN: On the stability of motion in case of two small positive roots
- K.A. LUR'E: On a method of derivation of Bellman equation
- NGUEN TKHAN' BANG: On the controllability of quasilinear systems
- M.I. FEIGIN: Dynamic theory of a model of controlled damping of oscillations
- R.I. NIGMATULIN: Converging cylindrical and spherical detonation waves
- D.P. KOUZOV: On the solution of Helmholtz equation for a semi-plane, with boundary conditions containing high order derivatives
- N.V. ZVOLINSKII and K.N. SHKHINEK: On the determination of the discharge wave in one particular case
- L.Ia. AINOLA: On the duality theorem in dynamical problems of the theory of elasticity
- O.K. AKSENTIAN: Singularities of the deformed state of a plate under stress, near the rib
- V.L. BERICHEVSKII: On nonlinear tensor functions in the theory of relativity
- B.M. BULAKH and J.W. REYN: Note on the problem of the delta wing
